It is the best way to ensure success. With our C\_S4EWM\_2023 practice questions, you can get the most out of your studying and maximize your chances of passing your C\_S4EWM\_2023 Exam. CertkingdomPDF SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Extended Warehouse Management is the answer if you want to score higher in the C\_S4EWM\_2023 exam and achieve your academic goals.

## SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Extended Warehouse Management Sample Questions (Q13-Q18):

### NEW QUESTION # 13

Which fields in the warehouse process type are used to determine warehouse order creation rules (WOCR)? Note: There are 2 correct answers to this question.

- A. Activity
- B. Storage process
- C. WOCR activity area
- D. Process type determination indicator

**Answer: A,C**

Explanation:

Comprehensive and Detailed In-Depth Explanation:

Warehouse order creation rules (WOCR) in SAP EWM are determined by fields in the warehouse process type. Option B ("WOCR activity area") is correct as it links the process type to a specific area for task grouping, and option C ("Activity") is correct because it specifies the task type (e.g., PICK), both set in SPRO: SCM Extended Warehouse Management > Cross-Process Settings > Warehouse Task > Define Warehouse Process Type. Option A (Storage process) and option D (determination indicator) influence other processes, not WOCR directly.

### NEW QUESTION # 14

What are some requirements for automatic wave creation? Note: There are 2 correct answers to this question.

- A. Conditions and condition records exist
- B. Wave templates with one or more options are defined
- C. Wave templates with release method "Automatic" are defined
- D. Job for automatic release is scheduled

**Answer: A,C**

Explanation:

Comprehensive and Detailed In-Depth Explanation:

Automatic wave creation in SAP EWM groups outbound tasks. Option C ("Wave templates with release method 'Automatic'") is correct as it triggers wave creation automatically, and option D ("Conditions and condition records exist") is correct because conditions (e.g., time, volume) determine when waves are created, both configured in SPRO: SCM Extended Warehouse Management > Goods Issue Process > Wave Management. Option A (job) is for release, not creation, and option B is too vague.

### NEW QUESTION # 15

Which of the following are product warehouse tasks during putaway with process-oriented storage control?

- A. The final process step
- B. All process steps
- C. The first process step
- D. The first and final process steps

**Answer: D**

Explanation:

Comprehensive and Detailed In-Depth Explanation:

In process-oriented storage control (POSC) for putaway, warehouse tasks are created for specific steps. Option D ("The first and final process steps") is correct because tasks are generated for the initial step (e.g., unloading) and the final step (e.g., putaway to

bin), as defined in the storage process configuration in SPRO: SCM Extended Warehouse Management > Cross-Process Settings > Process-Oriented Storage Control. Option A (all steps) includes intermediate steps not always task-based, while B and C are too restrictive.

#### NEW QUESTION # 16

What can you control with an activity area? Note: There are 2 correct answers to this question.

- A. The area in which a resource will work in the warehouse
- B. The warehouse order creation rules to be used
- C. The doors that can be connected to a staging area
- D. The interim bin for layout oriented storage control

Answer: A,B

#### NEW QUESTION # 17

How do you control the physical inventory procedures which can be done in a specific part of the warehouse?

- A. You define a queue and assign this to the physical inventory area
- B. You assign bins directly to the physical inventory area
- C. You define a storage section and assign this to the physical inventory area.
- D. You define an activity area and assign this to the physical inventory area

Answer: D

#### NEW QUESTION # 18

.....
