## Numerical Ability

Compute:
$$\frac{3}{5} + \frac{2}{3} = ?$$

A. $\frac{15}{19}$

B. $\frac{19}{15}$

C. $\frac{4}{15}$

D. $\frac{5}{8}$

A rectangular room is 10 m long and 8 m wide. What is the area?

A. 18 sqm

B. 64 sqm

C. 80 sqm

D. 100 sqm
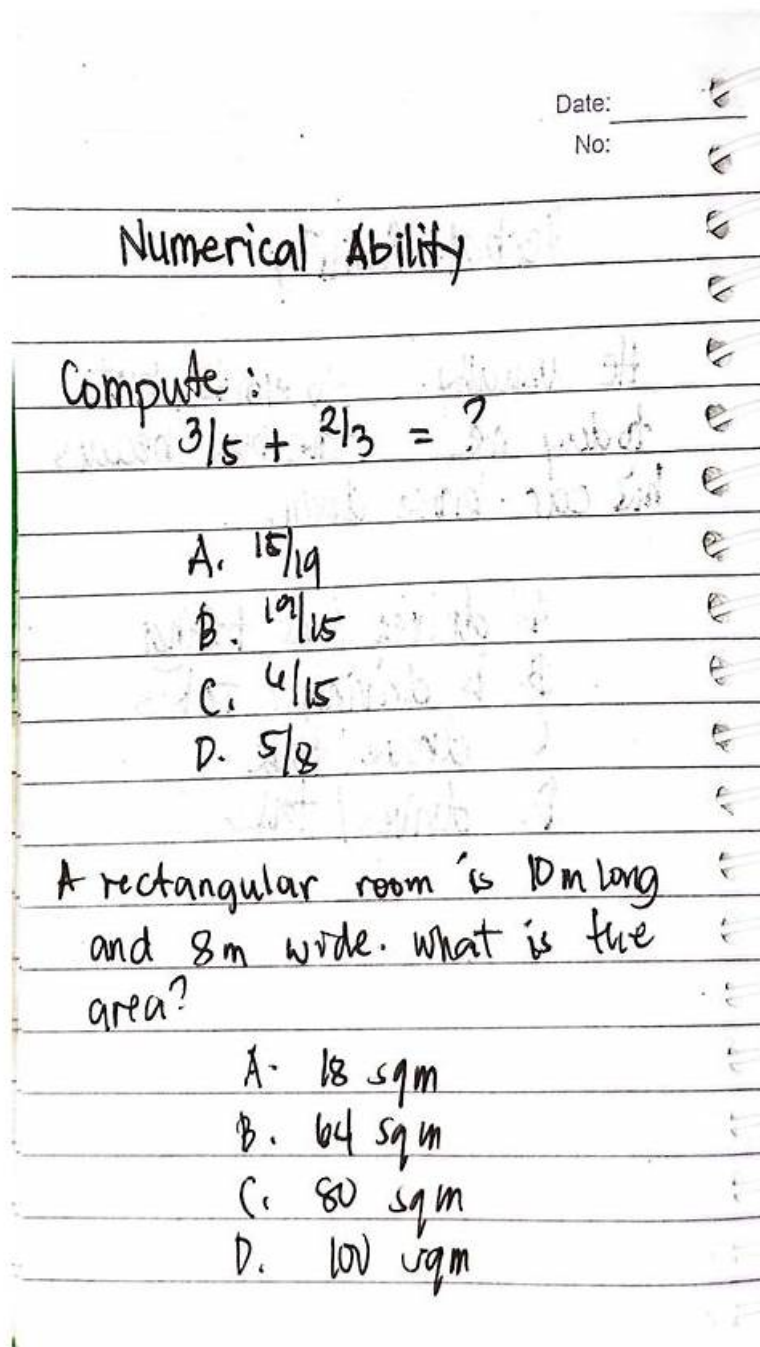

First of all we have fast delivery after your payment in 5-10 minutes, and we will transfer C-CPI-2506 guide torrent to you online, which mean that you are able to study as soon as possible to avoid a waste of time. Besides if you have any trouble coping with some technical and operational problems while using our C-CPI-2506 exam torrent, please contact us immediately and our 24 hours online services will spare no effort to help you solve the problem in no time. As a result what we can do is to create the most comfortable and reliable customer services of our C-CPI-2506 Guide Torrent to make sure you can be well-prepared for the coming exams.

