Experience The Real CompTIA PK0-005 Exam With Web-Based Practice Exam Software

Review the products offered by us by downloading PK0-005 free demos and compare them with the study material offered in online course free and vendors' files. You will find our PK0-005 exam dumps the better than our competitors such as exam collection and others. The excellent quality of our PK0-005 exam dumps content, their relevance with the actual PK0-005 Exam needs and their interactive and simple format will prove them superior and quite pertinent to your needs and requirements. If you just make sure learning of the content in the guide, there is no reason of losing the PK0-005 exam.

CompTIA Project+ Certification Exam Sample Questions (Q112-Q117):

NEW QUESTION # 112

A project team member wrote a user guide over the past ten days. Given the following scatter diagram.

Which of the following can be formally conducted?

- A. There is a negative correlation with time and output
- B. The team member had performance issues over time.
- C. This is a display of units of outstanding work to predict completion
- D. The team member prioritized other tasks over the completion of this task

Answer: A

Explanation:

The scatter diagram shows a clear negative correlation between time (days) and output (pages), meaning as time progresses, the number of pages completed decreases. This is evident from the downward trend of the plotted points on the graph. References = CompTIA Project+ Certification Study Guide, Chapter 3: Project Execution, page 130; CompTIA Project+ Certification Exam Objectives, Domain 3.0: Project Execution, Objective 3.3: Analyze project performance by using appropriate tools and techniques, Sub-objective 3.3.2: Given a scenario, interpret the results of data analysis using appropriate tools and techniques, Knowledge of: Scatter diagrams.

NEW QUESTION # 113

A developer focused on a single story during an entire sprint. The story was underestimated and, therefore, was not completed. Which of the following steps should the Scrum team take next?

- A. Assign more resources to complete similar stories in the future.
- B. Extend the sprint duration when required with the approval of the product owner.
- C. Break the stories into workable items that can be completed within one sprint.
- D. Release the current progress into production and carry over the rest of the code for the next sprint.

Answer: C

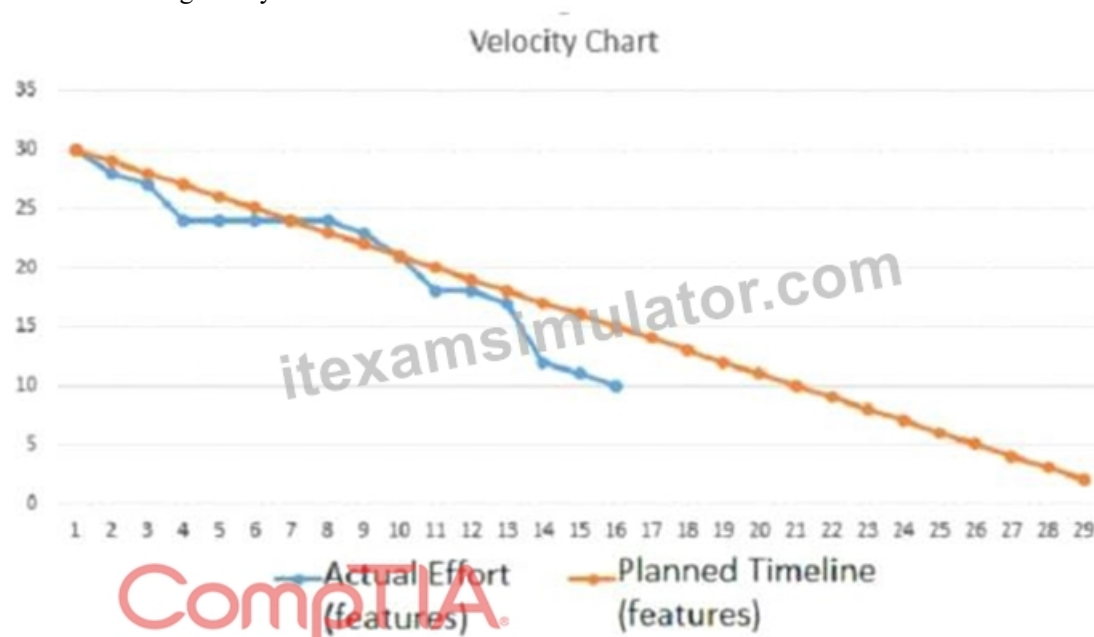

Explanation:

The Scrum team should break the stories into workable items that can be completed within one sprint, which is a time-boxed period of 7 to 30 days, during which the team delivers a potentially releasable product increment. Breaking the stories into smaller and more manageable items can help the team to estimate them more accurately, plan them more effectively, and deliver them more reliably. Breaking the stories also aligns with the agile principle of delivering working software frequently and satisfying the customer through early and continuous delivery of valuable software.

