NEW QUESTION # 55

A customer requests a dynamic list from CSV. Which field type supports that?

- **A. Flex Master Data-based field**
- B. Computed Field
- C. Single-Select Enum
- D. Hyperlink

Answer: A

Explanation:

TheFlex Master Data (FMD)-based fieldtype supports dynamic lists sourced from CSV uploads. FMD fields act like advanced picklists that can contain thousands of values, imported via CSV templates defining the master data structure and entries. These fields are searchable, scalable, and ideal for large or frequently changing datasets.

Single-select enumerations are static lists manually defined and cannot import large CSV datasets. Computed fields calculate values dynamically based on expressions and are not designed for listing selectable values.

Hyperlink fields store URLs, unrelated to selection lists.

FMD fields are the preferred approach when a customer requires large or frequently updated lookup lists in sourcing projects or contracts.

Which document must be returned to SAP before a Deployment Lead can be assigned to the project?

- A. Delivery Engagement Readiness Checklist
- B. Deployment Overview
- C. Solution Design Matrix
- D. Enablement Workbook

Answer: A

Explanation:

The Delivery Engagement Readiness Checklist is a critical gatekeeper document that confirms all prerequisites and readiness criteria have been met before SAP assigns a Deployment Lead to a project. This checklist ensures project scope, resourcing, access, and other foundational elements are in place to proceed.

Other documents like Deployment Overview and Enablement Workbook are informative or internal project management tools but do not formally trigger Deployment Lead assignment. The Solution Design Matrix is a design artifact and not a staffing gating document.

This process supports structured project governance and resource allocation within SAP.
