最新的 SAP Certified Associate C-BCBAI-2509 免費考試真題 (Q18-Q23):

問題 #18

Which of the following capabilities are offered by Joule for Consultants? Note: There are 2 correct answers to this question.

- A. Code intelligence
- **B. Project lifecycle support**
- C. Process automation
- **D. SAP Fiori apps smart help**

答案： B,D

解題說明：

Joule provides targeted capabilities for consultants to streamline their work within SAP ecosystems. Project lifecycle support enables consultants to manage project phases, from planning to execution, by providing AI-driven insights and recommendations, as outlined in the SAP Business AI documentation. SAP Fiori apps smart help enhances consultants' ability to navigate and utilize Fiori apps efficiently, offering contextual guidance and support within the SAP environment. While code intelligence and process automation are valuable AI features, they are not specifically highlighted as consultant-focused capabilities in SAP's Joule documentation. These features empower consultants to deliver high-value services by improving efficiency and accuracy in SAP-related tasks.

SAP Business AI Questions (Batch 2 of 5)

問題 #19

What types of agents does Joule integrate? Note: There are 2 correct answers to this question.

- **A. Retrieval-augmented agents**
- B. Code-based agents
- **C. Product-specific agents**
- D. Content-based agents

答案： A,C

問題 #20

Your customer wants to deploy a generative AI model to summarize customer feedback across channels. Which AI Foundation component is best suited for this task?

- A. Joule Studio
- B. SAP Knowledge Graph
- **C. Generative AI hub**
- D. SAP Document AI

答案： C

解題說明：

The Generative AI hub is the most suitable component within SAP's AI Foundation for summarizing customer feedback across channels. As per SAP Business AI documentation, the Generative AI hub provides enterprise-grade orchestration of generative AI models, enabling tasks such as text summarization, content generation, and natural language processing. This component is designed to handle large-scale, cross-channel data inputs, making it ideal for summarizing customer feedback. SAP Document AI focuses on extracting insights from structured documents, Joule Studio is a low-code environment for building AI applications, and SAP Knowledge Graph contextualizes data relationships but is not optimized for generative tasks. The Generative AI hub ensures secure, compliant, and scalable processing, delivering accurate summaries to support business decisions.

問題 #21

Which of the following factors are part of SAP's commitment to building and operating AI responsibly? Note: There are 3 correct answers to this question.

- **A. SAP data centers that are powered by renewable electricity only**
- **B. Optimized AI model sizes and routing**
- **C. Ethical AI governance**
- D. Pervasive use of agile agentic AI

答案: A,B,C

解題說明:

SAP's commitment to responsible AI is rooted in ethical, sustainable, and efficient practices. SAP data centers powered by renewable electricity only reflect SAP's dedication to sustainability, reducing the environmental impact of AI operations. Optimized AI model sizes and routing ensure efficient use of computational resources, minimizing energy consumption while maintaining performance, as highlighted in SAP's AI infrastructure guidelines. Ethical AI governance is a cornerstone, involving frameworks to ensure transparency, fairness, and accountability in AI development and deployment, as per SAP's Responsible AI Framework. Pervasive use of agile agentic AI is not explicitly listed as a factor in SAP's responsible AI strategy, and clean core-compliant extensions focus on system design rather than responsible AI. These principles align with SAP's broader mission to deliver trustworthy AI solutions.

問題 #22

(What are some potential benefits of using SAP Business AI in finance? Note: There are 3 correct answers to this question.)

- A. Simplify error resolution
- B. Generate creative accounting solutions
- C. Enforce compliance
- D. Reduce sales outstanding
- E. Guard against fraud

答案: A,C,E

解題說明:

Comprehensive and Detailed Explanation From Exact Extract: SAP Business AI in finance provides benefits such as enforcing compliance through risk management and governance, guarding against fraud via anomaly detection, and simplifying error resolution with intelligent guidance in processes like invoice matching and payment clarification. These capabilities enhance accuracy, reduce risks, and improve operational efficiency in financial operations.

Exact extracts supporting this:

Enforce compliance: "With SAP AI-powered governance, compliance, and risk management solutions, finance departments can identify and respond to risks as they arise."learning.sap.com "Optimize working capital, manage risk, ensure compliance, and grow revenue."sap.com Guard against fraud: "AI-assisted anomaly detection to protect the business against fraud."learning.sap.com

"Reduce revenue losses due to fraud using AI with SAP Business Integrity Screening for SAP S/4HANA Cloud Private Edition."sap.com Simplify error resolution: "Intelligent guidance to simplify error resolution."learning.sap.com "Eliminate manual payment clarifications, reducing accounts receivable matching effort by 71% with AI-powered matching and payment advice extraction."sap.com Other options are incorrect because:

Option A: SAP Business AI focuses on reliable, data-grounded solutions rather than "creative" accounting, which could imply non-compliant or unethical practices.

Option D: While AI optimizes working capital, reducing days sales outstanding (DSO) is more directly associated with cash application automation, but the primary benefits highlighted are compliance, fraud protection, and error simplification; DSO reduction is a secondary outcome.

Reference from Positioning SAP Business AI Solutions as part of SAP Business Suite documents or Study Guide: Sourced from the SAP Learning Journey "Discovering New AI Capabilities for SAP Finance" and the SAP product page for "SAP Business AI - Artificial Intelligence for ERP & Finance." These emphasize AI's role in compliance, fraud detection, and error resolution within financial processes, as aligned with C_BCBAI_2502 certification materials.

問題 #23
