## Latest Fire-Inspector-II Braindumps Free, Fire-Inspector-II Reliable Exam Practice

Some candidates have doubt about our one-year free updates and one year service assist for buyers who purchase TestPDF Fire-Inspector-II valid exam bootcamp files. Please rest assured. We have been engaging in offering IT certificate exams materials many years and we pursue long-term development. We provide the warm and 24-hours online service for every buyer who has any question about our Fire-Inspector-II Valid Exam Bootcamp files. If we release new version for the Fire-Inspector-II exam files, we will notify buyers via email for free downloading.

## International Code Council 67 - Fire Inspector II Exam Sample Questions

## (Q74-Q79):

### NEW QUESTION # 74

What is the occupant load of a 50,000 gross square foot airport terminal concourse?

- A. 0
- **B. 2,500**
- C. 1
- D. 1,000

**Answer: B**

Explanation:

To determine the occupant load of a 50,000 gross square foot airport terminal concourse, we use the occupant load factor from 2021 IBC Table 1004.5.

Step 1: Identify the Occupant Load Factor for an Airport Concourse

According to IBC Table 1004.5, the occupant load factor for an airport terminal concourse is 20 sq. ft. per person (gross).

Step 2: Calculate the Occupant Load

$50,000 \div 20 = 2,500$  occupants  
 $\frac{50,000}{20} = 2,500$  occupants  
Reference to Fire Inspector Documentation:

1. 2021 International Building Code (IBC) - Table 1004.5 (Occupant Load Factor for Airport Concourses)

20 sq. ft. per person is assigned for airport concourses.

2. 2021 International Fire Code (IFC) - Section 1004.1.2 (Occupant Load Determination) Gross area calculations must follow the correct occupant load factor per IBC Table 1004.5.

Detailed Explanation of Answer Choices:

Option A (Incorrect): 200 is too low based on proper calculations.

Option B (Incorrect): 500 is also too low.

Option C (Incorrect): 1,000 is below the required calculation.

Option D (Correct): 2,500 is the correct calculation based on IBC Table 1004.5.

Thus, the correct and verified answer is: D. 2,500.

### NEW QUESTION # 75

Given: A local college student inquires about the use of candles in their dorm room. Candles:

- **A. may not be used.**
- B. must be kept a minimum 36 in. from combustibles.
- C. must be kept a minimum 12 in. from combustibles.
- D. may be used in a sprinklered dormitory.

**Answer: A**

Explanation:

Reference to ICC Fire Code Regulations:

According to the International Fire Code (IFC) Section 308.1.5 (2021 Edition), the use of open-flame devices, including candles, is prohibited in dormitories, sleeping rooms, and similar occupancies unless specifically approved by the fire code official.

The regulation exists to prevent fire hazards in areas with high occupant density and potentially limited egress routes.

Fire Safety Concerns in Dormitories:

Dormitories typically contain highly combustible materials such as bedding, curtains, and furniture, making them susceptible to rapid fire spread.

The presence of multiple residents in a shared living space increases the risk of fire-related casualties.

Even in sprinklered buildings, candles pose an unnecessary ignition risk that could endanger occupants before the activation of fire suppression systems.

Clarification of Incorrect Answer Choices:

B: may be used in a sprinklered dormitory # Incorrect

While fire sprinklers help control fires, they do not prevent ignition, and the prohibition still applies regardless of sprinkler systems.

C: must be kept a minimum of 12 inches from combustibles # Incorrect

This rule applies to general open-flame devices in some circumstances but does not override the outright ban on candles in dormitories.

D: must be kept a minimum of 36 inches from combustibles # Incorrect

Similar to option C, maintaining a distance from combustibles does not exempt candles from being prohibited in dormitory settings.

Conclusion:

The correct and verified answer is A (Candles may not be used) based on the International Fire Code (IFC) Section 308.1.5, ensuring fire safety compliance in dormitory settings.

#### NEW QUESTION # 76

The maximum travel distance permitted in a one-story, Group F-2 building equipped with automatic sprinklers and automatic smoke and heat roof vents is \_\_\_ ft.

- A. 0
- B. 1
- C. 2
- D. 3

**Answer: A**

Explanation:

The maximum travel distance allowed in a one-story Group F-2 (Factory Industrial - Low Hazard) occupancy with automatic sprinklers and automatic smoke and heat vents is regulated by 2021 International Fire Code (IFC) Table 1017.2 - Exit Access Travel Distance.

