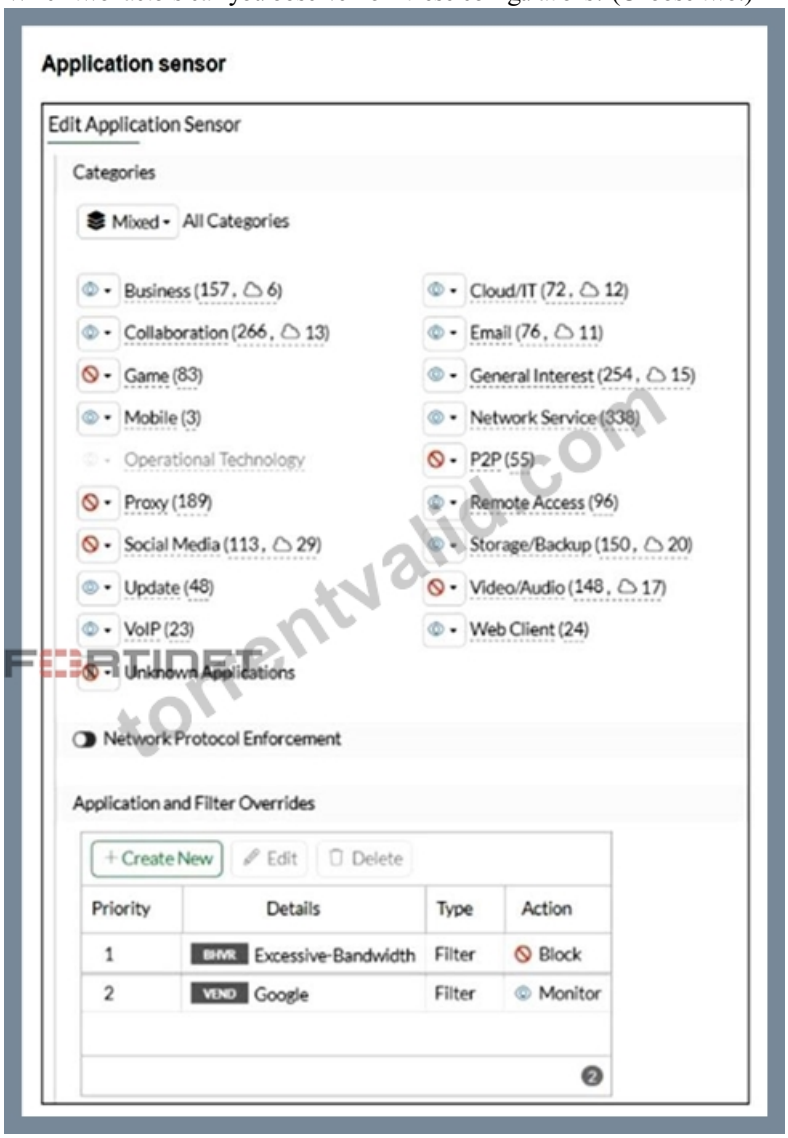
FCP_FGT_AD-7.6 Latest Dumps | FCP_FGT_AD-7.6 Prepaway Dumps

If you decide to beat the exam, you must try our FCP_FGT_AD-7.6 exam torrent, then, you will find that it is so easy to pass the exam. You only need little time and energy to review and prepare for the exam if you use our FCP - FortiGate 7.6 Administrator prep torrent as the studying materials. So it is worthy for them to buy our product. The FCP - FortiGate 7.6 Administrator prep torrent that we provide is compiled elaborately and highly efficient. You only need 20-30 hours to practice our FCP_FGT_AD-7.6 Exam Torrent and then you can attend the exam. Among the people who prepare for the exam, many are office workers or the students.

Fortinet FCP - FortiGate 7.6 Administrator Sample Questions (Q89-Q94):

NEW QUESTION # 89
Refer to the exhibits. You have implemented the application sensor and the corresponding firewall policy as shown in the exhibits.

Which two factors can you observe from these configurations? (Choose two.)



Firewall policy

- A. YouTube access is blocked based on Excessive-Bandwidth Application and Filter override settings.
- B. Facebook access is allowed but you cannot play Facebook videos based on Video/Audio category filter settings.
- C. Facebook access is blocked based on the category filter settings.
- D. YouTube search is allowed based on the Google Application and Filter override settings.

Answer: A,C

Explanation:
Facebook belongs to the Social Media application category, which is set to Block in the application sensor. Therefore, any Facebook application traffic is blocked by category.
The Excessive-Bandwidth behavior filter is configured as an override with priority 1 and action Block. YouTube streaming applications are tagged with the Excessive-Bandwidth behavior, so this override takes precedence over the Google (vendor) monitor rule and results in YouTube being blocked.

