Vce Fortinet NSE7_CDS_AR-7.6 Format - NSE7_CDS_AR-7.6 Exam Reference

It is believed that employers nowadays are more open to learn new knowledge, as they realize that Fortinet certification may be conducive to them in refreshing their life, especially in their career arena. A professional Fortinet certification serves as the most powerful way for you to show your professional knowledge and skills. For those who are struggling for promotion or better job, they should figure out what kind of NSE7_CDS_AR-7.6 Test Guide is most suitable for them. However, some employers are hesitating to choose. With our high-accuracy NSE7_CDS_AR-7.6 test guide, our candidates can grasp the key points, and become sophisticated with the exam content. You only need to spend 20-30 hours practicing with our Fortinet NSE 7 - Public Cloud Security 7.6 Architect learn tool, passing the exam would be a piece of cake.

Fortinet NSE 7 - Public Cloud Security 7.6 Architect Sample Questions (Q73-Q78):

NEW QUESTION # 73

What are two main features in Amazon Web Services (AWS) network access control lists (NACLs)? (Choose two.)

- A. You cannot use NACLs and Security Groups at the same time.
- B. NACLs are tied to an instance.
- C. The default NACL is configured to allow all traffic.
- D. NACLs are stateless, and inbound and outbound rules are used for traffic filtering.

Answer: C,D

Explanation:

The default NACL in AWS allows all inbound and outbound traffic until modified.

NACLs are stateless, meaning both inbound and outbound rules must be defined to allow return traffic.

NACLs apply at the subnet level, not tied to individual instances, and they can be used together with Security Groups.

NEW QUESTION # 74

An administrator decides to use the Use managed identity option on the FortiGate SDN connector with Microsoft Azure. However, the SDN connector is failing on the connection. What must the administrator do to correct this issue?

- A. Make sure to add the Client Secret on the FortiGate side of the configuration.
- B. Make sure to set the type to system managed identity on FortiGate SDN connector settings.
- C. Make sure to add the Tenant ID on the FortiGate side of the configuration.
- D. Make sure to enable the system-assigned managed identity on Azure.

Answer: D

NEW QUESTION # 75

As part of your organization's monitoring plan, you have been tasked with obtaining and analyzing detailed information about the traffic sourced at one of your FortiGate EC2 instances.

What can you do to achieve this goal?

- A. Create a virtual public cloud (VPC) flow log at the network interface level for the EC2 instance.
- B. Configure a network access analyzer scope with the EC2 instance as a match finding.
- C. Add the EC2 instance as a target in CloudWatch to collect its traffic logs.
- D. Use AWS CloudTrail to capture and then examine traffic from the EC2 instance.

Answer: A

Explanation:

VPC Flow Logs are designed to capture metadata about IP traffic to and from network interfaces in a VPC, including those attached to EC2 instances such as FortiGate appliances.

Creating a flow log at the network interface level for the FortiGate EC2 instance lets you collect detailed information (source/destination IPs, ports, protocol, action, bytes, etc.) for all traffic sourced from and going to that instance, which you can then analyze in CloudWatch Logs or S3.

NEW QUESTION # 76

Refer to the exhibit. After analyzing the native monitoring tools available in Azure, an administrator decides to use the tool displayed in the exhibit.

Why would an administrator choose this tool?

The screenshot displays the Azure Network Watcher 'Connection monitor' interface. At the top, there's a search bar and buttons for 'Create', 'Refresh', and 'Feedback'. Below this, a navigation pane on the left lists various monitoring tools. The main area shows a summary of connection monitor status with icons for Fail (1 out of 2), Warning (0 out of 2), Indeterminate (1 out of 2), Not running (0 out of 2), and Pass (0 out of 2). A table below lists the connection monitors: 'DemoNetwork' and 'DemoNetworkMonitoring'. The 'demo' connection monitor is selected, showing details for 'DemoNetwork' and 'DemoNetworkMonitoring'.

- A. To compare the latency of an on-premises site with the latency of an Azure application.
- B. To obtain, and later examine, traffic flow data with a visualization tool.
- C. To help debug issues affecting virtual network gateways.
- D. To view details about Azure resources and their relationships across multiple regions.

Answer: A

Explanation:

The exhibit shows Azure Network Watcher - Connection Monitor, which is used to track and measure connectivity and latency between on-premises environments, Azure applications, and across Azure regions. An administrator would choose this tool to compare the latency of an on-premises site with the latency of an Azure-hosted application and troubleshoot connectivity issues.

NEW QUESTION # 77

Your administrator instructed you to deploy an Azure vWAN solution to create a connection between the main company site and branch sites to the other company VNETs.

What is the best connection solution available between your company headquarters, branch sites, and the Azure vWAN hub?

- A. GRE tunnels
- B. ExpressRoute
- C. An L2TP connection
- D. SSL VPN connections

Answer: B

Explanation:

The best solution for connecting headquarters, branch sites, and Azure vWAN hubs is ExpressRoute, as it provides a private, reliable, and high-bandwidth connection directly into Azure, unlike VPN-based solutions such as L2TP, GRE, or SSL VPN.

NEW QUESTION # 78

.....

The actual Fortinet NSE 7 - Public Cloud Security 7.6 Architect (NSE7_CDS_AR-7.6) certification exam has quite high registration fees, so passing the NSE7_CDS_AR-7.6 exam in one attempt becomes mandatory. TestKingFree provides a free NSE7_CDS_AR-7.6 exam dumps demo so customers can see the product's features before purchasing. This offers comprehensive NSE7_CDS_AR-7.6 practice test questions that cover all the topics students need to cover to crack the Fortinet NSE7_CDS_AR-7.6 test. Moreover, This also offers up to 1 year of free NSE7_CDS_AR-7.6 questions updates. By using our real Fortinet NSE 7 - Public Cloud Security 7.6 Architect (NSE7_CDS_AR-7.6) dumps, it is guaranteed that the candidate passes in one attempt, so our product saves time and money.

Vce NSE7_CDS_AR-7.6 Format: https://www.testkingfree.com/Fortinet/NSE7_CDS_AR-7.6-practice-exam-dumps.html

The content of NSE7_CDS_AR-7.6 study materials is absolutely rich, You can receive the latest version for one year for free if you choose NSE7_CDS_AR-7.6 exam dumps of us, and the update version will be sent to your email automatically, Fortinet NSE7_CDS_AR-7.6 New Real Exam Excellent Exam Dumps For a Diverse Range Of Certification Exams, Our Fortinet NSE7_CDS_AR-7.6 training materials are popular in the market, which have met warm reception and quick sale all over the world owing to the world-class quality and reasonable price of NSE7_CDS_AR-7.6 exam braindumps materials.

But if you get a bad result in the NSE7_CDS_AR-7.6 test exam we promise you to full refund, or you can change to other test braindump, Our products are just suitable for you.
