Latest NICET ITFAS-Level-1 Exam Cram | ITFAS-Level-1 Exam Quiz

As we all know, review what we have learned is important, since, it can make us have a good command of the knowledge. ITFAS-Level-1 Online test engine has testing history and performance review, and you can have general review of what you have learned. In addition, with the professional team to edit, ITFAS-Level-1 exam cram is high-quality, and it also contain certain quantity, and you can pass the exam by using ITFAS-Level-1 Exam Dumps. In order to serve you better, we have online and offline chat service, and if you have any questions for ITFAS-Level-1 exam materials, you can consult us, and we will give you reply as soon as possible.

NICET Inspection and Testing of Fire Alarm Systems Level I Exam Sample Questions (Q52-Q57):

NEW QUESTION # 52

When a system must be fully or partially disabled for less than 8 hours, who must be notified when the system is restored?

- A. Fire department
- B. Insurance company
- C. System owner
- D. AHJ

Answer: C

Explanation:

When a fire alarm system is impacted for any period of time, certain parties must be notified both before and after testing or

impairment. When the impairment is less than 8 hours, NFPA 72 (2022), Section 10.21.3.6 applies.

NFPA 72 (2022), Section 10.21.3.6:

"Where a system has been impaired for less than 8 hours, notification shall be made to the system owner or the owner's designated representative when the system has been returned to service." This section makes it clear that the system owner is the responsible party to be notified upon restoration in these shorter impairments.

Correct answer: D. System owner

NEW QUESTION # 53

According to NFPA 72, in addition to the type of equipment, which additional factor should be considered when determining the frequency of cleaning system equipment?

- A. Number of devices per loop
- **B. Local ambient conditions**
- C. Frequency of periodic testing
- D. Age of the equipment

Answer: B

Explanation:

The need to clean devices such as detectors is influenced by the environment they are installed in, not just their type or age. Dusty, smoky, or humid environments will require more frequent cleaning.

NFPA 72 (2022), Section 14.4.1.3:

"The frequency of cleaning shall be determined by the manufacturer's instructions and the local ambient conditions." Correct answer:

C. Local ambient conditions

NEW QUESTION # 54

According to NFPA 72, manual fire alarm boxes shall be located within which distance of each exit doorway on each floor?

- A. 16 feet (5.0 meters)
- B. 6 feet (2.0 meters)
- **C. 5 feet (1.5 meters)**
- D. 33 feet (10.0 meters)

Answer: C

Explanation:

Manual fire alarm boxes (pull stations) are required to be easily accessible near exits so that occupants can quickly initiate an alarm when leaving the area. The specific distance requirement is found in:

NFPA 72 (2022), Section 17.14.6.3:

"Manual fire alarm boxes shall be located within 5 ft (1.5 m) of each exit doorway on each floor." So the correct distance is 5 feet, not 33 feet. That makes the correct answer:

Correct answer: A. 5 feet (1.5 meters)

NEW QUESTION # 55

How should the documentation cabinet be labeled?

- A. Fire alarm documents
- B. Fire alarm record documents
- C. System records
- **D. System record documents**

Answer: D

Explanation:

NFPA 72 mandates that fire alarm system documentation be stored in a dedicated cabinet, and that cabinet must be clearly labeled. The exact phrase required is:

NFPA 72 (2022), Section 7.7.2:

"The cabinet shall be prominently labeled 'SYSTEM RECORD DOCUMENTS.'"

This ensures that anyone - including inspectors, AHJs, or technicians - can easily identify where critical system information is stored.
Correct answer: D. System record documents

NEW QUESTION # 56

What is the inspection frequency of supervising station alarm system transmitters?

- A. Semiannually
- B. Annually
- C. Monthly
- D. Quarterly

Answer: D

Explanation:

Transmitters connected to supervising stations (such as DACTs or IP communicators) must be inspected quarterly to ensure signal integrity and physical condition.

NFPA 72 (2022), Table 14.3.1 - Inspection Frequencies:

"Supervising station transmitting equipment" #Quarterly

This includes checking for damage, loose connections, or communication issues.

Correct answer: B. Quarterly

NEW QUESTION # 57

.....

These mock tests are specially built for you to assess what you have studied. These ITFAS-Level-1 Practice Tests are customizable, which means you can change the time and questions according to your needs. You can even access your previously given tests from the history, which helps you to overcome mistakes while giving the actual test next time.