## SAP C-CPI-2506 Exam Syllabus Topics:

| Topic | Details |
|-------|---------|

| | |
|---|---|
| Topic 1 | • SAP Event Mesh: This section of the exam measures the skills of Solution Architects and centers on using SAP Event Mesh to support event-driven integration. It highlights the importance of asynchronous communication, event publishing, and subscription models, allowing organizations to build scalable and decoupled systems. |
| Topic 2 | • SAP Integration Suite Overview: This section of the exam measures the skills of Integration Consultants and covers the foundational concepts of the SAP Integration Suite. It provides an understanding of the suite's capabilities, its role in connecting applications, and its relevance in modern cloud-based integration scenarios. |
| Topic 3 | • Implementing Cloud Integration: This section of the exam measures the skills of Integration Consultants and examines how cloud integration flows are designed and deployed. It emphasizes creating integration scenarios, handling connectivity, and applying best practices to build efficient, secure, and reliable integration processes in SAP's cloud environment. |
| Topic 4 | • Managing APIs: This section of the exam measures the skills of Solution Architects and focuses on managing APIs within the SAP ecosystem. It covers topics such as API provisioning, lifecycle management, security policies, and monitoring, ensuring candidates can handle APIs effectively for enterprise integration needs. |

# Achieve Your Goals with Real SAP C-CPI-2506 Exam Questions

In order to let you have a general idea about our C-CPI-2506 study engine, we have prepared the free demo in our website. The contents in our free demo are part of the real materials in our C-CPI-2506 learning dumps. I strongly believe that you can feel the sincerity and honesty of our company, since we are confident enough to give our customers a chance to test our C-CPI-2506 Preparation materials for free before making their decision. and you will find out the unique charm of our C-CPI-2506 actual exam.

# SAP Certified Associate - Integration Developer Sample Questions (Q50-Q55):

**NEW QUESTION # 50**
What is the most crucial factor for ensuring robust security in the integration of this SAP landscape, while maintaining optimal performance and scalability?

- A. Centralizing all SAP system administration to a single, highly secure data center.
- B. Implementing a well-defined security architecture that encompasses authentication, authorization, and data encryption.
- C. Employing a highly skilled security team with extensive SAP experience.
- D. Prioritizing the latest SAP security patches above all other considerations.

**Answer: B**

Explanation:
For robust security in SAP integration landscapes:
A security architecture must cover:
Authentication # Verifying the identity of users/systems (OAuth 2.0, SAML, certificates).
Authorization # Role-based access control.
Encryption # TLS/SSL for data in transit, strong encryption for data at rest.
This ensures end-to-end security without sacrificing performance or scalability.
Other options:
Skilled teams and security patches are important but are operational measures, not the foundation of integration security.
Centralizing system administration is organizational, not architectural.
Thus, the key is a well-defined security architecture.

**NEW QUESTION # 51**

Which of the following XSL statements selects each node in the source XML?

- A. <xsl:template match="*">
- B. <xsl:template match="@*">
- C. <xsl:template match="text()">
- D. <xsl:template match="/*">

**Answer: A**

Explanation:
In XSLT mapping:
<xsl:template match="*"> # Matches each node (any element node) in the XML source.
<xsl:template match="/*"> # Matches only the root node.
<xsl:template match="@*"> # Matches all attributes of the current element.
<xsl:template match="text()"> # Matches text nodes only.
Thus, to select each node, the correct statement is <xsl:template match="*">.

