We can claim that if you study with our Salesforce-Certified-Administrator Practice Engine for 20 to 30 hours, then you will be sure to pass the exam.

### Salesforce Certified Administrator Sample Questions (Q147-Q152):

#### NEW QUESTION # 147

When users log in to Salesforce via the user interface, which two settings does the system check for authentication?  
Choose 2 answers

- A. The user's profile login hours restrictions
- B. The user's Two-Factor Authentication for User Interface Logins permission
- C. The user's Two-Factor Authentication for API Logins permission
- D. The role IP address restrictions

**Answer: A,B**

Explanation:

Explanation

When users log in to Salesforce via the user interface, the system checks for authentication based on their profile settings and permissions. One of the settings is login hours, which specify the time range when users can log in to Salesforce based on their profile. Another setting is Two-Factor Authentication for User Interface Logins permission, which requires users to enter a verification code along with their username and password when they log in to Salesforce via the user interface. References: [https://help.salesforce.com/s/articleView?id=sf.users\\_profiles\\_loginhours.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.users_profiles_loginhours.htm&type=5)<https://help.salesforce.com>

#### NEW QUESTION # 148

Cloud Kicks has a custom object named shoe. The administrator has been asked to ensure that when a relationship is created between Account and shoe to prevent orphaned shoe records.  
What should the administrator do to complete this requirement?

- A. Create a master-detail lookup.
- B. Create a hierarchical lookup
- C. Create an encrypted lookup
- D. Create an indirect lookup

**Answer: A**

Explanation:

Explanation

Master-detail lookup is a type of relationship field that can be used to create a relationship between Account and Shoe and prevent orphaned Shoe records. Master-detail lookup establishes a parent-child relationship between two objects, where the parent record controls certain behaviors of the child record, such as security, ownership, and deletion. If the parent record is deleted, all the child records are deleted as well. References: [https://help.salesforce.com/s/articleView?id=sf.relationships\\_considerations.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.relationships_considerations.htm&type=5)

#### NEW QUESTION # 149

The Client services and customer support teams share the same profile but have different permission sets. The Custom Object Retention related list needs to be restricted to the client services team on the Lightning record page layout.  
What should the administrator use to fulfil this request?

- A. Component Visibility
- B. Page Layout Assignment
- C. Sharing settings
- D. Record Type Assignment

**Answer: A**

#### NEW QUESTION # 150

The Administrator at Universal Container wants to add branding to salesforce.  
Which two considerations should the administrator keep in mind?

Choose 2 Answers

- A. Themes apply to salesforce classic and to the salesforce mobile app.
- B. Chatter external users see the built-in Lightning theme only.
- C. Up to 150 custom themes can be created, modified, or cloned from the built-in themes.
- D. Only one theme can be active at a time, and a theme applies to the entire org.

**Answer: B,D**

Explanation:

Explanation

Themes are a way to customize the look and feel of Salesforce by changing the colors, images, and logos that appear on Lightning Experience pages. However, there are some limitations and considerations when using themes, such as: only one theme can be active at a time, and a theme applies to the entire org; themes apply only to Lightning Experience and do not affect Salesforce Classic or the Salesforce mobile app; up to 300 custom themes can be created, modified, or cloned from the built-in themes; Chatter external users see the built-in Lightning theme only and cannot see custom themes. #### NEW QUESTION # 151

The service manager at Ursa Major Solar wants to let customers know that they have received their cases via email and their websites. Medium-priority and high-priority cases should receive different email notifications than low-priority cases. The administrator has created three email templates for this purpose.

How should an administrator configure this requirement?

- A. Include three assignment rules that fire when cases are created. Add a filter for case priority. Select the appropriate email template for each rule.
- B. Configure one workflow rule that fires when cases are created. Add a filter for case priority. Select the appropriate email template for the rule.
- C. Create one auto-response rule. Configure three rule entry criteria and set a filter for case priority. Select the appropriate email template for each rule entry.
- D. Add three auto-response rules. Configure one rule entry criteria for each rule and set a filter for case priority. Select the appropriate email template for each rule entry.

**Answer: C**

Explanation:

Explanation

Auto-response rules are used to automatically send email responses to lead or case submissions based on the criteria you define. You can create one auto-response rule per object (lead or case) and configure multiple rule entries with different criteria and actions within that rule. To meet the requirement of sending different email notifications based on case priority, you need to create one auto-response rule for cases and configure three rule entries with filters for low-priority, medium-priority, and high-priority cases respectively. Then you need to select the appropriate email template for each rule entry action. References:
