## C\_BCSBS\_2502 Ppt

www.ERPPrep.com  
The SAP Certified Associate - Positioning SAP Business Suite (C\_BCSBS\_2502) certification validates expertise in positioning SAP Business Suite solutions effectively. This guide provides essential details, including exam structure, syllabus, and key topic areas. It also includes sample questions and recommended practice tests to help candidates prepare effectively. By following this guide, professionals can enhance their understanding of SAP Business Suite and improve their chances of achieving certification success.

Our C\_BCSBS\_2502 exam quiz is so popular not only for the high quality, but also for the high efficiency services provided which owns to the efforts of all our staffs. First of all, if you are not sure about the C\_BCSBS\_2502 exam, the online service will find the most accurate and all-sided information for you, so that you can know what is going on about all about the exam and make your decision to buy C\_BCSBS\_2502 Study Guide or not.

### SAP C\_BCSBS\_2502 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Positioning SAP Business Data Cloud: This section of the exam measures the skills of Enterprise Architects and covers the positioning and strategic use of SAP Business Data Cloud. It involves understanding how data from various sources is managed, governed, and accessed to support intelligent business operations. The section aims to equip professionals with the ability to explain data unification and connectivity through SAP's cloud-based data platform.</li></ul>

Topic 2	<ul style="list-style-type: none"> <li>Positioning SAP Business Suite: This section of the exam measures the skills of Solution Consultants and covers how to effectively position the SAP Business Suite within various business scenarios. It includes understanding the core value, capabilities, and strategic advantages of SAP's integrated business applications. The focus is on enabling consultants to align SAP Business Suite offerings with customer needs to support end-to-end processes.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>Discovering SAP Business AI: This section of the exam measures the skills of Digital Transformation Specialists and focuses on exploring how SAP Business AI enables smarter decision-making. It includes identifying AI-driven features embedded within SAP solutions and how they contribute to automation, predictions, and enhanced business outcomes. Professionals are expected to understand how to promote AI adoption in business processes using SAP's intelligent technologies.</li> </ul>

## Latest Braindumps C\_BCSBS\_2502 Ppt, C\_BCSBS\_2502 Advanced Testing Engine

In addition to the C\_BCSBS\_2502 exam materials, our company also focuses on the preparation and production of other learning materials. If you choose our C\_BCSBS\_2502 study guide this time, I believe you will find our products unique and powerful. Then you don't have to spend extra time searching for information when you're facing other exams later, just choose us again. As long as you face problems with the exam, our company is confident to help you solve. Give our C\_BCSBS\_2502 practice quiz a chance to give you a chance to succeed. We are very willing to go hand in hand with you on the way to preparing for C\_BCSBS\_2502 exam.

### SAP Certified Associate - Positioning SAP Business Suite Sample Questions (Q28-Q33):

#### NEW QUESTION # 28

What does SAP do to help installed-base customers with their transformation journey to the SAP Business Suite?

- A. Position and leverage the GROW with SAP transformation journey
- B. Move capabilities into the public cloud wherever possible
- C. Support and accelerate their lift and shift efforts to cloud ERP only

**Answer: A**

Explanation:

GROW with SAP is SAP's official program designed to help customers (including existing or installed-base customers) transform and accelerate their move to SAP Business Suite (especially S/4HANA Cloud and cloud-based ERP) using best practices, ready-to-run cloud solutions, and guided transformation journeys.

It provides tools, services, and support to simplify and speed up the transition-not just "lift and shift" but true business transformation.

#### NEW QUESTION # 29

How does integrating SAP Databricks within SAP Business Data Cloud reduce IT overhead for customers?

- A. By streamlining data governance processes and minimizing the need for complex data security configurations
- B. By eliminating the need for rebuilding data structures and business logic externally
- C. By providing pre-built connectors to various data sources
- D. By automating data ingestion pipelines

**Answer: B**

Explanation:

SAP Business Data Cloud (BDC) is a fully managed Software-as-a-Service (SaaS) solution that unifies and governs SAP and non-SAP data, integrating SAP Databricks to enable advanced analytics and AI-driven insights. The question asks how the integration of SAP Databricks within SAP BDC reduces IT overhead for customers, with one correct answer. Below, each option is evaluated

based on official SAP documentation, SAP Learning materials, and relevant web sources from the provided search results, ensuring alignment with the "Positioning SAP Business Data Cloud" narrative and focusing on the role of SAP Databricks.

\* Option A: By automating data ingestion pipelines While SAP BDC, including its SAP Datasphere component, supports data integration and pipeline management, the automation of data ingestion pipelines is not a primary focus of SAP Databricks' integration. SAP Databricks is designed to enhance AI/ML, data science, and data engineering capabilities, leveraging zero-copy data sharing via Delta Sharing to access data products. Although SAP BDC as a whole may reduce some pipeline management overhead, the specific role of SAP Databricks is not to automate ingestion pipelines but to utilize pre-curated data products without requiring complex ETL processes. The documentation does not emphasize automated ingestion pipelines as a key IT overhead reduction mechanism for SAP Databricks. Extract: "SAP Business Data Cloud is deeply integrated across SAP applications, so your most critical data retains its original business context and semantics and the hidden costs of data extracts are eliminated-saving you time, resources, and effort." This option is incorrect.

