## SCP-NPM Reliable Test Pdf - Latest SCP-NPM Dumps Book

We will offer the preparation for the SCP-NPM training materials, we will also provide you the guide in the process of using. The materials of the exam dumps offer you enough practice for the SCP-NPM as well as the knowledge points of the SCP-NPM exam, the exam will become easier. If you are interested in the SCP-NPM training materials, free demo is offered, you can have a try. And the downloading link will send to you within ten minutes, so you can start your preparation as quickly as possible. In fact, the outcome of the SCP-NPM Exam most depends on the preparation for the SCP-NPM training materials. With the training materials, you can make it.

## SolarWinds Network Performance Monitor (NPM) Exam Sample Questions (Q73-Q78):

### NEW QUESTION # 73

For any node you monitor, you can use Network Discovery to automatically add child volumes or interfaces for monitoring.

- A. TRUE
- B. FALSE

**Answer: B**

Explanation:

For any node you monitor, you cannot use Network Discovery to automatically add child volumes or interfaces for monitoring. Network Discovery is a tool that helps you identify and add new devices to your network, but it does not automatically monitor all

the components of the discovered devices. You need to manually select the volumes or interfaces you want to monitor from the list of resources on each node. You can also use the Network Sonar Results Wizard to filter and add the resources you want to monitor after running a discovery job. References:

Discover your network with NPM - SolarWinds (see the Monitoring Settings panel section) Network Discovery Tool - Automated Discovery Software | SolarWinds (see the Monitor Devices section)

#### NEW QUESTION # 74

You need to implement service level agreement (SLA) reporting for a new hosted data center service. Which SLA performance metric should you track?

- A. CPU utilization
- B. Memory utilization
- C. Response time
- D. Interface discards

**Answer: A**

#### NEW QUESTION # 75

The Orion platform supports agent-based monitoring for which OS types? (Choose all that apply.)

- A. Sun Solaris
- B. Linux
- C. IBM
- D. AIX Unix Agents
- E. Windows

**Answer: B,D,E**

Explanation:

The Orion platform supports agent-based monitoring for Windows, Linux/Unix, and AIX systems. An Orion agent is software that provides a communication channel between the Orion server and the target system, as an alternative to WMI or SNMP. Agent-based monitoring can offer better performance, security, and reliability than agentless monitoring, especially for remote or cloud-based systems. The Orion platform does not support agent-based monitoring for Sun Solaris or IBM systems, as they are not compatible with the agent software. Reference: Monitor with SolarWinds Platform agents in SAM, SolarWinds Platform Agent requirements, Orion Platform | SolarWinds

#### NEW QUESTION # 76

You want to create an Orion Map that shows the connections between your on-site devices and your servers in the Cloud. You can see the connections between all of the devices on site, but do not have visibility to the connections to your cloud servers.

How do you resolve this?

- A. Open additional firewall ports between the cloud servers and the on-site devices
- B. Increase the polling intervals between Orion and the cloud servers
- C. Switch to SNMP polling for all devices to show the connections between on site and cloud resources
- D. Manually configure connections between onsite and cloud resources in Orion Maps

**Answer: D**

Explanation:

Orion Maps can automatically display the connections between the devices that are monitored by NPM, based on topology data, manual dependencies, or application dependency mapping. However, if some of the devices are not monitored by NPM, or the connections are not detected by any of these methods, you can manually configure the connections between them in Orion Maps. To do this, you need to drag and drop the desired devices from the Entity Library to the map canvas, and then use the Connect tool to draw lines between them. You can also edit the connection properties, such as name, type, and status, to customize the appearance and behavior of the connections. Reference: Create and edit Intelligent Maps, Connect objects on maps manually, Intelligent Maps for SolarWinds Platform products

### NEW QUESTION # 77

All users can create their own Orion Maps. How do you limit a user from seeing or working with select monitored entities through the SolarWinds server?

- A. Configure permissions on the monitored entity to remove access to the Orion user account
- B. Configure Account limitations to remove access to the Orion user account
- C. Configure Alert imitations to remove access to the Orion user account
- D. Unmanage entities to remove access to the Orion user account

**Answer: A**

### NEW QUESTION # 78

.....

By unremitting effort and studious research of the SCP-NPM practice materials, they devised our high quality and high effective SCP-NPM practice materials which win consensus acceptance around the world. They are meritorious experts with a professional background in this line and remain unpretentious attitude towards our SCP-NPM practice materials all the time. They are unsuspecting experts who you can count on.
