

# 2V0-17.25 Valid Exam Objectives & 2V0-17.25 Practice Exam

What's more, part of that ITCertMagic 2V0-17.25 dumps now are free: <https://drive.google.com/open?id=1wsRi4HBAqnEoADOMh9rfN1VrxXAv03HK>

Our 2V0-17.25 learning quiz is the accumulation of professional knowledge worthy practicing and remembering, so you will not regret choosing our 2V0-17.25 study guide. The best way to gain success is not cramming, but to master the discipline and regular exam points of question behind the tens of millions of questions. Our 2V0-17.25 Preparation materials can remove all your doubts about the exam. If you believe in our products this time, you will enjoy the happiness of success all your life

## VMware 2V0-17.25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>Deploy, Configure, and Operate VMware Cloud Foundation (VCF): This section of the exam measures the skills of VCF Administrators and goes in-depth into deploying, configuring, and managing VMware Cloud Foundation. The deployment portion covers identifying deployment models, configuring private cloud environments, and setting up workload domains and networking. The management objectives focus on lifecycle operations such as fleet management, identity and role-based access, licensing, certificate handling, and importing existing vCenters. Operations are assessed through capabilities like monitoring health, logs, networks, and storage, along with creating dashboards, configuring alerts, and ensuring compliance. The automation portion evaluates skills in using VCF Automation for multi-tenancy, provider networking, content libraries, governance policies, and extensibility to automate business processes. It also includes knowledge of deploying Supervisor-based services within Cloud Foundation.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>Plan and Design the VMware by Broadcom Solution: This section of the exam measures the skills of Solution Designers and emphasizes the ability to plan and design VMware by Broadcom solutions. Although no testable objectives are defined here, it reinforces the importance of architectural planning and design considerations for large-scale cloud deployments.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>VMware Cloud Foundation Fundamentals: This section of the exam measures the skills of Private Cloud Engineers and covers the basic building blocks of VMware Cloud Foundation. It includes the vision and use cases for private cloud, along with the value it provides to businesses. Candidates are expected to understand compute fundamentals such as deploying and managing vCenter, ESXi, clusters, and virtual machines. Storage fundamentals include configuring vSphere storage, setting up vSAN clusters, applying storage policies, and understanding resilience options. Networking fundamentals are also assessed, with a focus on configuring connectivity, fabrics, routing, and network services in a VMware environment.</li> </ul>

Topic 4	<ul style="list-style-type: none"> <li>IT Architectures, Technologies, Standards: This section of the exam measures the skills of Cloud Architects and focuses on understanding the broader context of IT architectures, common technologies, and industry standards. While it does not have testable objectives, it sets the foundation for how VMware Cloud Foundation aligns with enterprise cloud strategies.</li> </ul>

## 2026 VMware 2V0-17.25: VMware Cloud Foundation 9.0 Administrator Valid Exam Objectives

In fact, sticking to a resolution will boost your sense of self-esteem and self-control. So our 2V0-17.25 exam materials can become your new aim. Our 2V0-17.25 study materials could make a difference to your employment prospects. Getting rewards need to create your own value to your company. However, your capacity for work directly proves your value. As long as you get your 2V0-17.25 Certification with our 2V0-17.25 practice braindumps, you will have a better career for sure.

### VMware Cloud Foundation 9.0 Administrator Sample Questions (Q70-Q75):

#### NEW QUESTION # 70

An administrator is tasked with troubleshooting an issue where some VMs are not appearing in the vCenter inventory after a recent migration to a new vSphere environment.

Which two components should the administrator examine to resolve this issue? (Choose two.)

- A. The vSphere permissions assigned to the VMs.
- **B. The compatibility of the VM hardware version with the new vSphere environment.**
- C. The storage policies applied to the VMs.
- D. The network settings of the new vSphere environment.
- **E. The registration status of the VMs in the new vSphere environment.**

**Answer: B,E**

Explanation:

If the hardware version of the virtual machines is incompatible with the new vSphere environment, the VMs may not appear or may fail to register properly. Ensuring compatibility between the VM hardware version and the vSphere environment is essential for successful VM migration.

