

SAFe-POPM퍼펙트덤프공부, SAFe-POPM최고품질인 중시험공부자료

SAFe POPM Certification

SAFe Lean-Agile Principles

1. Take an economic view
2. Apply systems thinking
3. Assume variability; preserve options
4. Build incrementally with fast, integrated learning cycles
5. Base milestones on objective evaluation of working systems
6. Visualize and limit WIP, reduce batch sizes, and manage queue lengths
7. Apply cadence, synchronize with cross-domain planning
8. Unlock the intrinsic motivation of knowledge workers
9. Decentralize decision making
10. Organize around value

Take an economic view

SAFe Lean-Agile principle #1. Base your decisions on economics. The goal is to optimize the time from concept to cash.

Apply systems thinking

SAFe Lean-Agile Principle #2. Everyone must understand the larger aim of the system to improve development.

Assume variability; preserve options

SAFe Lean-Agile Principle #3. Maintain multiple requirements and design options for a longer period in the development cycle and then use empirical data to narrow the focus.

Build incrementally with fast, integrated learning cycles

SAFe Lean-Agile Principle #4. Develop solutions incrementally in a series of short iterations to allow for faster customer feedback and mitigate risks.

Base milestones on objective evaluation of working systems

SAFe Lean-Agile Principle #5. Integration points provide objective milestones at which to evaluate the solution throughout the development life cycle.

Visualize and limit WIP, reduce batch sizes, and manage queue lengths

SAFe Lean-Agile Principle #6. Increases throughput and limits demand to actual capacity, facilitated fast and more reliable flow, and reduces wait times for new functionality.

Apply cadence, synchronize with cross-domain planning

SAFe Lean-Agile Principle #7. Creates predictability and provides a rhythm for development and causes multiple perspectives to be understood, resolved, and integrated at the same time.

Unlock the intrinsic motivation of knowledge workers

SAFe Lean-Agile Principle #8. Provide autonomy and purpose, minimize constraints, create an environment of mutual influence, and better understand the role of compensation instead of individual incentives are keys to higher levels of employee engagement.

Decentralize decision making

SAFe Lean-Agile Principle #9. Reduces delays, improves product development flow, enables faster feedback and creates more innovative solutions designed by those

예를 들어 Scrum SAFe-POPM 덤프를 보면 어떤 덤프제공사이트에서는 문항수가 아주 많은 자료를 제공해드리지만 저희 Scrum SAFe-POPM 덤프는 문항수가 적은 편입니다. 왜냐하면 저희는 더 이상 출제되지 않는 오래된 문제들을 삭제해버리기 때문입니다. 문제가 많으면 고객들의 시간을 허비하게 됩니다. Pass4Test는 응시자에게 있어서 시간이 정말 소중한다는 것을 잘 알고 있습니다.

Scrum SAFe-POPM 시험요강:

주제	소개
주제 1	<ul style="list-style-type: none"> • PI Planning Preparation: The topic focuses on Solution Vision, Customer-centric Features, PI Planning, and ART Backlog.
주제 2	<ul style="list-style-type: none"> • Product Owner • Product Management Roles and Responsibilities: It discusses Lean-Agile mindset, Value Streams, and Product Owner • Product Management Responsibilities.
주제 3	<ul style="list-style-type: none"> • Leadership for PI Planning: It delves into concepts of Team Kanban, Backlog Refinement, Iteration Review, Iteration Planning, and Iteration Retrospective.

주제 4	<ul style="list-style-type: none"> PI Execution: This topic discusses PO Sync, System Demo, Innovation and Planning Iteration, and Inspect and Adapt.

Scrum SAFe-POPM최고품질 인증시험공부자료 - SAFe-POPM시험대비 최신 덤프공부

Pass4Test의 Scrum인증 SAFe-POPM덤프를 선택하여Scrum인증 SAFe-POPM시험공부를 하는건 제일 현명한 선택입니다. 시험에서 떨어지면 덤프비용 전액을 환불처리해드리고Scrum인증 SAFe-POPM시험이 바뀌면 덤프도 업데이트하여 고객님의게 최신버전을 발송해드립니다. Scrum인증 SAFe-POPM덤프뿐만 아니라 IT인증시험에 관한 모든 덤프를 제공해드립니다.