# NEW QUESTION # 52
What does the "Open Integration" principle of the SAP Integration Suite mean?

- A. SAP Integration Suite by default supports integrations to other SAP software.
- B. SAP Integration Suite allows SAP-to-SAP integrations.
- C. SAP Integration Suite by default supports third-party software integration.

**Answer: C**

Explanation:
The "Open Integration" principle of SAP Integration Suite emphasizes openness beyond SAP-to-SAP integrations.
SAP provides pre-built content and adapters for SAP solutions (S/4HANA, SuccessFactors, Ariba, Concur, etc.).
Additionally, it supports third-party applications and ecosystems through:
Open Connectors (over 160+ third-party apps like Salesforce, HubSpot, Workday).
Open APIs and standards (REST, OData, SOAP, JMS, AMQP, etc.).
Thus, the principle ensures SAP + non-SAP integration scenarios are fully supported by default.

# NEW QUESTION # 53
Which combination of event-driven architecture (EDA) patterns is supported by SAP Event Mesh?

- A. Publish/Subscribe and Point-to-Point event-driven architecture patterns
- B. Request/Reply and Message Queuing event-driven architecture patterns
- C. Choreography and Orchestration event-driven architecture patterns
- D. Publish/Subscribe and Event Sourcing event-driven architecture patterns

**Answer: A**

Explanation:
SAP Event Mesh supports:
Publish/Subscribe # A single event published by a producer can be consumed by multiple subscribers.
Point-to-Point (Queue-based) # Messages sent directly from producer to consumer via queues.
Other options are incorrect:
Event Sourcing is not part of SAP Event Mesh capabilities.
Request/Reply is synchronous, not the main EDA pattern.
Choreography/Orchestration are higher-level process design concepts, not the eventing patterns.

# NEW QUESTION # 54
Which combination of SAP BTP role collections allows a user to manage queues and topic subscriptions in SAP Event Mesh, and monitor its usage and resources?

- A. SecurityAdmin and SecurityDevelop

- B. IntegrationAdmin and IntegrationDevelop
- C. EventMeshAdmin and EventMeshDevelop
- D. ApplicationAdmin and ApplicationDevelop

**Answer: C**

Explanation:
In SAP BTP, SAP Event Mesh provides messaging capabilities (queues, topics, and subscriptions) that require specific role collections to enable developers and administrators to perform tasks. SAP delivers two dedicated role collections for Event Mesh:
EventMeshDeveloper:
Manages queues and topic subscriptions
Monitors Event Mesh and its queues
Performs testing of queues and message flows
EventMeshAdmin:
Includes all developer capabilities
Provides additional administration rights for lifecycle management of Event Mesh instances and configurations When a user is assigned these role collections, they gain the ability to:
Create and manage queues and topic subscriptions.
Monitor usage and resources such as queue depth, consumers, connections, and spool size within Event Mesh.
Other provided options are incorrect:
ApplicationAdmin/ApplicationDevelop # These are not SAP Event Mesh role collections, they do not provide queue or topic subscription access.
SecurityAdmin/SecurityDevelop # These roles are tied to security configurations and do not allow Event Mesh operations.
IntegrationAdmin/IntegrationDevelop # These roles belong to SAP Integration Suite (Cloud Integration) capability, not Event Mesh.
Therefore, the correct and verified answer according to SAP Integration Developer documentation is:
B). EventMeshAdmin and EventMeshDevelop

**NEW QUESTION # 55**
......

Every working person knows that C-CPI-2506 is a dominant figure in the field and also helpful for their career. If C-CPI-2506 reliable exam bootcamp helps you pass exams and get a qualification certificate you will obtain a better career even a better life. Our study C-CPI-2506 Guide materials cover most of latest real C-CPI-2506 test questions and answers. If you are certainly determined to make something different in the field, a useful certification will be a stepping-stone for your career, so why not try our product?
