The NCP-US preparation exam from our company will help you keep making progress. Choosing our NCP-US Study Material, you will find that it will be very easy for you to overcome your shortcomings and become a persistent person. Our NCP-US exam dumps will lead you to success!

Nutanix Certified Professional - Unified Storage v6.5 Sample Questions (Q100-Q105):

NEW QUESTION # 100
An administrator needs to enable a Nutanix feature that will ensure automatic client reconnection to shares whenever there are intermittent server-side networking issues and FSVM HA events. Which Files feature should the administrator enable?

- A. Connected Shares
- B. Persistent File Handles
- C. Multi-Protocol Shares
- D. Durable File Handles

Answer: D

NEW QUESTION # 101
Technical requirements within an organization dictate the need for a common naming system across multiple Nutanix Objects instances for a particular application use case. Which Nutanix Objects feature should an administrator leverage to ensure compliance with this naming requirement?

- A. Multicluster
- B. Streaming Replication
- C. Federated Namespace
- D. Cloud Tiering

Answer: C

NEW QUESTION # 102
What is the most likely cause of an Objects bucket that is shared with multiple users to approach its assigned capacity limit?

- A. Other users have written to the bucket.
- B. Objects store capacity includes snapshots.
- C. Some mufti-part operations are pending.
- D. Malware infection is causing the usage.

Answer: A

Explanation:
According to Nutanix Objects User Guide1, an object store is a logical grouping of buckets that share a common namespace and configuration settings. A bucket is a container for objects that can be accessed by authorized applications and users using S3-compatible APIs.
Objects Storage provides a simple and scalable S3 compatible storage tier on top of your Nutanix AOS platform2. There is no limit on objects per bucket3, but there is a limit on the total capacity of an object store that can be configured during its creation or modified later4.
Therefore, if an object store is shared with multiple users, it is possible that other users have written to the buckets in the object store and consumed its assigned capacity limit.

NEW QUESTION # 103
An administrator is required to provide a summary of metrics to the Security team.
The entity information being asked for by the Security team is as follows:
* Total folders where permissions are tracked
* Size of those folders
* Total unique users
* Total unique groups
In which product and dashboard would the administrator find all the requested data?

- A. Data Lens - Recommendations
- B. File Analytics File Operations
- C. Data Lens Footprint Widget
- D. File Analytics - Top Users

Answer: C

NEW QUESTION # 104

What is the most efficient way of enabling users to restore their files without administrator intervention in multiple Files shares?

- A. Click Enable Self Service Restore in the Edit wizard for each share in Shares tab from Files Console.
- B. Assign the same Category to all FSVMs and adding that Category to a single Protection Policy in PC.
- C. Add all FSVMs to a Consistency Group within a single asynchronous Protection Domain in PE.
- D. Click Enable next to the name of the share in Manage Recovery Settings from Data Lens.

Answer: A

NEW QUESTION # 105

......

In order to provide most comfortable review process and straightaway dumps to those NCP-US candidates, we offer you three versions of NCP-US exam software: the PDF version, the online version, and software version. There will be one version right for you and help you quickly pass the NCP-US with ease, so that you can obtain the most authoritative international recognition on your IT ability.
