Quiz 2026 Salesforce-MuleSoft-Developer-I: Latest Salesforce Certified MuleSoft Developer (Mule-Dev-201) Real Dumps Free

We provide the free demos before the clients decide to buy our Salesforce-MuleSoft-Developer-I study materials. The clients can visit our company's website to have a look at the demos freely. Through looking at the demos the clients can understand part of the contents of our Salesforce-MuleSoft-Developer-I study materials, the form of the questions and answers and our software, then confirm the value of our Salesforce-MuleSoft-Developer-I Study Materials. If the clients are satisfied with our Salesforce-MuleSoft-Developer-I study materials they can purchase them immediately. They can avoid spending unnecessary money and choose the most useful and efficient Salesforce-MuleSoft-Developer-I study materials.

Salesforce Certified MuleSoft Developer (Mule-Dev-201) Sample Questions (Q170-Q175):

NEW QUESTION # 170
Refer to the exhibits.
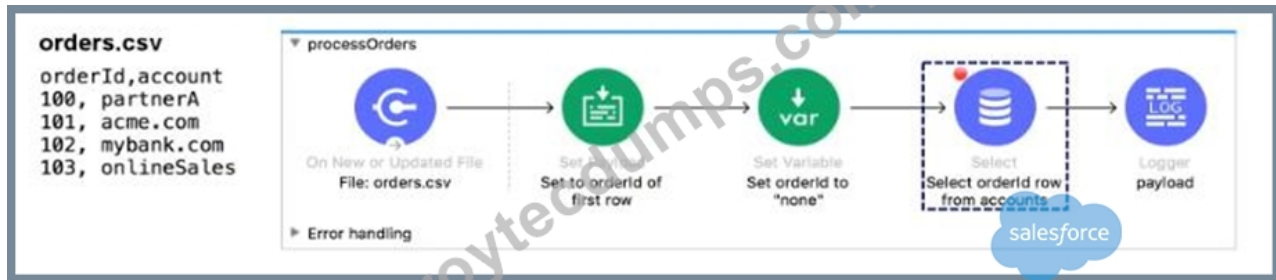

The orders.csv file is read, then processed to look up the orders in a database. The Mule application is debugged in Any point Studio and stops at the breakpoint.
What is the payload shown in the debugger at this breakpoint?

- A. "none"
- B. The database response
- C. 0
- D. The entire CSV file

Answer: C

NEW QUESTION # 171
Mule application contains ActiveMQ JMS dependency. Mule application was compiled and run successfully in Anypoint Studio. The mule application must now be exported from Anypoint Studio and shared with other developer. What export options should be selected to create the smallest JAR file that can be imported into other developer's Anypoint Studio and run successfully?

- A. Select the Include project modules and dependencies option only
- B. Select only Attach Project Sources only
- C. Select both Attach Project Sources and Include project modules and dependencies option
- D. De-select both Attach Project Sources and Include project modules and dependencies option

Answer: B

Explanation:
Correct answer is Select only Attach Project Sources only
You must keep the Attach Project Sources option selected to be able to import the packaged JAR file back into a Studio workspace.
Deselect the Include project modules and dependencies option.
This option skips bundling the actual modules and external dependencies required to run the Mule application in a Mule runtime engine, creating a lightweight JAR file package that does not include any dependencies specified in the Mule application's pom.xml file.
The generated JAR file is not a functional deployable archive and cannot be deployed to a Mule runtime engine, but instead offers a way to archive only the source files that make up the Mule application. This is the same as using the -lightWeightPackage flag when packaging using the Mule Maven Plugin and is useful if you want to distribute your project to other Studio installations because it only keeps a reference to all its dependencies. When you import a lightweight package into Studio, all your dependencies are automatically downloaded MuleSoft Doc Ref : https://docs.mulesoft.com/studio/7.8/import-export-packages

