Salesforce Certified Advanced Administrator Sample Questions (Q95-Q100):

NEW QUESTION # 95

A sales rep at Ursa Major Solar was assigned to a role under their manager and is the record owner of several opportunities; however, the sales rep is missing from the manager's forecast.

What should the administrator review to solve this issue?

- **A. Allow Forecasting**

- B. Allow Override Forecasts
- C. Enable manager adjustments
- D. Enable owner adjustment

Answer: A

Explanation:

Allow Forecasting is what the administrator should review to solve this issue. Allow Forecasting is a user permission that enables users to access and edit forecasts. If a user does not have this permission, they will not be able to see their own forecast or any forecasts below them in the role hierarchy. Therefore, the administrator should make sure that the sales rep has this permission enabled on their profile or permission set.

NEW QUESTION # 96

What can an administrator do to enable customer-submitted service requests?

Choose two answers.

- A. Enable live agent on the company website
- B. Enable case feed on the company website
- C. Enable chatter answers
- D. Enable the service cloud console on the company website

Answer: A,C

NEW QUESTION # 97

An administrator has been asked to enable permissions for users on the account services team to be able to edit and change ownership of Accounts owned by any of the team members.

What should the administrator configure?

- A. Update the profile Account object to Modify All.
- B. Set organization-wide sharing for Account as Public Read Only.
- C. Enable Account Teams and grant Read record-level access to account team members for the Account object
- D. Create a Sharing Rule on the Account object for all members of the account services role to have Read/Write access.

Answer: D

NEW QUESTION # 98

An administrator is using the Dev Console Log Inspector to troubleshoot a Process Builder.

What event type should the administrator look for in the event column?

- A. Event types beginning with FLOW
- B. Event types beginning with PROCESS
- C. Event types beginning with AUTOMATED.
- D. Event types beginning with WORKFLOW

Answer: A

Explanation:

Explanation

The Dev Console Log Inspector is a tool that allows you to view and analyze debug logs in a graphical interface. Debug logs contain information about database operations, system processes, and errors that occur when executing a transaction or running unit tests. To troubleshoot a process builder, the administrator should look for event types beginning with FLOW in the event column. These event types indicate the start and end of a flow interview, as well as any flow elements, faults, or decisions that occur during the execution.
