NEW QUESTION # 251
Which tasks are customer responsibilities, according to the AWS shared responsibility model? (Select TWO.)

- A. Patch or upgrade Amazon DynamoDB.
- B. Configure the AWS provided security group firewall.
- C. Classify company assets in the AWS Cloud.
- D. Determine which Availability Zones to use for Amazon S3 buckets.
- E. Select Amazon EC2 instances to run AWS Lambda on.
- F. AWS Config

Answer: B,C

Explanation:
According to the AWS shared responsibility model, the customer is responsible for security in the cloud, which includes the tasks of configuring the AWS provided security group firewall and classifying company assets in the AWS Cloud. A security group is a virtual firewall that controls the inbound and outbound traffic for one or more EC2 instances. The customer must configure the security group rules to allow or deny traffic based on protocol, port, or source and destination IP address2 Classifying company assets in the AWS Cloud means identifying the types, categories, and sensitivity levels of the data and resources that the customer stores and processes on AWS. The customer must also determine the applicable compliance requirements and regulations that apply to their assets, and implement the appropriate security controls and measures to protect them