최신 Scrum POPM SAFe-POPM 무료샘플문제 (Q37-Q42):

질문 # 37

What is essential when communicating the Vision?

- A. The importance of Feature prioritization
- B. The importance of empathy interviews
- C. The importance of Lean budget Guardrails
- D. The importance of non-functional requirements

정답: C

설명:

The vision is a description of the future state of the solution under development, reflecting customer and stakeholder needs, as well as the features and capabilities proposed to meet those needs¹. Communicating the vision effectively is essential for creating a shared understanding of the program's goals and objectives, especially as they evolve due to changing market needs and business drivers¹. One of the key aspects of communicating the vision is to establish the importance of Lean budget Guardrails, which are policies and practices that ensure the financial integrity and economic viability of the solution². Lean budget Guardrails provide the boundaries and context for the solution development, enabling decentralized decision-making and empowering teams to operate autonomously within the agreed-upon funding². By communicating the importance of Lean budget Guardrails, the vision helps align the teams with the strategic themes and portfolio priorities, as well as foster a culture of innovation and learning².

질문 # 38

Which Agile Team event supports relentless improvement?

- A. Team Sync
- B. Iteration Retrospective
- C. Inspect and Adapt
- D. System Demo

정답: B

설명:

The iteration retrospective is an Agile Team event that supports relentless improvement by allowing the team to reflect on the iteration just completed and to derive new ideas to improve the team's process^{1,2}. This reflection helps instill the concept of relentless improvement-one of the pillars of the SAFe House of Lean³-in the individuals and the team.

질문 # 39

Which is developed by teams and rolled up to the ART level during PI Planning?

- A. Risks
- **B. Objectives**
- C. Dependencies
- D. Milestones

정답: B

설명:

Explanation

Objectives are developed by teams and rolled up to the ART level during PI Planning. Objectives are a summary of the business and technical goals that the teams and the ART intend to achieve in the upcoming Program Increment (PI)¹. During PI Planning, each team creates their own team PI objectives, which are then presented and reviewed by the ART and the stakeholders². The aggregated team PI objectives form the ART PI objectives, which provide a common vision and alignment for the ART³.

질문 # 40

Communicating and refining the Vision to the Agile Release Train during PI Planning supports which SAFe Core Value?

- A. Relentless Improvement
- B. Transparency
- C. Respect for People
- **D. Alignment**

정답: D

설명:

Explanation

Communicating and refining the Vision to the Agile Release Train (ART) during PI Planning supports the SAFe Core Value of Alignment. Alignment is one of the four core values of SAFe that guides the behaviors and actions of the people who work under the framework¹. Alignment means that everyone understands the strategic direction, the value streams, and the solution intent, and how their role and work contribute to them².

PI Planning is a crucial event in SAFe where all the teams within the ART come together to plan their work for the upcoming Program Increment (PI)³. During PI Planning, the Product Management presents the Vision, which describes the future state of the solution and its features⁴. The Vision helps align the teams and stakeholders to a shared mission and goal, and provides the context and purpose for the PI objectives.

질문 # 41

In a 12-week PI, how often does the Innovation and Planning (IP) Iteration occur?

- A. Every two Iterations
- B. Every two PIs
- C. Once per year
- **D. Every quarter**

정답: D

설명:

Explanation

The Innovation and Planning (IP) Iteration is a unique, dedicated iteration that occurs every Program Increment (PI). A PI is a

timebox of 8 to 12 weeks, during which an Agile Release Train (ART) delivers incremental value in the form of working, tested software and systems. Therefore, in a 12-week PI, the IP Iteration occurs every quarter

질문 # 42
