Study H12-821_V1.0 Test | Exam H12-821_V1.0 Exercise

In this way, the Huawei H12-821_V1.0 certified professionals can not only validate their skills and knowledge level but also put their careers on the right track. By doing this you can achieve your career objectives. To avail of all these benefits you need to pass the H12-821_V1.0 Exam which is a difficult exam that demands firm commitment and complete H12-821_V1.0 exam questions preparation.

Huawei H12-821_V1.0 Exam is an intermediate-level certification exam that requires candidates to have a good understanding of basic networking concepts and technologies. Candidates who pass H12-821_V1.0 exam will be able to demonstrate their ability to design, deploy and manage data communication networks using Huawei's cutting-edge technologies. HCIP-Datcom-Core Technology V1.0 certification can be used to enhance career prospects and increase job opportunities for IT professionals who want to work in the field of data communication.

Huawei HCIP-Datcom-Core Technology V1.0 Sample Questions (Q150-Q155):

NEW QUESTION # 150

A wide area network (WAN) is a remote network that connects local area networks (LANs) or metropolitan area networks (MANs) in different areas for communication purposes. It is typically used to interconnect campus networks or data center networks.

- A. TRUE
- B. FALSE

Answer: A

Explanation:

Comprehensive and Detailed Step-by-Step Explanation:

* WAN Definition:

* A WAN is a large-scale network spanning a wide geographical area, connecting smaller networks such as LANs and MANs.

* Use Cases:

* WANs are commonly used for interconnecting campus networks, branch offices, and data centers over long distances.

* Correct Statement:

* The statement accurately describes the purpose and scope of WANs.

NEW QUESTION # 151

By default, VRP will automatically aggregate the routes introduced by BGP.

- A. FALSE
- B. TRUE

Answer: A

NEW QUESTION # 152

Access control lists can be classified into which types as follows?

- A. Basic ACL
- B. Advanced ACL
- C. User-defined ACL
- D. Layer 2 ACL

Answer: A,B,D

Explanation:

Access Control Lists (ACLs) can be classified into several types, including Basic ACL (filters based on source IP), Advanced ACL (filters based on multiple parameters like source and destination IP, protocol, and ports), and Layer 2 ACL (filters based on MAC addresses). User-defined ACLs are not a standard classification .

NEW QUESTION # 153

On an enterprise WLAN where Portal authentication is deployed, an AC functions as an access device and communicates with a Portal server using the Portal protocol. Which of the following statements are true about the Portal protocol?

- A. By default, the access device processes Portal protocol packets through port 2000.
- B. By default, the device uses the destination port number 50100 to proactively send packets to the Portal server.
- C. Portal protocol packets are transmitted over TCP.
- D. The HTTP or HTTPS protocol can be used as the Portal access or authentication protocol.

Answer: C,D

Explanation:

Comprehensive and Detailed Step-by-Step Explanation:

* Portal Authentication:

* Portal authentication uses a web-based mechanism where clients are redirected to a login page.

* Communication between the access device and Portal server uses HTTP or HTTPS protocols.

* Correct Statements:

* Option A: HTTP or HTTPS is used for Portal authentication.

- * Option D: Portal protocol packets are transmitted over TCP for reliable communication.
- * Incorrect Statements:
- * Option B: Port 2000 is not the default for processing Portal packets.
- * Option C: The default destination port for communication with the Portal server is not 50100.

References:

- * HCIA-Datcom Study Guide, Chapter: WLAN Portal Authentication
- Huawei WLAN Authentication Protocols

NEW QUESTION # 154

Which of the following statements about WLAN roaming are false?

- A. APs with which a STA is associated before and after roaming can work on different channels.
- **B. During roaming, the STA sends an Association Request frame containing home AP information to the foreign AP.**
- C. During roaming, the STA sends a Reassociation Request frame containing home AP information to the foreign AP.
- **D. APs with which a STA is associated before and after roaming must work on the same channel.**

Answer: B,D

Explanation:

During WLAN roaming, the STA sends a Reassociation Request frame to the foreign AP to maintain connectivity. Association frames are used during initial connections, not roaming. APs with which a STA is associated before and after roaming can work on different channels, as roaming often occurs across channels in environments like multi-SSID or multi-channel setups. Options C and D are false, as they contradict standard WLAN roaming procedures.

NEW QUESTION # 155

.....

Features of our web-based certification for HCIP-Datcom-Core Technology V1.0 (H12-821_V1.0) practice test and the desktop simulation software for Huawei H12-821_V1.0 exam questions are similar. The web-based H12-821_V1.0 practice test is supported by operating systems. It is an internet-based self-assessment test, eliminating the need for any software installation. The web-based Huawei H12-821_V1.0 Practice Exam is compatible with major browsers. Get a demo of our products, it's free to use. Upon completing the purchase, you will be able to immediately download the full version of our Test4Sure HCIP-Datcom-Core Technology V1.0 (H12-821_V1.0) practice questions product.