The other options are not the best steps for the Scrum team to take next. Assigning more resources to complete similar stories in the future may not solve the problem of underestimation, and may introduce additional complexity and communication overhead. Extending the sprint duration when required with the approval of the product owner may compromise the consistency and predictability of the Scrum process, and may delay the feedback and validation from the stakeholders. Releasing the current progress into production and carrying over the rest of the code for the next sprint may result in an incomplete or unstable product increment, and may violate the definition of done, which is a shared understanding of the quality criteria that the product increment must meet. References = CompTIA Project+ Study Guide: Exam PK0-005, 3rd Edition, Chapter 5: Project Scope Management1; CompTIA Project+ Certification Study Guide, 3rd Edition, Chapter 5: Project Scope Management2; The 3 Scrum Roles and Responsibilities Explained3; Implementation of Scrum - 7 Steps for an Effective Process4

NEW QUESTION # 114

Given the following velocity chart:

Which of the following updates on the project status should the Scrum master provide to the senior management team?

- A. The project deviated from the critical path.
- **B. The project is trending ahead of schedule.**
- C. The project has scope creep.
- D. The project utilized all of its available reserve.

Answer: B

Explanation:

A velocity chart is a tool used in agile project management to track the progress and performance of a project team over time. It shows the number of features or user stories completed in each iteration or sprint. The planned timeline line represents the expected or ideal velocity, while the actual effort line shows the actual or achieved velocity. By comparing the two lines, the Scrum master can identify any gaps, trends, or issues in the project delivery.

Based on the image, the most likely update that the Scrum master can provide to the senior management team is D. The project is trending ahead of schedule. This is because the actual effort line is above the planned timeline line for most of the time, indicating that the project team is completing more features than expected in each sprint. This means that the project is ahead of schedule and has a positive velocity variance.

NEW QUESTION # 115

After new capabilities were deployed in a system, issues with preexisting capabilities were reported. Which of the following testing cycles should be used to prevent this issue?

- A. Stress testing
- **B. Unit testing**
- C. Performance testing
- D. User acceptance testing

Answer: B

Explanation:

Unit testing is a testing technique that verifies the functionality and quality of individual units or components of software, such as modules, classes, functions, etc. Unit testing can help prevent issues with preexisting capabilities by detecting and fixing errors at an early stage of development, before they affect the integration and system testing. Unit testing can also ensure that new capabilities do not break or interfere with the existing ones, by checking the compatibility and dependencies of the units. Unit testing can be performed by developers using tools and frameworks that automate the process and generate reports. References = CompTIA Project+ PK0-005 Certification Study Guide, Chapter 10: Project Quality Management; CompTIA Project+ Certification Exam Objectives, Domain 3: Project Execution, Objective 3.2: Execute quality management activities.

NEW QUESTION # 116

During the project execution phase, Ann, a project manager, received an email from the project sponsor asking for an additional work package to be added to the project scope due to new legislation.

INSTRUCTIONS

Review the email with the latest updates sent by the project sponsor and respond in the following order:

1. Select the best tool for tracking the server migration progress.
2. Select the new critical path.
3. Select the correct number of engineers required for the server migration phase.

If at any time you would like to bring back the initial state of the simulation, please click the Reset All button.

View Sponsor Email

Server Migration Engineers

Select the Appropriate Tool

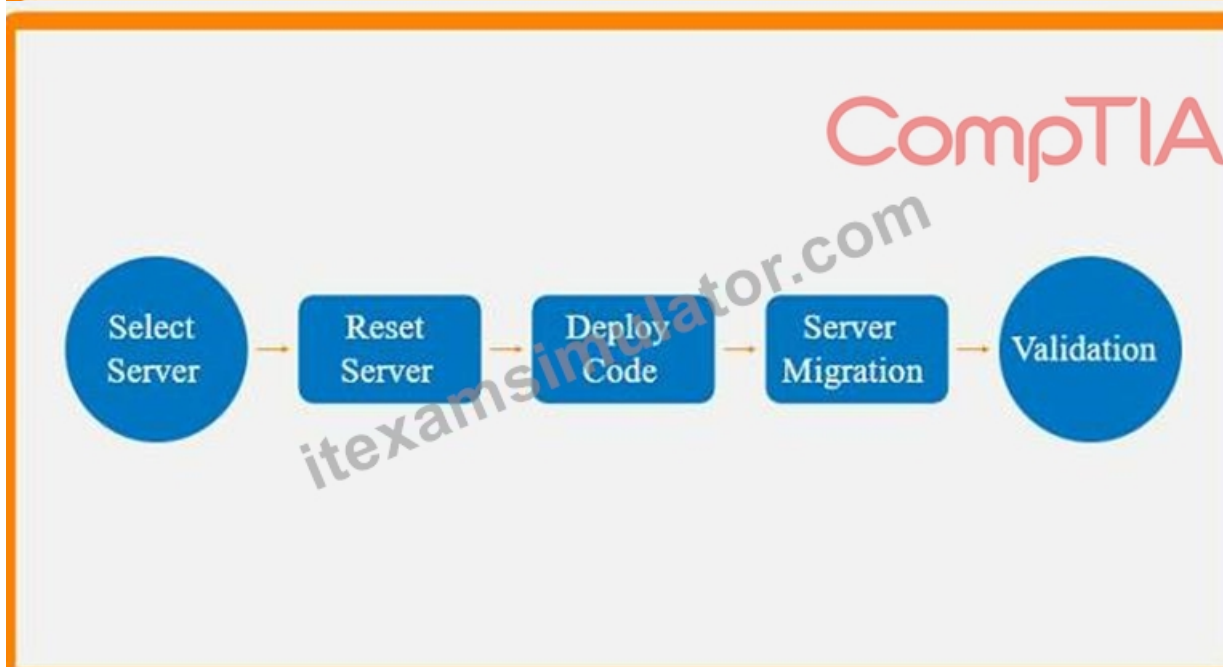

Select the Critical Path

Select the Appropriate Tool:

	Duration	3/9	3/10	3/11	3/12	3/13	3/14	3/15
Task 1	2	█	█					
Task 2	1			█				
Task 3	2			█	█			
Task 4	1						█	
Task 5	1							█
Task 6	1							█
Server Migration	2		█	█				

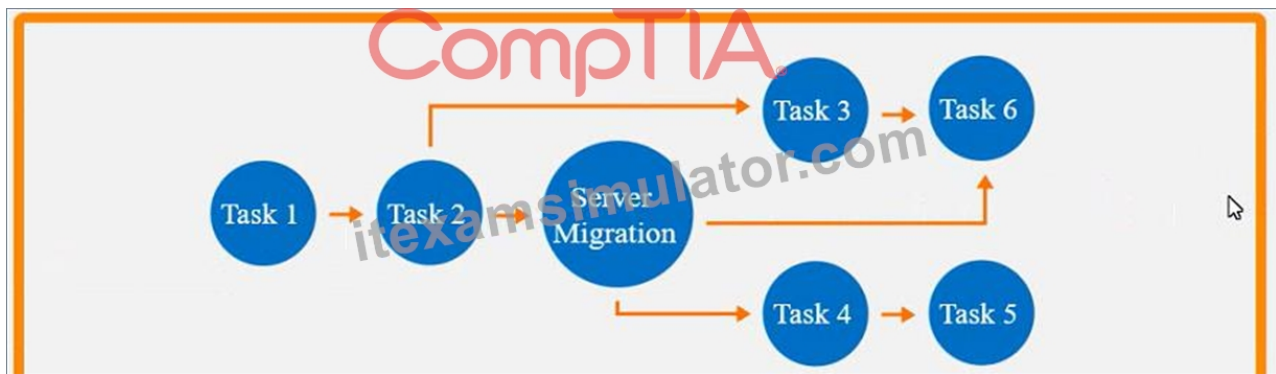

Select the new critical path.

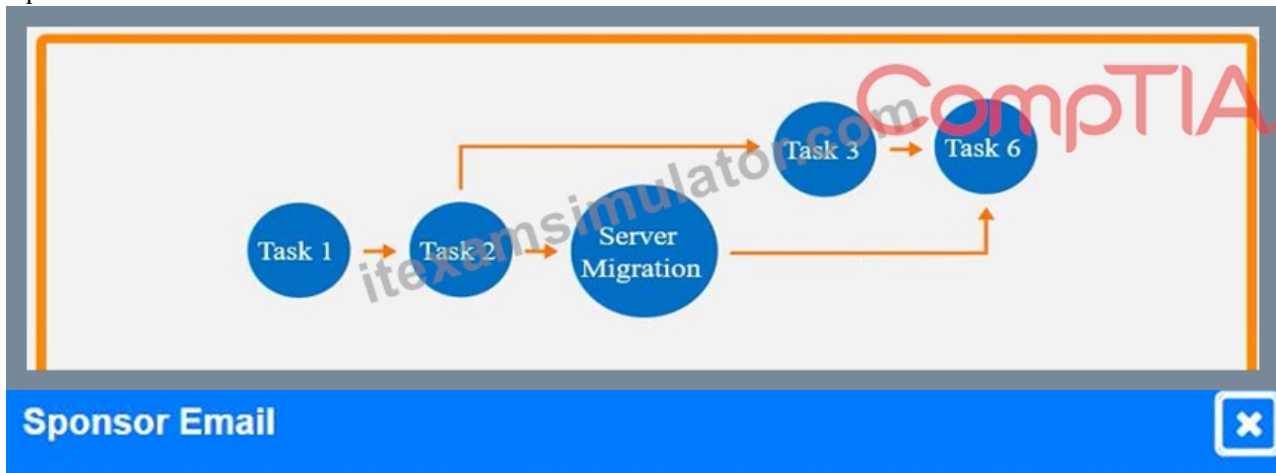

Option A

Option B

Option C

Subject: URGENT: Transformation project – Scope change – please read !

Hi Ann,

Due to new legislation in data protection regulation which will impact our "Transformation project", the following updates need to be considered:

- Server migration must be 100% complete prior to the last three tasks of the project.
- Based on a previous estimate, the migration will require 50% more engineers for this phase.
- The progress of the server migration must be monitored.

As the project manager for the "Transformation project", please take the proper actions.

Sorry for the inconvenience of sharing this in the middle of project execution.

Sincerely,

Joe
