There is 24/7 customer service to help you in any situation. You can customize your desired EX-Con-101 Exam conditions like exam length and the number of questions.

Salesforce Certified Experience Cloud Consultant Sample Questions (Q165-Q170):

NEW QUESTION # 165

Ursa Major Solar (UMS) uses a third party to manage low-severity tickets using its legacy system. Sometimes, third-party agents have to create cases on behalf of UMS customers. Which user licenses should the implementation practitioner recommend for third-party staff?

- A. Customer Identity
- B. Customer Community Plus
- **C. Partner Community**
- D. Customer Community

Answer: C

Explanation:

This license type allows third-party staff to access cases, leads, opportunities, contracts, and custom objects on behalf of UMS customers. Partner Community users can also create cases from questions, escalate questions to cases, and view Knowledge articles. Partner Community users cannot access quotes or reports and dashboards.

NEW QUESTION # 166

What are three best practices when configuring self-registration for an Experience Cloud site? Choose 3 answers

- A. Assign the standard site profile as the default for self-registration.
- **B. Use a restrictive default profile to begin with.**
- **C. Assign a cloned standard site profile as the default for self-registration.**
- D. Use the same profile for your self-service site and your partner portal.
- **E. Create a separate profile for your self-service site and your partner portal.**

Answer: B,C,E

Explanation:

Three best practices when configuring self-registration for an Experience Cloud site are A, B, and C. Self-registration is a feature that allows users to create their own accounts on your Experience Cloud site without an invitation. To configure self-registration, you need to assign a default profile for self-registered users, which determines their access level and permissions on your site. A best practice is to assign a cloned standard site profile as the default, which gives you more control over the settings and customization of the profile. Another best practice is to use a restrictive default profile to begin with, which limits the access and visibility of self-registered users until they are verified or approved by an administrator. A third best practice is to create a separate profile for your self-service site and your partner portal, which allows you to differentiate the access and functionality of different types of users on your sites.

NEW QUESTION # 167

Universal Containers (UC) maintains multiple customer-facing sites, but only one profile for all customer users. No customer has access to more than one site.

Which step should the UC system administrator take to grant customers access to the appropriate site?

- A. Add user to the All Customer Portal Users public group.
- **B. Assign the profile to the site membership.**
- C. Create and assign a permission set to the users and site.
- D. Enable the Customer Identity profile or permission set.

Answer: B

Explanation:

This option allows UC to grant customers access to the appropriate site. Site membership is a feature that defines which users can access a site and what permissions they have. UC can assign the profile for all customer users to the site membership of each site and specify the default page access and object permissions for that profile. UC can also assign permission sets to the site membership to grant additional permissions to specific users.

NEW QUESTION # 168

Universal Containers (UC) has hired UX designers to help improve brand recognition and has a new style guide it needs to implement to unify branding across all of its Experience sites.

What should UC do to accomplish this?

- A. Send the style guide to Experience managers to implement.
- **B. Create a custom theme to apply to all Experience sites.**
- C. Create a custom template to apply to all Experience sites.
- D. Reference a shared Bootstrap CSS file in all of the sites.

Answer: B

Explanation:

To implement the new style guide and unify branding across all of its Experience sites, UC should create a custom theme and apply it to all sites. A theme is a collection of branding assets and style settings that define the look and feel of your site. You can create a custom theme that matches your style guide and apply it to multiple sites using the Theme Management feature in Experience Builder.

NEW QUESTION # 169

DreamHouse Realty (DR) plans to invite individuals from several new companies to its Broker Portal and would like to differentiate the user experience for each company.

Which three options should the DR system administrator use to personalize the look and feel of the portal for each new brokerage? Choose 3 answers

- A. Audience Sets
- B. Partner User Roles
- **C. Page Variations**
- **D. Audience Targeting**
- **E. Branding Sets**

Answer: C,D,E

Explanation:

Branding sets allow the administrator to define the colors, fonts, logos, and images for different parts of the site, such as the header, footer, and body. Page variations allow the administrator to create different versions of a page with different layouts, components, and content. Audience targeting allows the administrator to create audiences based on user attributes, such as profile or company name, and display different branding sets or page variations to different audiences within the same site.

NEW QUESTION # 170

.....