NEW QUESTION # 172
Refer to the exhibits.
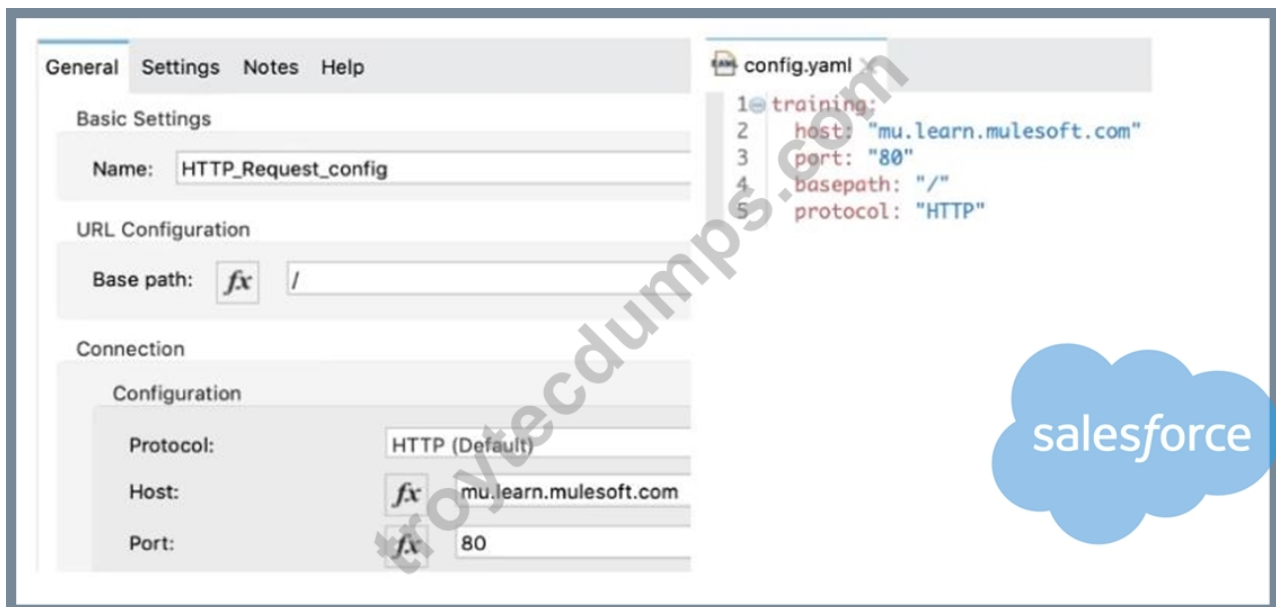

A Mule application has an HTTP Request that is configured with hardcoded values. To change this, the Mule application is configured to use a properties file named config.yaml.
what valid expression can the HTTP Request host value be set to so that it is no longer hardcoded?

- A. #[training:host]
- B. ${training.host}
- C. #[training.host]
- D. ${training:host}

Answer: B

Explanation:
Correct answer is ${training.host}

-------------- How to Configure Properties to Mule 4.X Platform?
1) Go to /src/main/resources project directory.
2) Create a configuration file with the name configuration.yaml inside the newly created config folder.
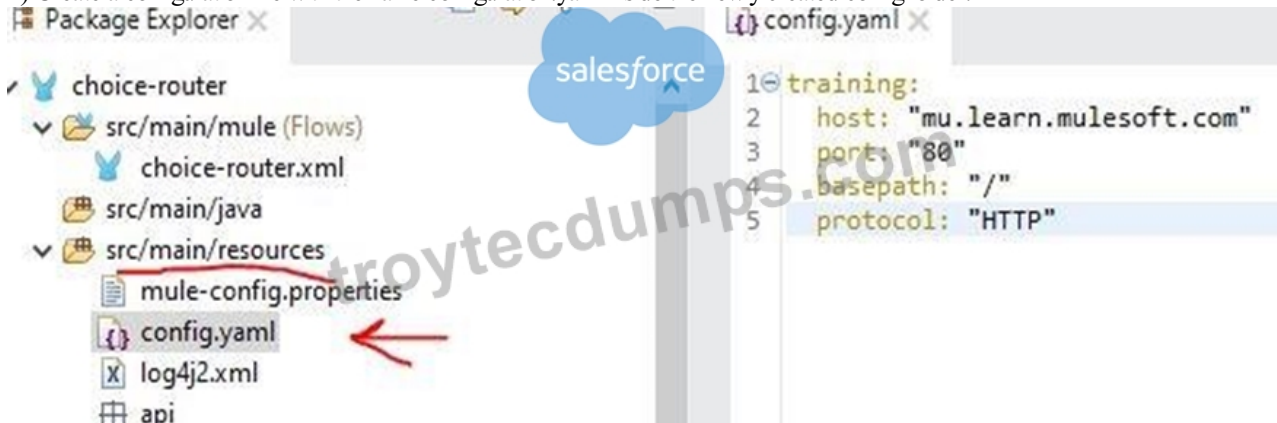

