EMC Dell Avamar Deploy 2023 Sample Questions (Q165-Q170):

NEW QUESTION # 165

You are configuring backups for Desktop/Laptop clients. According to best practices, what should you do to ensure that all Windows clients will have successful backups?

- A. Enable overtime so that backups can start outside their normal time
- B. Use the #USERDOCS# flag when creating the dataset
- C. Create a prescript that will initiate a VSS snapshot of the client
- D. Create a separate dataset and group for clients with Windows XP or earlier

Answer: B

Explanation:

Explanation/Reference:

Best practices for creating a dataset

- ▶ Create a backup dataset that specifies the files and folders for the backup.
- ▶ Exclude certain file types from desktop and laptop backups.
- ▶ If practicable, minimize the number of entries you define in exclude and include lists
- ▶ In an environment that contains both Windows XP and Windows Vista or Windows 7 clients, add the --x18=256 option to the dataset to prevent the "Path not found" error.

Table 15 on page 71 lists folders to include in a Desktop/Laptop dataset:

Table 15 Desktop/Laptop file types to include in a dataset

OS	Tab	Files and folders
Windows	Source Data	#USERDOCS#*\Desktop #USERDOCS#*\Documents #USERDOCS#*\My Documents #USERDOCS#*\Favorites Notice: A change in the default location of the user directories was made between the Windows XP release, and the Windows Vista and Windows 7 releases. To handle this change, the Windows Desktop/Laptop plug-in uses #USERDOCS# as a variable that translates to the default location based on the specific Windows operating system.
Mac	Source Data	/Users /Users/*/Desktop /Users/*/Documents /Users/*/Library/Safari

NEW QUESTION # 166

What is the average chunk size range after compression in an EMC Avamar system?

- A. 8 - 12 KB
- B. 32 - 64 KB
- C. 16 - 32 KB
- D. 12 - 16 KB

Answer: D
