**Quiz 2026 The Best SAP C\_SEC\_2405 Examcollection Dumps**

In this cut-throat competitive world of SAP, the SAP C\_SEC\_2405 certification is the most desired one. But what creates an obstacle in the way of the aspirants of the SAP C\_SEC\_2405 certificate is their failure to find up-to-date, unique, and reliable SAP Certified Associate - Security Administrator (C\_SEC\_2405) practice material to succeed in passing the SAP C\_SEC\_2405 Certification Exam. If you are one of such frustrated candidates, don't get panic. TorrentVCE declares its services in providing the real C\_SEC\_2405 PDF Questions. It ensures that you would qualify for the SAP Certified Associate - Security Administrator (C\_SEC\_2405) certification exam on the maiden strive with brilliant grades.

## SAP Certified Associate - Security Administrator Sample Questions (Q49-Q54):

### NEW QUESTION # 49

What authorization object can be used to restrict which users a security administrator is authorized to maintain?

- A. S\_USER\_GRD
- B. S\_USER\_AUTO
- C. S\_USER\_GRP
- **D. S\_USER\_SASO**

**Answer: D**

Explanation:

The authorization object S\_USER\_SASO (Security Administrator's Specific Object) is used to restrict the users that a security administrator can maintain. It ensures granular control over user maintenance activities.

SAP Security References:

- \* SAP Authorization Object Documentation
- \* SAP Note on User Administration and Maintenance

### NEW QUESTION # 50

In which order do you define the security-relevant objects in SAP BTP?

- **A. Role collection**
- **B. Role3**
- **C. Role template**

**Answer: A,B,C**

### NEW QUESTION # 51

Where can you find SAP Fiori tiles and target mappings according to segregation of duty?

- A. Assigned Technical Catalogs
- B. Assigned Spaces
- **C. Business Catalogs**
- D. Assigned Pages

**Answer: C**

Explanation:

In SAP S/4HANA, SAP Fiori tiles and target mappings relevant to segregation of duties (SoD) are found in Business Catalogs. Business Catalogs group Fiori apps, tiles, and target mappings that correspond to specific business processes or roles, ensuring that authorizations are aligned with functional requirements. These catalogs are designed to support SoD by organizing applications and their associated authorizations in a way that prevents conflicting access, such as separating financial and procurement duties. By assigning Business Catalogs to business roles, administrators can enforce SoD principles, ensuring users only access apps relevant to their responsibilities. Assigned Pages and Assigned Spaces are related to the Fiori Launchpad's user interface organization, not directly to SoD or authorization management. Assigned Technical Catalogs contain technical objects, not business-specific tiles or mappings. Business Catalogs are thus the primary mechanism for maintaining SoD-compliant access, providing a structured approach to authorization management in SAP Fiori environments, ensuring security and compliance across business processes.

### NEW QUESTION # 52

Where can you find SAP Fiori tiles and target mappings according to segregation of duty?

- A. Assigned Technical Catalogs
- **B. Assigned Business Catalogs**
- C. Assigned Spaces
- D. Assigned Pages

**Answer: B**

### NEW QUESTION # 53

Your developer has created a new custom transaction for your SAP S/4HANA on-premise system and has provided you a list of the authorizations needed to execute the new ABAP program. What must you do to ensure that each required authorization is automatically created every time this new custom transaction is added to a PFCG role?

- A. Maintain each authorization in transaction SU24 and set the Default Status to "Yes".
- B. Maintain each authorization in transaction SU22 and set the Check Indicator value to "Check".
- **C. Maintain each authorization object in transaction SU24 and set the Default Status to "Yes".**
- D. Maintain each authorization object in transaction SU22 and set the Default Status to "Yes".

**Answer: C**

Explanation:

To ensure that required authorizations for a new custom transaction in SAP S/4HANA on-premise are automatically created when the transaction is added to a PFCG role, you must maintain each authorization object in transaction SU24 and set the Default Status to "Yes". SU24 is used to define authorization defaults for transactions, specifying which authorization objects and values should be proposed when the transaction is included in a role. Setting the Default Status to "Yes" ensures that these objects are automatically included in the role's authorization data during PFCG maintenance, streamlining role creation and ensuring consistency.

Transaction SU22 is for SAP-delivered defaults, not custom transactions, making options A and B incorrect.

Option C is incorrect because SU24 maintains authorization objects, not individual authorizations. This configuration in SU24 supports efficient and secure role management, reducing manual effort and ensuring that the custom transaction's authorization requirements are consistently applied across roles, aligning with SAP's best practices for custom development.

### NEW QUESTION # 54

.....

SAP C\_SEC\_2405 certification exam is one of the most valuable certification exams. IT industry is under rapid development in the new century, the demands for IT talents are increased year by year.
