

Cisco 300-540 Test Certification Cost, 300-540 Guaranteed Success

300-540 Exam Detail	
Vendor	Cisco
Exam Code	300-540
Full Exam Name	Designing and Implementing Cisco Service Provider Cloud Network Infrastructure
Number of Questions	55-65
Sample Questions	Cisco 300-540 Sample Questions
Practice Exams	Cisco Certified Specialist Service Provider Cloud Network Infrastructure Practice Test
Passing Score	Variable (750-850 / 1000 Approx.)
Time Limit	90 minutes
Languages	English

100% Guaranteed Success with NWExam.com

What's more, part of that Actual4Dumps 300-540 dumps now are free: https://drive.google.com/open?id=1CjlfYReSZErDXCRJc8_Ys0n0xiVGvt16

As is known to us, the quality is an essential standard for a lot of people consuming movements, and the high quality of the 300-540 study materials is always reflected in the efficiency. We are glad to tell you that the 300-540 study materials from our company have a high quality and efficiency. If you decide to choose our study materials as you first study tool, it will be very possible for you to pass the 300-540 Exam successfully, and then you will get the related certification in a short time.

If you are a new comer for our 300-540 practice engine, you may doubt a lot on the quality, the pass rate, the accuracy and so on. You can go for the free demos of the 300-540 learning braindumps and make sure that the quality of our 300-540 Exam Questions And Answers which can serve you the best. You are not required to pay any amount or getting registered with us for downloading free demos of our 300-540 training guide. They are all free for you to download.

Cisco 300-540 Questions Tips To Pass Exam [2026]

Don't waste time, buy the latest 300-540 pdf questions and practice tests from Actual4Dumps and get successful. You can free download the demo of any format of Cisco 300-540 test questions before purchase. You can claim a refund if you don't pass the Cisco 300-540 Certification Exam after using these actual Cisco 300-540 exam dumps.

Cisco 300-540 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Service Assurance and Optimization: This section of the exam measures the skills of Cloud Operations Engineers and covers assurance mechanisms used to maintain performance, stability, and visibility across NFVI environments. It includes network assurance concepts such as MANO frameworks, VNF workload monitoring, VIM control plane KPIs, and streaming telemetry with gRPC and gNMI. Candidates must understand cloud infrastructure performance monitoring tools, including SR-PM, NetFlow, IPFIX, syslog, SNMP traps, RMON, cloud agents, and automated fault management systems. The domain also touches on diagnosing NFVI-related errors and optimizing VNFs using techniques such as SR-IOV and software-accelerated virtual switching technologies like DPDK and VPP.

Topic 2	<ul style="list-style-type: none"> • High Availability: This section of the exam measures the skills of Cloud Infrastructure Architects and covers the design and implementation of redundancy and resiliency mechanisms in virtualized network functions and distributed cloud platforms. It includes data plane redundancy for VNFs, high availability within a single VIM control plane, and resilient compute, vNIC, and top-of-rack switching. The exam requires an understanding of multi-homing, EVLAG configurations, virtual private cloud deployment, and ECMP strategies for NFVI integrations with physical routing protocols such as BGP, OSPF, and IS-IS. Candidates must also recommend suitable high-availability models involving DNS, routing, and load balancing.
Topic 3	<ul style="list-style-type: none"> • Virtualized Architecture: This section of the exam measures the skills of Cloud Network Engineers and covers the foundational concepts of virtualized infrastructures used in modern service provider and cloud environments. Candidates are expected to understand constraints in IaaS designs, determine appropriate cloud service models, and demonstrate awareness of container orchestration compared to traditional virtual machines. The exam also evaluates the ability to implement key virtualization functions such as NFV, VNF, NSO, and virtualized Cisco platforms. Learners must be able to deploy NFV with automation tools, manage VNF onboarding, work with NSO-driven orchestration, and use protocols like NETCONF, RESTCONF, REST APIs, and gNMI within automated cloud ecosystems. A general understanding of supporting platforms such as OpenStack also forms part of the required knowledge in this domain.
Topic 4	<ul style="list-style-type: none"> • Cloud Interconnect: This section of the exam measures the skills of Service Provider Network Engineers and covers how large networks interconnect with cloud platforms and carrier-neutral facilities. Candidates are expected to understand various connectivity options to cloud providers, customer sites, and other neutral facilities, as well as evaluate WAN connectivity models such as direct connect, MPLS or segment routing, and IPsec VPN links. The domain also includes the ability to troubleshoot advanced data center interconnect solutions, including EVPN VXLAN, EVPN over SR • MPLS, ACI-based connectivity, and pseudowire architectures supporting cloud-to-cloud and cloud-to-edge communication.
Topic 5	<ul style="list-style-type: none"> • Security: This section of the exam measures the skills of Network Security Engineers and covers the implementation of infrastructure-level protection in cloud and NFVI ecosystems. It includes topics such as ACLs, uRPF, RTBH, router hardening, BGP flowspec, TACACS, and MACSEC. Candidates should understand DoS mitigation methods and apply security practices within NFVI, focusing on API protection, securing the control and management plane, and segmentation strategies in service provider cloud environments. The domain also evaluates basic knowledge of TLS, mTLS, and general cloud security solutions related to DNS protection, zero-day defenses, and malware detection.

Cisco Designing and Implementing Cisco Service Provider Cloud Network Infrastructure Sample Questions (Q19-Q24):

NEW QUESTION # 19

VNF workload optimization often involves:

- A. Utilizing technologies like SR-IOV for performance
- B. Ignoring software acceleration
- C. Decreasing virtualization
- D. Increasing physical network functions

Answer: A

NEW QUESTION # 20

The primary benefit of MACSEC is:

- A. Encrypting frames on a network
- B. Filtering traffic based on content
- C. Increasing the speed of network devices
- D. Authenticating users accessing the network

Answer: A

NEW QUESTION # 21

EVPN over SR/MPLS can solve which of the following issues?

- A. Inability to use public internet for private connectivity
- **B. Lack of multicast support in traditional networks**
- **C. The need for manual route configuration in large networks**
- D. High costs associated with physical cabling

Answer: B,C

NEW QUESTION # 22

The primary purpose of container orchestration tools like Kubernetes is to:

- A. Decrease the scalability of applications
- **B. Manage the lifecycle of containers**
- C. Manage physical server allocations
- D. Increase manual intervention in container management

Answer: B

NEW QUESTION # 23

Troubleshooting ACI involves understanding:

- A. Basic routing protocols only
- B. Only the physical layer of the network
- C. The brand of hardware being used
- **D. The application-centric policies and their impact on network behavior**

Answer: D

NEW QUESTION # 24

.....

If you are preparing for the Designing and Implementing Cisco Service Provider Cloud Network Infrastructure (300-540) exam dumps our 300-540 Questions help you to get high scores in your Designing and Implementing Cisco Service Provider Cloud Network Infrastructure (300-540) exam. Test your knowledge of the Designing and Implementing Cisco Service Provider Cloud Network Infrastructure (300-540) exam dumps with Actual4Dumps Designing and Implementing Cisco Service Provider Cloud Network Infrastructure (300-540) practice questions. The software is designed to help with Designing and Implementing Cisco Service Provider Cloud Network Infrastructure (300-540) exam dumps preparation. Designing and Implementing Cisco Service Provider Cloud Network Infrastructure (300-540) practice test software can be used on devices that range from mobile devices to desktop computers.
