Google Chrome-Enterprise-Administrator Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Manage Chrome Enterprise in the Cloud: This section of the exam measures skills of a Cloud Systems Administrator and focuses on preparing and configuring environments for Chrome cloud management. Candidates must demonstrate how to verify domains, use admin roles, configure organizational structures, deploy enrollment tokens, enable reporting, and maintain Chrome using the Google Admin console.
Topic 2	<ul style="list-style-type: none">Chrome Extensions: This section of the exam measures skills of an Endpoint Security Manager and involves managing Chrome extension policies. It includes designing extension management strategies, handling extension exemptions, creating approval workflows, and assessing extensions for their risk and compliance with business continuity requirements.
Topic 3	<ul style="list-style-type: none">Chrome Enterprise Management Fundamentals: This section of the exam measures skills of a Chrome Device Administrator and covers the foundational elements of managing Chrome in an enterprise. It includes understanding how policies are applied and resolved, differentiating managed browsers from profiles, and describing how policies work. It also covers Chrome's built-in security features, how extensions are used and deployed, and how the release cycle and channels are managed.
Topic 4	<ul style="list-style-type: none">Analyze Chrome Data: This section of the exam measures skills of a Chrome Data Analyst and focuses on using the Google Admin console to view, analyze, and troubleshoot browser data. It includes reviewing reports, diagnosing browser or update issues, investigating performance problems, and identifying security risks based on log events and Chrome activity.
Topic 5	<ul style="list-style-type: none">Chrome Updates: This section of the exam measures skills of a Chrome IT Policy Analyst and addresses the various update methods available for Chrome. It includes selecting the right update strategy for different business and security needs, managing compliance across platforms, and adapting update methods based on environmental changes or risks.

Itcertking Professional Chrome Enterprise Administrator Certification Exam (Chrome-Enterprise-Administrator) dumps give surety to confidently pass the Professional Chrome Enterprise Administrator Certification Exam (Chrome-Enterprise-Administrator) exam on the first attempt.

Google Professional Chrome Enterprise Administrator Certification Exam Sample Questions (Q32-Q37):

NEW QUESTION # 32

The security team requires Chrome to be updated on computers that only have intranet access with no available internet connectivity. These computers cannot be restarted, and Chrome is not updating.

How can Chrome be updated?

- A. Use force relaunch after period
- B. Use a target version
- C. Run auto-update.
- D. Run the Chrome installer

Answer: D

Explanation:

For machines with no internet connectivity, automatic updates will not work. The only way to update Chrome in this scenario is to manually run the Chrome installer with an updated version obtained through an alternative method (e.g., downloaded on a connected machine and transferred). Auto-update requires internet access, setting a target version only dictates the desired version for automatic updates, and force relaunch requires an update to be downloaded first.

NEW QUESTION # 33

The browser administrators at a company have configured the following extension policies:

Policy Name | Policy Value

----- | -----
ExtensionInstallAllowlist | ["lpbdmphpcndhhacbfcgbdmnoffaeppiici",
"ghagpmigkmndpbjkmlolikibogeofcm", "enebfjpjnlbicamdnfnflaapucdmgkj",
"hlpkimhnadcdidjaejaegpeeikllochd", "bnpillbeanipnjdkniahniegbcobanno"] ExtensionInstallBlocklist | []
ExtensionInstallForceList | ["ghagpmigkmndpbjkmlolikibogeofcm:https://clients2.google.com/service/update2/crx", "ufniribicajhgibfhjcgnimlmdhccodfl:https://clients2.google.com/service/update2/crx",
"hlpkimhnadcdidjaejaegpeeikllochd:https://clients2.google.com/service/update2/crx"]

An employee at the company wants to install an extension from the Chrome Web Store called "Grammar Friend" with the extension ID 'ufniribicajhgibfhjcgnimlmdhccodfl'. What will happen when the user goes to the Grammar Friend page in the Chrome Web Store?

- A. A red banner that says "Your administrator has blocked this item (ID ufniribicajhgibfhjcgnimlmdhccodfl)" will appear, and the "Add to Chrome" button will be grayed out.
- B. The "Add to Chrome" button will be available to click, and the user can install the extension.
- C. A blue banner that says "This item's installation is required by your organization" will appear, and the "Remove from Chrome" button will be grayed out.
- D. The "Remove from Chrome" button will be available because the extension is already installed.

Answer: C

Explanation:

The extension ID 'ufniribicajhgibfhjcgnimlmdhccodfl' is present in the 'ExtensionInstallForceList'.

Extensions in this list are automatically installed and cannot be removed by the user. Therefore, when the user visits the Chrome Web Store page for "Grammar Friend," they will see a blue banner indicating that the extension is required by their organization, and the

"Remove from Chrome" button will be disabled. The "Add to Chrome" button will not be clickable in the standard way because it's already being force-installed.

NEW QUESTION # 34

An organization using Chrome browser on Windows has policies from group policy and Chrome Enterprise Core. In what order are the policies applied?

- A. From least restrictive to most restrictive
- B. Group policy takes precedence
- **C. By the precedence hierarchy**
- D. Cloud policy takes precedence

Answer: C

Explanation:

When both Group Policy (local machine policy) and Chrome Enterprise Core (cloud policy) are configured on a Windows device, the effective policy is determined by a defined order of precedence. Generally, cloud policies for managed browsers will override conflicting local policies. The specific precedence order is configurable, but it follows a hierarchical structure where certain policy sources take priority over others.

Options C and D present a simplified view that might not always be the case depending on the configuration.

Option B is a general principle of conflict resolution but doesn't describe the specific order in Chrome policy application.

NEW QUESTION # 35

Which option is a security event that Google Chrome captures?

- A. Unauthorized file downloads
- **B. Malware detection**
- C. Password complexity
- D. User inactivity

Answer: B

Explanation:

Chrome's Safe Browsing feature actively scans web pages, downloads, and extensions for known malware.

When malware is detected, it is reported as a security event. While unauthorized file downloads could be a consequence of a security issue, Chrome's direct detection focuses on the malware itself. Password complexity is a setting for password management, and user inactivity is a system or application-level event, not a direct security event captured by Chrome in the same way as malware detection.

NEW QUESTION # 36

Which data point is available in the Chrome Versions report¹?

- **A. Active Browsers**
- B. Total Browsers
- C. Last update
- D. Inactive Browsers

Answer: A

Explanation:

The Chrome Versions report specifically focuses on the distribution of different Chrome browser versions across the managed fleet. A key data point in this report is the number of "Active Browsers" on each version, allowing administrators to understand their update status and identify any significant fragmentation. While

"Total Browsers" might be a related metric, the core focus of the "Versions" report is on the active instances and their respective versions. Information on "Inactive Browsers" or the "Last update" time for individual browsers might be found in other reports.

NEW QUESTION # 37

Our Google Chrome-Enterprise-Administrator exam prep is renowned for free renewal in the whole year. As you have experienced various kinds of exams, you must have realized that renewal is invaluable to study materials, especially to such important Professional Chrome Enterprise Administrator Certification Exam Chrome-Enterprise-Administrator Exams.