IFC Table 1017.2 - Maximum Travel Distance:

For a Group F-2 occupancy equipped with an automatic sprinkler system, the maximum allowable exit access travel distance is 400 feet.

However, when automatic smoke and heat vents are installed, the travel distance is limited to 350 feet.

This is because while the sprinklers control fire spread, smoke and heat vents help with smoke control, allowing for extended egress distances but not as much as without them.

Why Other Options Are Incorrect?

A: 250 ft. - Too restrictive; the IFC allows a longer travel distance in this scenario.

B: 300 ft. - Less than the allowed 350 ft.

D: 400 ft. - Only applicable without smoke and heat vents.

#### NEW QUESTION # 77

The maximum quantity of liquefied petroleum gas (LP-gas) in containers stored by a dealer awaiting resale, and are at one location in a building that is not accessible to the public, is \_\_\_ lb. water capacity.

- A. 0
- B. 2,000
- C. 2,500
- D. 1,000

**Answer: B**

Explanation:

The storage of liquefied petroleum gas (LP-gas) in containers by dealers awaiting resale is regulated by the 2021 International Fire Code (IFC), Section 6109 - Storage of Portable LP-Gas Containers.

IFC 6109.11 - Storage Within Buildings Not Accessible to the Public:

"Storage of LP-gas containers in buildings that are not accessible to the public shall be limited to a maximum aggregate quantity of 2,000 pounds water capacity at one location." Why Other Options Are Incorrect?

A: 735 lb. - Too low; the maximum allowed is 2,000 lb.

B: 1,000 lb. - Incorrect; IFC allows up to 2,000 lb.

D: 2,500 lb. - Exceeds the 2,000 lb. maximum permitted storage quantity.

#### NEW QUESTION # 78

In the fire code, ABS plastics are designated as \_\_\_ plastic materials.

- A. Group B
- B. Group A
- C. Group C

- D. Commodity Class III

**Answer: B**

Explanation:

IFC Section 2303.7 classifies ABS (acrylonitrile butadiene styrene) plastics as Group A (high-hazard) due to their flammability and smoke production, per NFPA 13. Options B and C are less hazardous, D is a commodity class, not a plastic group. Thus, A is correct.

Reference: IFC 2021, Section 2303.7, NFPA 13.

## NEW QUESTION # 79

.....

It is very normal to be afraid of the exam, especially such difficult exam like Fire-Inspector-II exam. We know that encouragement alone cannot really improve your confidence in exam, so we provide the most practical and effective test software to help you pass the Fire-Inspector-II Exam. You can use our samples first to experience the effect of our software, and we believe that you can realize our profession and efforts by researching and developing Fire-Inspector-II exam software from samples of Fire-Inspector-II.

**Latest Fire-Inspector-II Braindumps Free:** <https://www.testpdf.com/Fire-Inspector-II-exam-braindumps.html>

All above, you must fully understand our Latest Fire-Inspector-II Braindumps Free - 67 - Fire Inspector II Exam exam dump file, International Code Council Valid Fire-Inspector-II Test Notes. The social environment is changing with higher requirements and qualifications towards humans' abilities like us, so everyone is trying hard to improve their educational background and personal ability as well as being longing to obtain a series of professional certificates. Like the real exam, TestPDF International Code Council Fire-Inspector-II exam dumps not only contain all questions that may appear in the actual exam, also the SOFT version of the dumps comprehensively simulates the real exam.

None of it flies, unless I throw it, but these pieces of technology Latest Fire-Inspector-II Braindumps Free do have a certain charm, Mobile Content: If in Doubt, Leave It Out, All above, you must fully understand our 67 - Fire Inspector II Exam exam dump file.

## Pass Guaranteed Fire-Inspector-II - Efficient Valid 67 - Fire Inspector II Exam Test Notes

The social environment is changing with higher Fire-Inspector-II requirements and qualifications towards humans' abilities like us, so everyone is trying hard to improve their educational background and Latest Fire-Inspector-II Braindumps Free personal ability as well as being longing to obtain a series of professional certificates.

Like the real exam, TestPDF International Code Council Fire-Inspector-II exam dumps not only contain all questions that may appear in the actual exam, also the SOFT version of the dumps comprehensively simulates the real exam.

To do this, you just need to enroll in the Fire-Inspector-II examination and start preparation with top-notch and updated International Code Council Fire-Inspector-II actual exam dumps, Let us put a pair of wings on your dream.
