

NCP-EUC Customized Lab Simulation | Reliable NCP-EUC Exam Vce

P.S. Free & New NCP-EUC dumps are available on Google Drive shared by Dumpexams: <https://drive.google.com/open?id=1zVx37LR1JedsV47Ai73qrjIETI92dIYq>

Using our NCP-EUC study braindumps, you will find you can learn about the knowledge of your exam in a short time. Because you just need to spend twenty to thirty hours on the practice exam, our Nutanix NCP-EUC Study Materials will help you learn about all knowledge, you will successfully pass the Nutanix NCP-EUC exam and get your certificate.

The Dumpexams is one of the leading platforms that has been offering real and valid Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam (NCP-EUC) exam practice test questions. These NCP-EUC exam questions are designed and verified by Nutanix NCP-EUC subject matter experts. They work closely together and put all their expertise to check the Dumpexams NCP-EUC Exam Questions one by one. So we can say that the Dumpexams NCP-EUC exam practice questions are real, valid, and updated Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam (NCP-EUC) exam questions that will provide you with everything that you need to learn to prepare and pass the NCP-EUC exam.

Reliable NCP-EUC Exam Vce & Exam NCP-EUC Simulator

The NCP-EUC test torrent also offer a variety of learning modes for users to choose from, which can be used for multiple clients of computers and mobile phones to study online, as well as to print and print data for offline consolidation. Therefore, for your convenience, more choices are provided for you, we are pleased to suggest you to choose our NCP-EUC Exam Question for your exam. So with our NCP-EUC guide torrents, you are able to pass the exam more easily in the most efficient and productive way and learn how to study with dedication and enthusiasm, which can be a valuable asset in your whole life. It must be your best tool to pass your exam and achieve your target.

Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam Sample Questions (Q171-Q176):

NEW QUESTION # 171

What Flow Network Security function is a schema of rules for specifying/enforcing a desired behavior and has one or more policies?

- A. Security policy
- B. **Security policy model3**
- C. Category set2
- D. Category1

Answer: B

Explanation:

In the terminology of Flow Network Security Next-Gen (FNS NG), the components are defined as follows:

* Security Policy Model: Defined as "A schema of policies for specifying and enforcing a desired behavior.⁴ A Policy Model will have one or more policies."⁵ This model provides the framework (such as Application, Isolation, or Quarantine) within which specific policies are created.

* Security Policy: Defined as a "collection of security rules and assets [entities, endpoints, categories, applications, etc.] on which the rules have to be enforced together."⁶ Therefore, the function that acts as the overarching schema and contains "one or more policies" is the Security Policy Model.⁷

NEW QUESTION # 172

Users are being prompted to restart their non-persistent desktops in the middle of the day. which setting in the gold image would cause this to occur?

- A. The power profile turns the screen off after 10 minutes.
- B. Windows Update policy is set to Automatic.
- C. Java automatically checks for updates every 24 hours.
- D. The mandatory Windows profile is set to v4,

Answer: B

Explanation:

non-persistent VDI machines are deleted when they are rebooted, logged off, or shut down. Therefore, Windows Update policy should be configured to prevent automatic updates that may trigger a restart on these machines¹.

NEW QUESTION # 173

What network port is required for inbound communication to Citrix Licensing?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: D

Explanation:

In a Nutanix-hosted Citrix Virtual Apps and Desktops environment, proper network port configuration is essential for component communication. The Citrix License Server is a critical infrastructure component that manages product licensing.

According to Nutanix Validated Designs and Citrix reference architectures for traffic flow, TCP port 27000 is the default port required for inbound communication to the License Server. This port is used by the License Server Manager (lmadmin or lmgrd) to receive communication from Citrix products (such as the Delivery Controller) requesting licenses.

The specific port breakdown for the License Server is:

- * Port 27000 (TCP): The License Server Manager port (Inbound communication). This is the primary entry point.
- * Port 7279 (TCP): The Vendor Daemon port.
- * Port 8082/8083 (TCP): The Administration Console web port (used for management, not licensing requests).

Therefore, to ensure successful inbound communication for licensing operations within the Nutanix infrastructure, the firewall must allow traffic on Port 27000.

NEW QUESTION # 174

An administrator is utilizing Citrix App Layering in an AHV cluster.

What must be included in the OS layer?

- A. Nutanix Guest Tools
- B. Citrix VDA
- C. VMware Guest Tools
- D. VirtIO Drivers

Answer: D

Explanation:

When creating the OS Layer for Citrix App Layering on Nutanix AHV, it is a strict requirement to include the Nutanix VirtIO Drivers.

The OS Layer is the foundational disk image used to generate the layered desktop. Because Nutanix AHV uses paravirtualized storage (SCSI) and network drivers for performance, the Windows OS within the layer must have the VirtIO drivers installed to successfully boot and communicate with the AHV hypervisor platform. Without these drivers in the OS layer, the resulting layered image will fail to boot on Nutanix infrastructure. (The Citrix VDA is typically placed in the Platform Layer or a separate App Layer, not strictly the OS layer).

NEW QUESTION # 175

An administrator is building a solution for external contractors who will have access to internal applications on an as-needed basis. The contractors work in 8-hour shifts in a follow-the-sun model providing coverage 24-hours per day.

Some of the applications used are only licensed to run on Windows Desktop operating systems.

They need to minimize the resources associated with the contractor's virtual desktops.

Which solution will meet all of these requirements?

- A. Pooled Remote Desktop Session Host
- B. Dedicated persistent full-clone desktops
- **C. Pooled non-persistent desktops**
- D. Dedicated physical PC remote desktop access

Answer: C

Explanation:

To meet the specific requirements:

* Windows Desktop OS Requirement: This eliminates Remote Desktop Session Host (RDSH), which typically relies on Windows Server operating systems to host multiple sessions. The requirement explicitly calls for Desktop OS (e.g., Windows 10/11).

* Minimize Resources & Shift Work: Dedicated options (Physical PCs or Persistent Full Clones) are inefficient for shift workers because the resources remain assigned to a specific user even when they are off-shift (16 hours a day).

Pooled Non-persistent desktops are the correct solution. They allow a single VM to be used by a contractor in Shift 1, reset, and then used by a different contractor in Shift 2. This "concurrency-based" model significantly reduces the storage and compute footprint compared to 1:1 dedicated assignments, perfectly fitting the "follow-the-sun" 24-hour coverage model while satisfying the Desktop OS requirement.

NEW QUESTION # 176

.....

If you want to use our NCP-EUC simulating exam on your phone at any time, then APP version is your best choice as long as you have browsers on your phone. Of course, some candidates hope that they can experience the feeling of exam when they use the NCP-EUC learning engine every day. Then our PC version of our NCP-EUC Exam Questions can fully meet their needs only if their computers are equipped with windows system. As we face with phones and computers everyday, these two versions are really good.