3) Go To Project > Global Element > Create > General >select the configuration.yaml file create in step- 2)
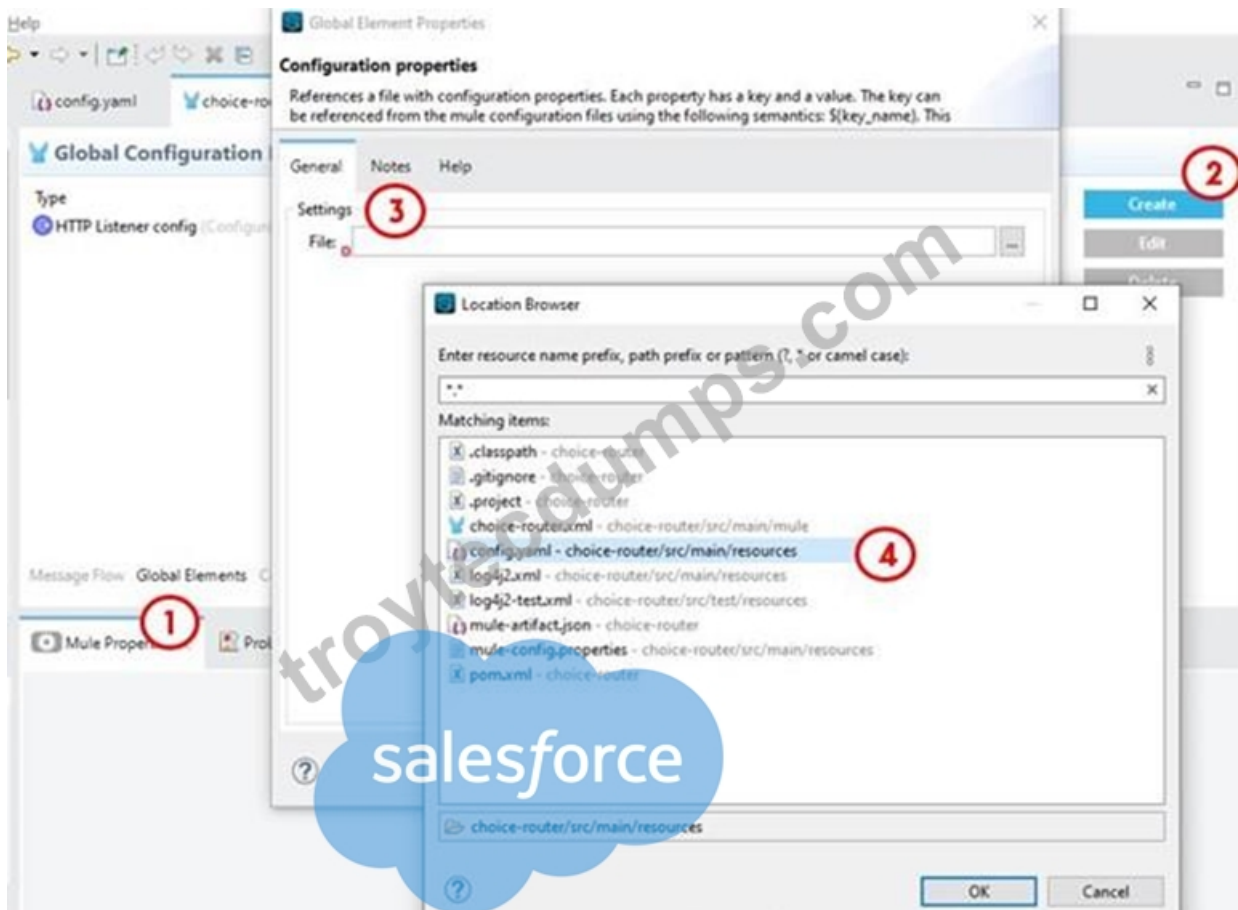

