With the right Amazon AWS-Solutions-Associate study material and support team passing the examination at first attempt is an achievable goal.

### Amazon AWS Certified Solutions Architect - Associate (SAA-C03) Sample Questions (Q163-Q168):

#### NEW QUESTION # 163

A rapidly growing global ecommerce company is hosting its web application on AWS. The web application includes static content and dynamic content. The website stores online transaction processing (OLTP) data in an Amazon RDS database. The website's users are experiencing slow page loads.

Which combination of actions should a solutions architect take to resolve this issue? (Select TWO.)

- A. Configure a Multi-AZ deployment for the RDS DB instance
- B. Host the dynamic web content in Amazon S3
- C. Set up an Amazon CloudFront distribution
- D. Create a read replica for the RDS DB instance.
- E. Configure an Amazon Redshift cluster.

**Answer: C,D**

Explanation:

Explanation

To resolve the issue of slow page loads for a rapidly growing e-commerce website hosted on AWS, a solutions architect can take the following two actions:

1. Set up an Amazon CloudFront distribution
2. Create a read replica for the RDS DB instance

Configuring an Amazon Redshift cluster is not relevant to this issue since Redshift is a data warehousing service and is typically used for the analytical processing of large amounts of data.

Hosting the dynamic web content in Amazon S3 may not necessarily improve performance since S3 is an object storage service, not a web application server. While S3 can be used to host static web content, it may not be suitable for hosting dynamic web content since S3 doesn't support server-side scripting or processing.

Configuring a Multi-AZ deployment for the RDS DB instance will improve high availability but may not necessarily improve performance.

#### NEW QUESTION # 164

An application running on AWS generates audit logs of operational activities. Compliance requirements mandate that the application retain the logs for 5 years. How can these requirements be met?

- A. Save the logs in an Amazon Elastic Block Store (Amazon EBS) volume and take monthly snapshots
- B. Save the logs in an Amazon S3 bucket and enable MFA Delete on the bucket
- C. Save the logs in an Amazon S3 Glacier vault and define a vault lock policy
- D. Save the logs in an Amazon Elastic File System (Amazon EFS) volume and use Network File System version 4 (NFSv4) locking with the volume

**Answer: B**

#### NEW QUESTION # 165

A photo-sharing service stores pictures in Amazon Simple Storage Service (S3) and allows application sign-in using an OpenID Connect-compatible identity provider. Which AWS Security Token Service approach to temporary access should you use for the Amazon S3 operations?

- A. Web Identity Federation

- B. SAML-based Identity Federation
- **C. AWS Identity and Access Management roles**
- D. Cross-Account Access

**Answer: C**

#### **NEW QUESTION # 166**

A company wants to use an AWS Region as a disaster recovery location for its on-premises infrastructure. The company has 10 TB of existing data and the on-premises data center has a 1Gbps internet connection. A solution architect must find a solution so the company can have its existing data on AWS in 72 hours without transmitting it using an unencrypted channel.

Which solution should the solutions architect

select

- **A. Send the initial 10 TB of data to AWS using AWS Snowball.**
- B. Establish a VPN connection between Amazon VPC and the company's data center
- C. Send the initial 10 TB of data to AWS using FTP.
- D. Establish an AWS Direct Connect connection between Amazon VPC and the company's data center

**Answer: A**

#### **NEW QUESTION # 167**

What is the maximum response time for a Business level Premium Support case?

- A. 10 minutes
- B. 30 minutes
- C. You always get instant responses (within a few seconds).
- **D. 1 hour**

**Answer: D**

#### **NEW QUESTION # 168**

.....