If the VMs are not correctly registered in the new vSphere environment after migration, they won't show up in the vCenter inventory. Checking the registration status helps to identify if this is the issue.

#### NEW QUESTION # 71

An administrator has been tasked with creating an alert in VMware Cloud Foundation (VCF) Operations with the following settings:

- Wait cycle: 2
- Cancel cycle: 2

Assuming the alert is not resolved, how much time elapses by default between the symptom triggering and the alert automatically cancelling itself?

- **A. 20 minutes**
- B. 4 minutes
- C. 40 minutes
- D. 10 minutes

**Answer: A**

#### NEW QUESTION # 72

What is the function of Velero?

- **A. Backup and restore Kubernetes clusters.**

- B. Monitor cluster services.
- C. Publish DNS records for applications to DNS servers.
- D. Collect data and logs from different sources, unify them, and send them to multiple destinations.

**Answer: A**

Explanation:

Velero is an open-source Kubernetes backup and restore solution integrated into VMware Cloud Foundation for Kubernetes management. The VCF 9.0 Kubernetes Services Documentation describes it as:

"Velero provides backup, recovery, and migration of Kubernetes cluster resources and persistent volumes." Key functionality includes:

- \* Backup and restore of Kubernetes objects such as deployments, services, and namespaces.
- \* Data protection for persistent volumes via storage snapshots.
- \* Migration capabilities across clusters.

Analysis of incorrect options:

- \* Publishing DNS records (A) is handled by CoreDNS or external DNS integrations, not Velero.
- \* Monitoring cluster services (B) is the role of Kubernetes health checks and observability tools like Prometheus, not Velero.
- \* Collecting logs and data (C) is done by logging stacks such as Fluent Bit or VCF Operations for Logs.

Therefore, Velero's primary role is backup and restore of Kubernetes clusters.

References: VMware Cloud Foundation 9.0 - Kubernetes Services and Data Protection (Velero integration).

### NEW QUESTION # 73

Which tasks can be accomplished through vSphere Host Profiles?

- A. Removing old VIBs from an ESXi host automatically
- B. Checking compliance with defined storage configurations
- C. Managing user accounts and password policies
- D. Enforcing identical network settings across multiple hosts

**Answer: B,C,D**

Explanation:

Host Profiles allow consistent host settings (network, storage, security). They don't typically remove VIBs automatically (B); that's often done via CLI or vSphere Lifecycle Manager.

### NEW QUESTION # 74

An administrator must ensure the network team can fully utilize the Network Operations feature in VCF. What component must be installed and configured?

- A. VCF Operations for Networks
- B. VCF Operations Collector
- C. vDefend Firewall
- D. NSX Networking

**Answer: A**

Explanation:

The VCF 9.0 Operations Documentation identifies Operations for Networks as the key enabler for the Network Operations feature: "VCF Operations for Networks (formerly vRNI) provides visibility into network traffic flows, NSX fabric health, application dependency mapping, and micro-segmentation planning. It integrates directly into VCF Operations dashboards under Network Operations." The vDefend firewall is unrelated, as it provides workload-level security. The VCF Operations Collector is required for telemetry ingestion but does not provide full Network Operations. NSX itself provides the underlying virtual networking, but it must be monitored through VCF Operations for Networks. Therefore, the correct answer is VCF Operations for Networks.

### NEW QUESTION # 75

.....

You can also be part of successful 2V0-17.25 exam candidates. To do this you just need to enroll in 2V0-17.25 exam and strive

hard to get success in the VMware 2V0-17.25 certification exam. In this journey, the 2V0-17.25 Dumps can help you perfectly. The VMware Cloud Foundation 9.0 Administrator 2V0-17.25 Exam Questions are the real, updated VMware Cloud Foundation 9.0 Administrator 2V0-17.25 exam practice Test that will assist you in VMware 2V0-17.25 exam preparation and enable you to pass the final VMware 2V0-17.25 exam easily.
