Around 25% of the questions on the exam are focused on configuration, customization, and administration of Salesforce. The remaining questions focus on data modeling, data management, and integration with Salesforce apps. It is important to note that the exam sample questions are not real exam questions and should not be used as a basis for studying.

Salesforce Administer, Extend, and Automate Salesforce Sample Questions (Q177-Q182):

NEW QUESTION # 177

Which two tools should an administrator use to required data to be entered in a field and improve data quality on a record in Salesorce?

Choose 2 answers

- A. Page Layouts
- B. Workflow Rules
- C. Dashboards
- D. validation Rules

Answer: A,D

Explanation:

Validation rules and page layouts are two tools that can be used to require data to be entered in a field and improve data quality on a record in Salesforce. Validation rules are a way to enforce data quality and integrity by checking the values of fields before a record is saved and displaying an error message if the values do not meet the specified criteria. Page layouts are a way to control the layout and organization of fields, buttons, related lists, and other components on a record page. Page layouts can also make fields required so that users must enter a value before saving a record.

NEW QUESTION # 178

A Recruiting User needs to setup an object relationship between the Position object and the Job Applicant object so that a Position record can have many applicants and Job Applicant can apply for many positions.

He also needs this in a setup where deleting a Job Application record will delete all information related to the job applicant in the Position object. What can a system administrator do to fulfill the requirement? * (1 Point)

- A. Create a many-to-many master-detail relationship using a junction object.
- B. Create a master-detail relationship only on the child object
- C. Create a lookup relationship using a junction object.
- D. Create a lookup relationship only on the parent object

Answer: A

NEW QUESTION # 179

Northern Trail Outfitters (NTO) wants to start using Salesforce for its HR recruiting process. NTO needs to ensure that every application is linked to both a job posting and an applicants can apply for more one job posting, and each job posting can have more than one application.

How should an administrator configure the objects?

- A. Add applicants as a junction object with master-detail relationship to both Posting and Job Applications.
- B. Make Job Application as a junction object with a master-detail relationship to Applications and a lookup relationship to Job Posting.
- C. Configure Job Application as a Junction object with master-detail relationship to both Application and Job Postings.
- D. Create Application as a junction object with a master- detail relations to Job Postings and a lookup relationship to Job Applications.

Answer: C

Explanation:

A junction object is a custom object with two master-detail relationships that allows you to create many-to-many relationships between two objects. In this case, the Job Application object can be used as a junction object to link the Application object and the Job Posting object, so that each application can be related to one or more job postings, and each job posting can have one or more applications.
