Associate-Google-Workspace-Administrator Valid Exam Tips | Associate-Google-Workspace-Administrator Reliable Braindumps Files

Of course, when we review a qualifying exam, we can't be closed-door. We should pay attention to the new policies and information related to the test Associate-Google-Workspace-Administrator certification. For the convenience of the users, the Associate-Google-Workspace-Administrator test materials will be updated on the homepage and timely update the information related to the qualification examination. As a result, the Associate-Google-Workspace-Administrator Test Prep can help users to spend the least time, know the test information directly, let users save time and used their time in learning the new hot spot concerning about the knowledge content.

Google Associate Google Workspace Administrator Sample Questions (Q13-Q18):

NEW QUESTION # 13
Your organization has a Shared Drive with 150 users organized as a group. All users of the group need to be able to add and edit files, but the ability to move, delete, and share content must be limited to a single user. You need to configure the shared drive to meet these requirements efficiently. What should you do?

- A. In the Admin console, assign Contributor access for the shared drive to each user. Assign Content Manager access for the

shared drive to the single user.
- B. Create a folder inside the shared drive. Share the files with the group by using the share function.
- C. Create a folder inside the shared drive. Share the folder link with the group.
- D. In the Admin console, assign Contributor access for the shared drive to the group. Assign Content Manager access for the shared drive to the single user.

Answer: D

Explanation:
By assigning Contributor access to the group, all 150 users will be able to add and edit files in the shared drive. Assigning Content Manager access to the single user ensures that only that person has the ability to move, delete, and share content within the shared drive. This approach efficiently meets the requirement of limiting certain administrative privileges while allowing the group to collaborate on content.

NEW QUESTION # 14
An employee at your organization may be sharing confidential documents with unauthorized external parties. You must quickly determine if any sensitive information has been leaked. What should you do?

- A. Audit Drive access by using the Admin SDK Reports API.
- B. Review the employee's Drive log events in the security investigation tool.
- C. Create a custom report of the user's external sharing by using the security dashboard.
- D. Review the employee's user log events within the security investigation tool.

Answer: B

Explanation:
To quickly determine if an employee has shared confidential documents externally, you should utilize the security investigation tool in the Google Admin console and specifically review the Drive log events associated with that employee's account. This tool provides a centralized place to audit user activity related to Google Drive, including sharing actions.

NEW QUESTION # 15
Your organization wants to ensure that all employees who use Chrome browsers for work adhere to specific security and configuration settings. You need to manage and control the Chrome browsers used within the company while using the least expensive solution. What should you do?

- A. Disable all extensions on employee Chrome browsers to prevent any potential security risks.
- B. Use a third-party software deployment solution to manage the Chrome browser.
- C. Remotely wipe all employee devices to ensure that they are using the latest Chrome browser version.
- D. Enroll the Chrome browsers in your organization's domain and apply Chrome browser policies.

Answer: D

Explanation:
Google Workspace (specifically Chrome Enterprise Core, which is often included or available for free with Google Workspace editions) provides built-in capabilities to manage Chrome browsers across an organization. By enrolling Chrome browsers in your domain, you can apply policies centrally from the Google Admin console, controlling security settings, extensions, updates, and more. This is a first-party, cloud-based solution that doesn't require additional software or licensing costs beyond your existing Google Workspace subscription, making it the "least expensive solution." Here's why the other options are less suitable for managing Chrome browsers with the least expense:
A . Use a third-party software deployment solution to manage the Chrome browser. While possible, this would incur additional costs for the third-party software, its licensing, and potentially its maintenance. Google Workspace offers native browser management, so a third-party solution is not the "least expensive." B . Remotely wipe all employee devices to ensure that they are using the latest Chrome browser version. Remotely wiping devices is a drastic and disruptive measure, typically used for lost/stolen devices or offboarding. It's not a standard or appropriate method for managing browser versions or applying configuration settings. It would also be highly expensive in terms of lost productivity and IT effort.
D . Disable all extensions on employee Chrome browsers to prevent any potential security risks. While disabling extensions can mitigate some risks, it's an overly broad and potentially disruptive action that could hinder employee productivity if legitimate and necessary extensions are disabled. More importantly, it's just one potential policy you might apply, not the method for managing the browsers centrally and cost-effectively. Chrome browser policies allow for granular control, including allowing/blocking specific

extensions.
Reference from Google Workspace Administrator:
Set Chrome policies for users or browsers: This is the key administrative function that allows you to manage Chrome browsers. It describes how to apply policies to Chrome browsers enrolled in your organization's domain.
Reference:
Chrome Enterprise Core: This outlines the free cloud-based management features available for Chrome browsers, which are often integrated with Google Workspace. It explicitly states that "cloud-based management and reporting for $0" are available with Chrome Enterprise Core.
Maximizing Google Chrome Management in Google Workspace: This article further emphasizes that "the basic policies for Google Chrome management are available for free with Google Workspace." By leveraging the built-in Chrome browser management capabilities within the Google Workspace Admin console, organizations can centrally control Chrome settings and security with no additional software cost, fitting the "least expensive solution" requirement.

NEW QUESTION # 16
You need to ensure that data owned by former employees remains available in Google Vault.
You want to use the most cost-effective solution.
What should you do?

- A. Migrate the former employees' Gmail to their manager(s) by using the data migration service during the deletion process. Transfer the former employees' Google Drive files to a new owner.
- B. Assign an Archived User license to the former employees' Google accounts.
- C. Change the Google account passwords of the former employees.
- D. Suspend the former employees' Google accounts. Create an organizational unit (OU). Move the former employees into that OU.

Answer: D

Explanation:
Suspending the accounts of former employees while moving them to a dedicated organizational unit (OU) ensures that their data remains in Google Vault and accessible without the need for additional licenses. This is a cost-effective solution because suspending the account keeps the data intact but prevents the employees from accessing their accounts.

NEW QUESTION # 17
Your organization acquired a small agency. You need to create user accounts for these new employees. The new users must be able to use their new organization's email address and their email address with the sub-agency domain name. What should you do?

- A. Set up the acquired agency as a secondary domain and swap it to the primary domain.
- B. Set up the acquired agency as a secondary domain from the Manage domains page.
- C. Redirect the acquired domain to Google's MX records and add the account as a "send as" address.
- D. Set up the acquired agency as a user alias domain from the Manage domains page.

Answer: D

Explanation:
Setting up the acquired agency as a user alias domain allows users to have their new organization's email address while still being able to send and receive emails using their previous email address with the sub-agency domain. This approach efficiently ensures they can use both email addresses without requiring additional configuration for separate accounts.

NEW QUESTION # 18
......

Workspace-Administrator exam torrent you get is the best valid and latest. So 100% pass is our guarantee.

Associate-Google-Workspace-Administrator Valid Exam Tips: https://www.exams4collection.com/Associate-Google-Workspace-Administrator-latest-braindumps.html