4) To verify develop a simple flow with HTTP listener which has above entries. Put the logger that prints the values on console.
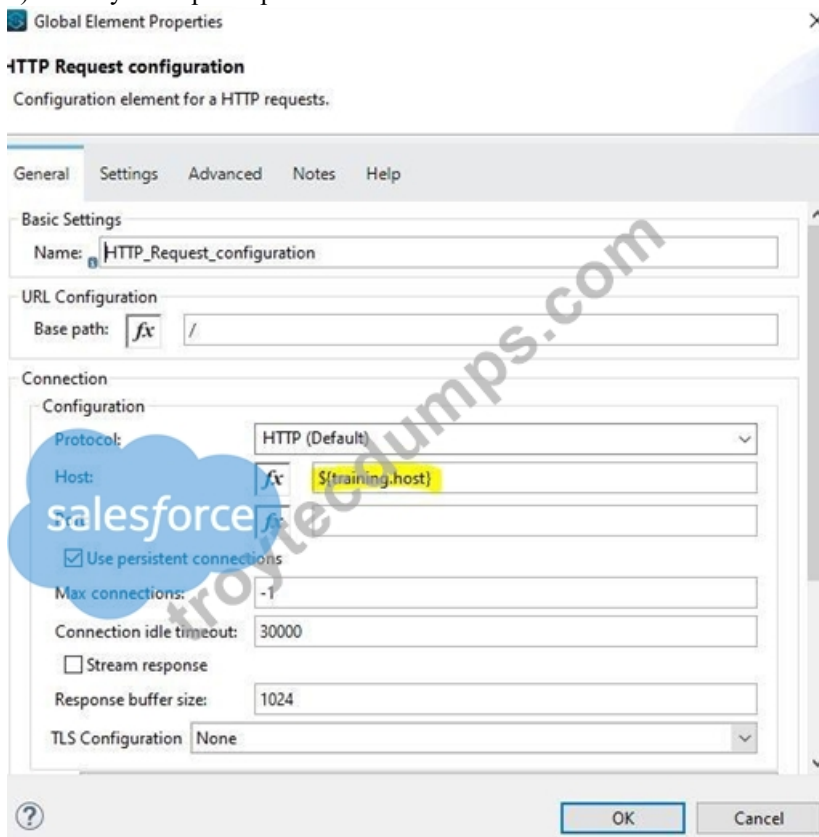

5) Additional info: Similarly, when you want to access this port in DataWeave you need to use p function

NEW QUESTION # 173

A company has defined two RAML fragments, Book Data Type and Book Example to be used in APIs.
What would be valid RAML to use these fragments ?

```
1   #%RAML 1.0 DataType
2   # bookDataType.raml
3
4   "type": "object"
5   "properties":
6       id: integer
7       title: string
8       author: string
9       publisher: string
10      year: integer
11      ISBN:
12          type: string
13          required: true
14
15
#%RAML 1.0 NamedExample
# bookExample.raml

bookExample:
    ID: 101
    title: Shakespeare
    author: Encylopedia Britanica
    publisher: John Wiley & Sons
    year: 2007
    ISBN: "0471767840"
```
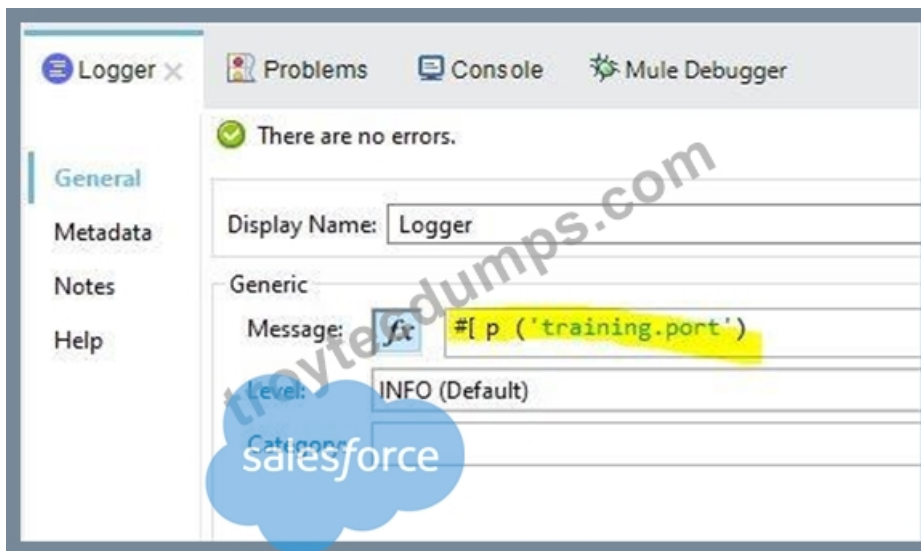