NEW QUESTION # 90
A network administrator has enabled full SSL inspection and web filtering on FortiGate. When visiting any HTTPS websites, the browser reports certificate warning errors. When visiting HTTP websites, the browser does not report errors.
What is the reason for the certificate warning errors?

- A. The option invalid SSL certificates is set to allow on the SSL/SSH inspection profile
- B. The browser does not trust the certificate used by FortiGate for SSL inspection.
- C. The matching firewall policy is set to proxy inspection mode.
- D. The certificate used by FortiGate for SSL inspection does not contain the required certificate extensions.

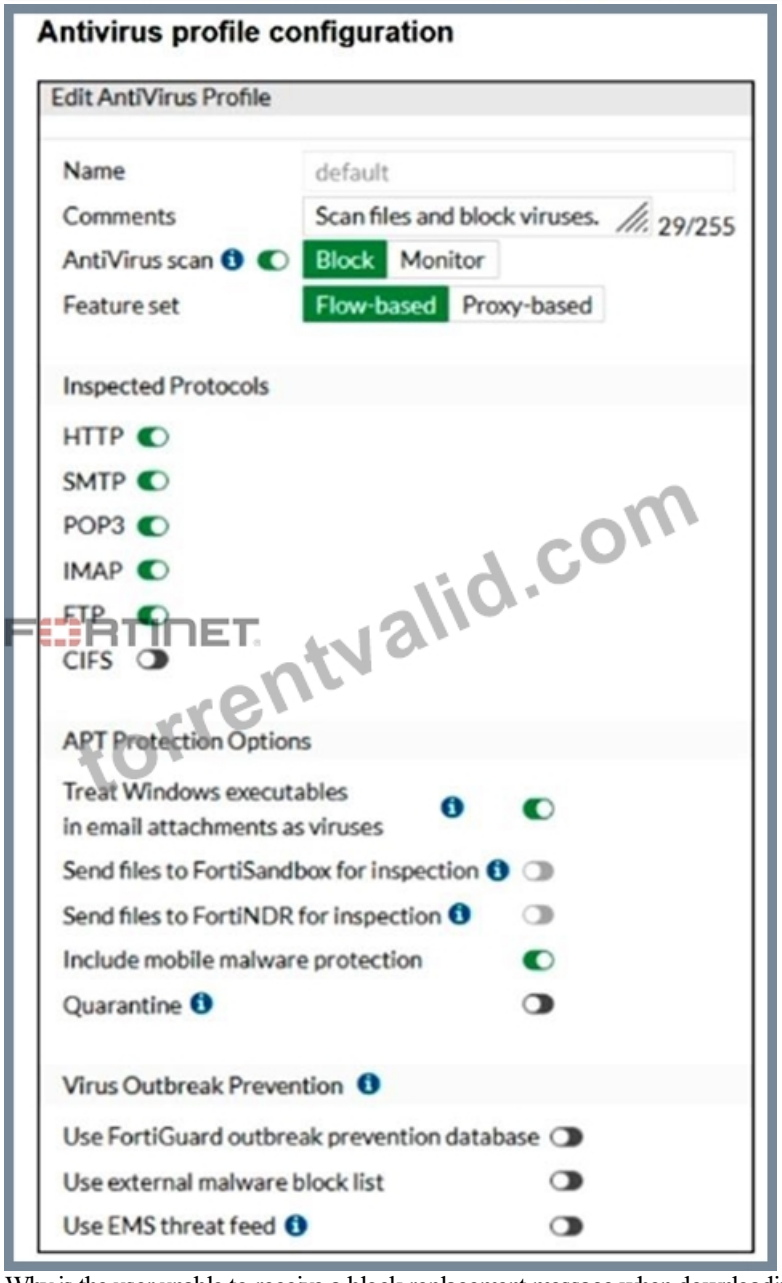
Answer: B

Explanation:
When full SSL inspection is enabled, FortiGate decrypts and re-signs HTTPS traffic using its own SSL inspection certificate. If the FortiGate CA certificate is not imported and trusted by the client's browser or OS, the browser sees it as untrusted and displays certificate warning errors. HTTP traffic is unaffected since it does not use certificates.

NEW QUESTION # 91
Refer to the exhibits, which show the firewall policy and an antivirus profile configuration.

Firewall policy configuration

torrentvalid.com



torrentvalid.com

Why is the user unable to receive a block replacement message when downloading an infected file for the first time?

- A. The option to send files to FortiSandbox for inspection is enabled.
- B. The intrusion prevention security profile must be enabled when using flow-based inspection mode.
- C. Flow-based inspection is used, which resets the last packet to the user.
- D. The firewall policy performs a full content inspection on the file.

Answer: C

Explanation:
When flow-based inspection is used, FortiGate scans packets as they flow through, and if a virus is detected, the connection is reset immediately. Because the infected file is blocked mid-transfer, the user does not receive a block replacement message - only the last packet is dropped to terminate the connection.
Replacement messages are shown only in proxy-based inspection, where FortiGate can buffer and fully analyze the file before sending a response page.

