## Real FCP\_FMG\_AD-7.4 Exam Answers | FCP\_FMG\_AD-7.4 Valid Real Test

This updated FCP\_FMG\_AD-7.4 exam study material consists of FCP\_FMG\_AD-7.4 PDF dumps, desktop practice exam software, and a web-based practice test. Experts have prepared the FCP\_FMG\_AD-7.4 desktop-based exam simulation software. There are FCP\_FMG\_AD-7.4 Actual Questions in the practice test to give you an exact impression of the Fortinet FCP\_FMG\_AD-7.4 original test.

### Fortinet FCP - FortiManager 7.4 Administrator Sample Questions (Q53-Q58):

#### NEW QUESTION # 53

You are moving managed FortiGate devices from one ADOM to a new ADOM.  
Which statement correctly describes the expected result?

- A. The shared policy package will not be moved to the new ADOM automatically.
- B. Policy packages will be imported into the new ADOM automatically.
- C. Any unused objects from a previous ADOM are moved to the new ADOM automatically.
- D. The shared device settings will be installed automatically.

**Answer: A**

#### NEW QUESTION # 54

An administrator created a new ADOM named Training for FortiGate devices only, and added the root FortiGate device of a Security Fabric group to the Training ADOM.

Given the administrator's actions, which statement correctly describes the expected result for the downstream devices in the Security Fabric?

- A. The downstream devices are automatically authorized.
- B. The downstream devices must be added using the Add Device wizard.
- C. The downstream devices will appear in the root ADOM.
- D. The downstream devices show as unauthorized in the Training ADOM

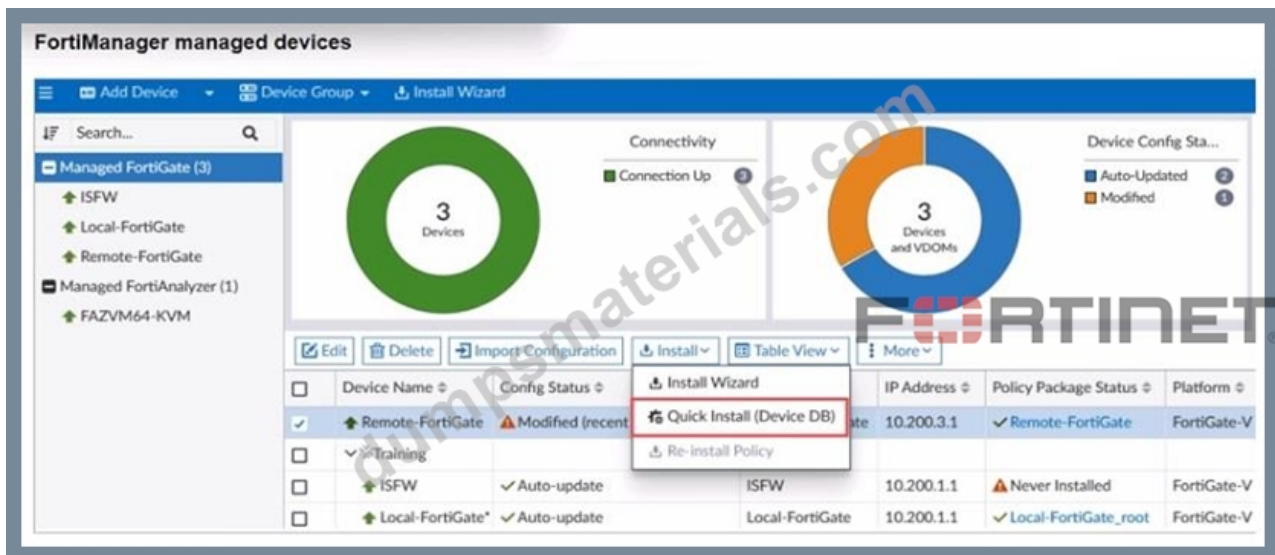

**Answer: D**

Explanation:

When a root FortiGate device is added to a specific ADOM (like Training), the downstream devices (those that are part of the Security Fabric) will not automatically be authorized in that ADOM. They will typically appear as unauthorized until explicitly authorized by an administrator.

#### NEW QUESTION # 55

Refer to the exhibit.

You are using the Quick Install option to install configuration changes on the managed FortiGate.  
Which two statements correctly describe the result? (Choose two.)

- A. It provides the option to preview only the policy package changes before installing them.
- B. It installs provisioning template changes on the FortiGate device.
- C. It installs device-level changes on the FortiGate device without launching the Install Wizard
- D. It installs all the changes in the device database first and the administrator must reinstall the changes on the FortiGate device.

**Answer: A,C**

Explanation:

\* Option B: It provides the option to preview only the policy package changes before installing them. This is correct. The Quick Install option in FortiManager provides a preview of policy changes before they are applied, allowing administrators to review and confirm the changes.

\* Option D: It installs device-level changes on the FortiGate device without launching the Install Wizard. This is correct. Quick Install allows for the immediate installation of device-level changes, such as interface or routing configurations, directly onto the FortiGate without going through the full Install Wizard.

Explanation of Incorrect Options:

\* Option A: It installs provisioning template changes on the FortiGate device is incorrect because Quick Install does not specifically deal with provisioning templates.

\* Option C: It installs all the changes in the device database first and the administrator must reinstall the changes on the FortiGate device is incorrect because Quick Install directly applies changes to the FortiGate device, not requiring a separate reinstall step.

FortiManager References:

\* Refer to "FortiManager Administration Guide" for details on "Quick Install" functionality under "Device Management."

#### NEW QUESTION # 56

Which two items are included in the FortiManager backup? (Choose two.)

- A. FortiGuard database
- B. Firmware images
- C. Flash configuration
- D. All devices

**Answer: C,D**

#### NEW QUESTION # 57

An administrator has enabled Service Access on FortiManager. What is the purpose of Service Access on the FortiManager interface?

- A. It allows administrative access to FortiManager.
- B. It allows third-party applications to gain read/write access to FortiManager.
- **C. It allows FortiManager to respond to requests for FortiGuard services from FortiGate devices.**
- D. It allows FortiManager to determine the connection status of managed devices.

**Answer: C**

Explanation:

\* Option B: It allows FortiManager to respond to requests for FortiGuard services from FortiGate devices. This is the correct answer. When Service Access is enabled on FortiManager, it allows FortiManager to act as a local FortiGuard server for the managed FortiGate devices. This enables the FortiManager to respond to requests for FortiGuard services, such as updates for antivirus, web filtering, and other security services.

Explanation of Incorrect Options:

\* Option A: It allows administrative access to FortiManager is incorrect because Service Access is specifically for FortiGuard service communication, not for administrative access.

\* Option C: It allows third-party applications to gain read/write access to FortiManager is incorrect because Service Access does not provide API or third-party access capabilities.

\* Option D: It allows FortiManager to determine the connection status of managed devices is incorrect because Service Access does not directly manage or check connectivity status of devices; it is used for FortiGuard service requests.

FortiManager References:

\* Refer to the "FortiManager Administration Guide," particularly the sections on "Service Access Settings" and "FortiGuard Services."

## NEW QUESTION # 58

.....

Thousands of FCP - FortiManager 7.4 Administrator exam aspirants have already passed their Fortinet FCP\_FMG\_AD-7.4 certification exam and they all got help from top-notch and easy-to-use Fortinet FCP\_FMG\_AD-7.4 Exam Questions.