- A. 1. #%RAML 1.0
    2. title: Books
    3. Book: bookDataType.raml
    4. /books:
    5. post:
    6. body:
    7. application/json:
    8. type: Book
    9. examples:
    10. input: bookExample.raml
    11. responses:
    12. 201:
    13. body:
    14. application/json:
    15. example:
    16. message: Book added
- B. 1. #%RAML 1.0

2. title: Books
3. Book: !include bookDataType.raml
4. /books:
5. post:
6. body:
7. application/json:
8. type: Book
9. examples:
10. input: !include bookExample.raml
11. responses:
12. 201:
13. body:
14. application/json:
15. example:
16. message: Book added

- C. 1. #%RAML 1.0
2. title: Books
3. types:
4. Book: ABC/Examples/bookDataType.raml
5. /books:
6. post:
7. body:
8. application/json:
9. type: Book
10. examples:
11. input: ABC/Examples/bookExample.raml
12. responses:
13. 201:
14. body:
15. application/json:
16. example:
17. message: Book added

- D. 1. #%RAML 1.0
2. title: Books
3. Book: bookDataType.raml
4. /books:
5. post:
6. body:
7. application/json:
8. type: Book
9. examples:
10. input: bookExample.raml
11. responses:
12. 201:
13. body:
14. application/json:
15. example:
16. message: Book added

Answer: D

Explanation:
* RAML file contains lot of information that could be considered as "not API-describing". Sort of "economy-class" members. Equally important, but not necessarily part of the main RAML file.
* Through !includes, RAML allows us to build file-distributed API definitions, which is not only useful to encourage code reuse but also improves readability.
* We can create RAML fragments with such code and then include them in main RAML project using !include like:
types:
Book: !include bookDataType.raml and
examples:
input: !include bookExample.raml

* Additionally for

---- Correct Answer: D

NEW QUESTION # 174
Refer to the exhibits.

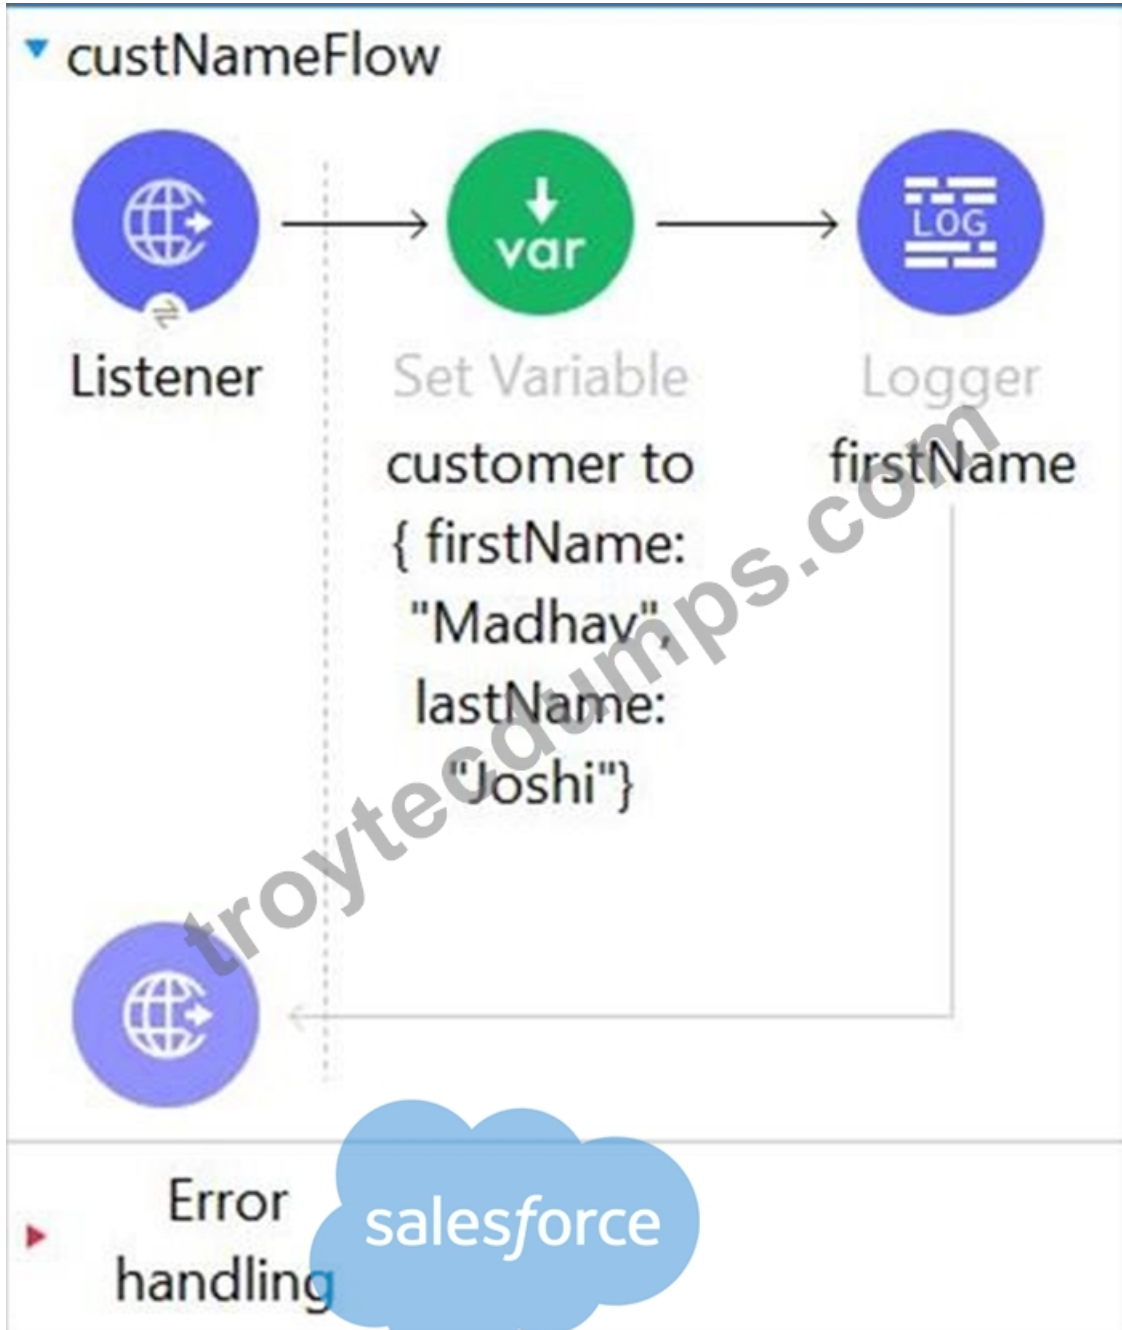

```
<flow name="custNameFlow" doc:id="bcbd3cba-7ff3-469a-a38f-026be38282ba" >
    <http:listener doc:name="Listener" config-ref="HTTP_Listener_config" path="/Log"/>
    <set-variable value='#[{ firstName:"Madhav", LastName:"Joshi"}]'
    doc:name='customer to { firstName: "Madhav", LastName: "Joshi"}' variableName="customer"/>
    <logger level="INFO" doc:name="firstName" message="??????"/>
</flow>
```

Set paylaod transformer is set the firstName and lastName of the customer as shown in below images.
What is the correct Dataweave expression which can be added in message attribute of a Logger activity to access firstName (which in this case is Madhav) from the incoming event?

- A. vars."customer"."firstName"
- B. customer.firstName

- C. vars."customer.firstName"
- D. firstName

Answer: A

Explanation:
Correct answer is vars."customer"."firstName"
Please note that you can also access firstName using this syntax vars.customer.firstName.