NEW QUESTION # 92
Refer to the exhibit.

An administrator has configured an Application Overrides for the ABC.Com application signature and set the Action to Allow. This application control profile is then applied to a firewall policy that is scanning all outbound traffic. Logging is enabled in the firewall policy. To test the configuration, the administrator accessed the ABC.Com web site several times.
Why are there no logs generated under security logs for ABC.Com?

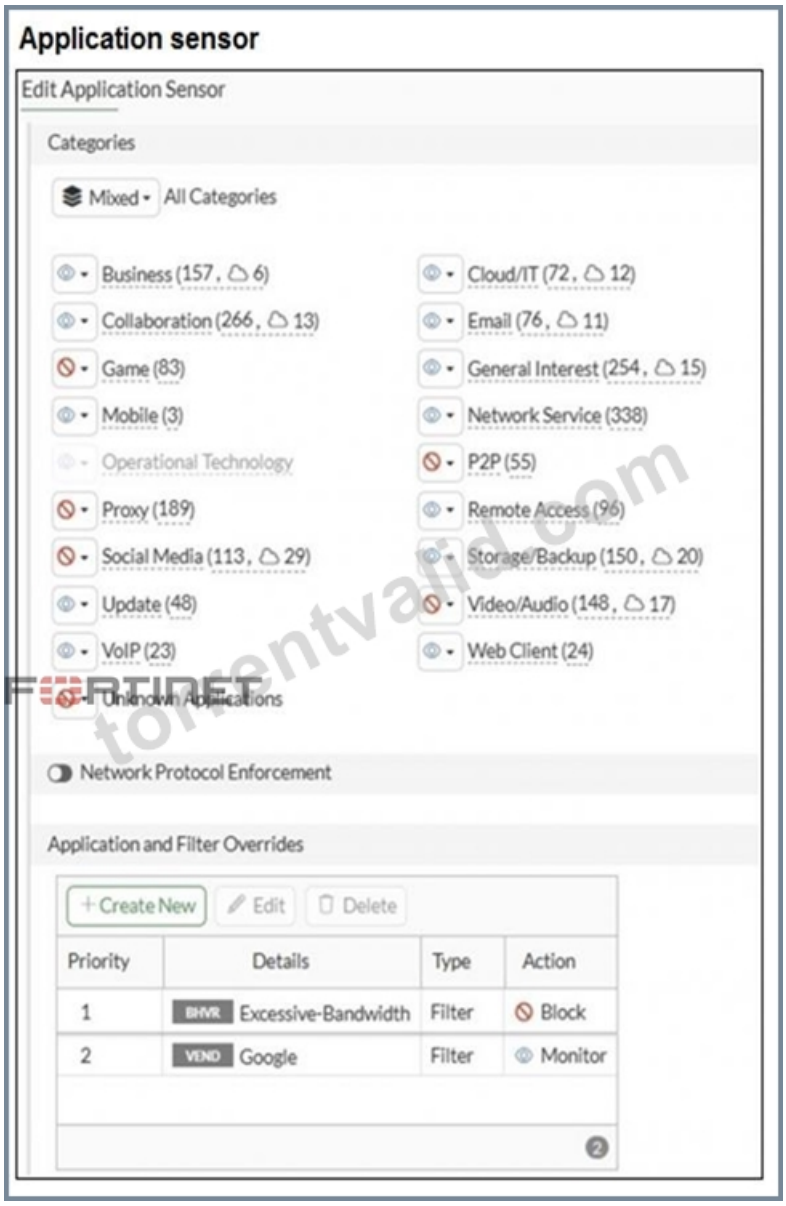
- A. The ABC.Com Type is set as Application instead of Filter.
- B. The ABC.Com is hitting the category Excessive-Bandwidth.
- C. The ABC.Com Action is set to Allow.
- D. The ABC.Com is configured under application profile, which must be configured as a web filter profile.

Answer: C

Explanation:
When the action is set to Allow in an application override, traffic matching this override is allowed without generating security logs because it bypasses deeper inspection and blocking.

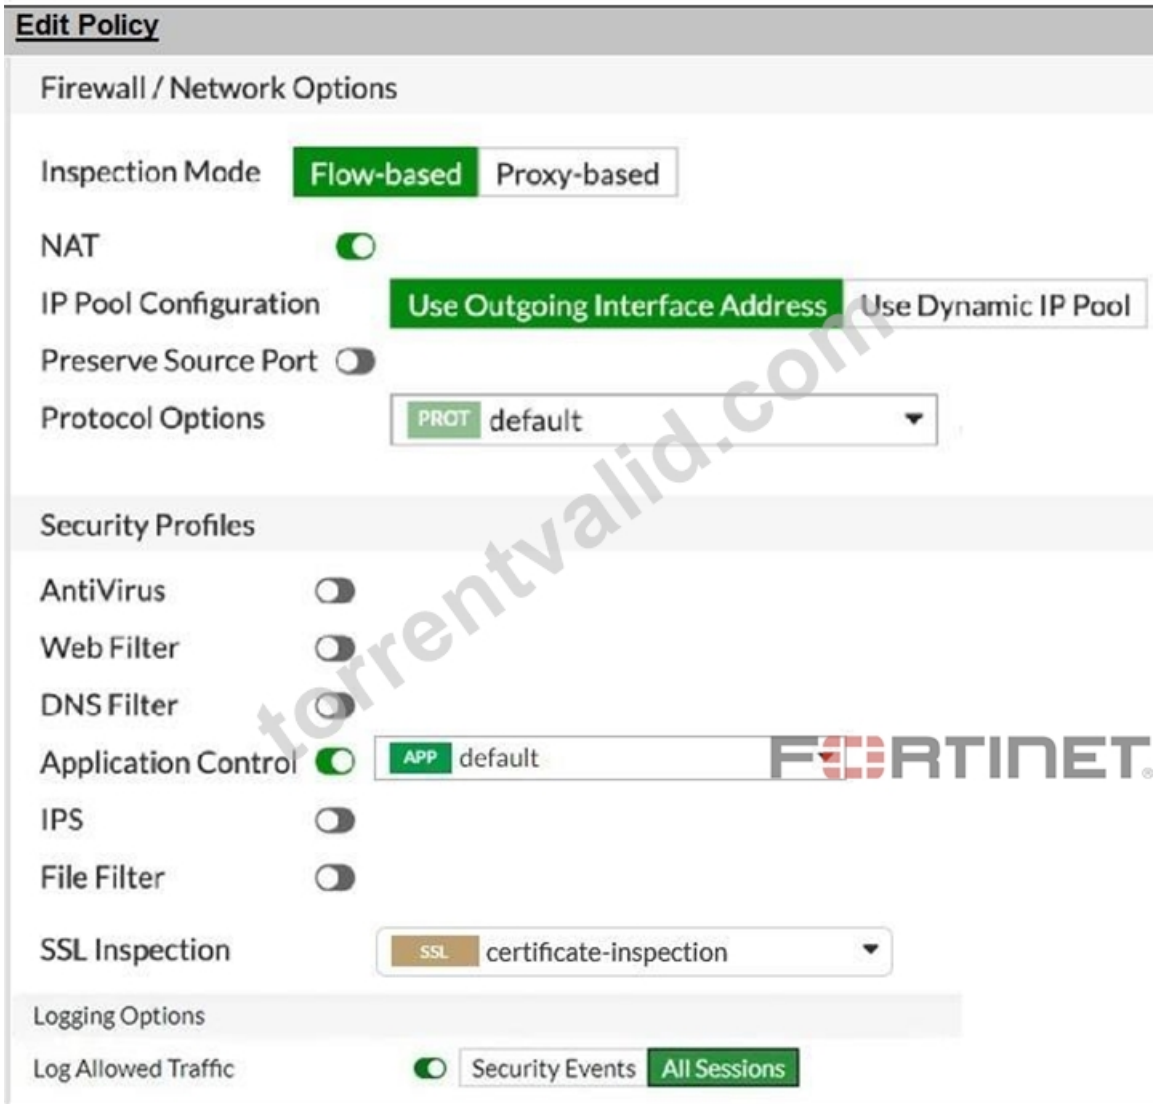
NEW QUESTION # 93
Refer to the exhibits. You have implemented the application sensor and the corresponding firewall policy as shown in the exhibits. You cannot access any of the Google applications, but you are able to access www.fortinet.com.
What would you do to resolve this issue?

Application sensor



torrentvalid.com

Firewall policy



- A. Move up Google in the Application and Filter Overrides section to set its priority to 1.
- B. Set SSL inspection to deep-content-inspection.
- C. Change the Inspection mode to Proxy-based.
- D. Add *Google*.com to the URL category in the security profile.

Answer: A

Explanation:
In the Application and Filter Overrides, the Excessive-Bandwidth filter (set to Block) is priority 1, and Google (set to Monitor) is priority 2. Since overrides are evaluated by priority, Google traffic is being blocked by the higher-priority rule. Moving Google to the top (priority 1) ensures it is matched first, allowing access while still monitoring it.

NEW QUESTION # 94
.....

TorrentValid Fortinet FCP_FGT_AD-7.6 test answers are the most effective and we guarantee your success in the first attempt. If you do not pass Fortinet FCP_FGT_AD-7.6 exam, we will give you a FULL REFUND of your purchasing fee. Failure in exam will not affect your finance.