\* Option B: By providing pre-built connectors to various data sources SAP BDC provides pre-built connectors to SAP and non-SAP data sources through its foundation services and SAP Datasphere, enabling seamless data integration. However, this capability is not specifically tied to the SAP Databricks component. SAP Databricks leverages these connections indirectly by accessing data products shared via Delta Sharing, but it does not provide the connectors itself. The documentation highlights SAP BDC's overall integration capabilities, not SAP Databricks' role in providing connectors, as the primary mechanism for reducing IT overhead. Extract: "Effortlessly connect to contextual SAP data and blend with third-party data-without managing pipelines and copying data." This option is incorrect.

\* Option C: By streamlining data governance processes and minimizing the need for complex data security configurations SAP Databricks integrates with Unity Catalog for governance, which enhances data management and security within the SAP BDC environment. SAP BDC itself provides unified provisioning, security, and compliance, reducing some governance overhead. However, while governance is improved, the primary IT overhead reduction from SAP Databricks comes from eliminating the need to replicate and re-engineer data externally, not from streamlining governance processes. The documentation emphasizes data sharing and semantic preservation over governance simplification as the key benefit of SAP Databricks integration. Extract: "SAP Databricks uses both generative and traditional AI to understand your organization's data, business terms, and key metrics, so teams can work with data using natural language. It makes it easier to find, organize, manage, and govern data through Unity Catalog..." This option is incorrect.

\* Option D: By eliminating the need for rebuilding data structures and business logic externally The integration of SAP Databricks within SAP BDC significantly reduces IT overhead by eliminating the need to rebuild data structures and business logic externally. Traditionally, customers replicate SAP data into external platforms, requiring complex ETL processes to clean, transform, and recreate business logic, which increases costs and maintenance efforts. SAP Databricks, through native integration and zero-copy Delta Sharing, provides direct access to curated, semantically rich SAP data products (e.g., from SAP S/4HANA) within the SAP BDC environment. This preserves business context and semantics, avoiding the need to re-engineer data structures or logic, thus reducing development, maintenance, and operational overhead. This is explicitly highlighted in the documentation as a key benefit of the SAP-Databricks partnership. Extract: "Today, customers often replicate SAP data into external platforms to clean, train models, deploy them, run inference, and push results back-introducing complexity, higher costs, and governance gaps. SAP Databricks offers a better path. Customers can now run end-to-end AI, ML, and analytics directly within SAP Business Data Cloud-without needing separate platforms or physical data replication." Extract: "Built-In Business Semantics: Because SAP data already carries deep business context and semantics, Databricks can provide powerful analytics and machine learning without forcing customers to re-invent data pipelines or guess at the meaning of fields." Extract: "SAP Databricks also offers significantly improved data latency... This enhanced latency is possible due to the Delta Sharing approach which enables direct access to clean, curated and context-rich data products with business semantics already incorporated. ... [This] results in a reduction of processing costs and lowering the overheads for initial development and ongoing maintenance of ETL processes." This option is correct.

Summary of Correct answer:

\* D: Integrating SAP Databricks within SAP BDC reduces IT overhead by eliminating the need to rebuild data structures and business logic externally, leveraging zero-copy Delta Sharing to access curated SAP data products with preserved business semantics, thus minimizing complex ETL processes and maintenance costs.

## NEW QUESTION # 30

Match the outcomes in the dropdown lists to the capabilities of Joule

□

**Answer:**

Explanation:

□ Explanation:

Step-by-Step Solution

1. Get the insights you need, when you need them.

Correct Outcome:

\* Reduced time-to-insight, empowerment of non-technical personnel, and quicker decision making.

This outcome is about having real-time access to insights and analytics. Joule helps by making complex data simple and accessible, empowering all users (not just technical staff) to make decisions quickly, without waiting for IT or reports.

2. Enable every employee to achieve more in a faster way.

Correct Outcome:

\* Increased workforce productivity, fewer operational errors, and quicker task completion.

Here, the focus is on how Joule streamlines processes for all employees. With AI automation and proactive recommendations, Joule helps everyone work faster, make fewer mistakes, and complete tasks efficiently.

3. Make every customer touchpoint count.

Correct Outcome:

\* Higher NPS, better conversion rates, and stronger customer retention.

This is about customer experience. Joule uses AI to ensure every interaction with the customer is valuable, increasing satisfaction (NPS = Net Promoter Score), conversion, and retention rates.

**NEW QUESTION # 31**

How does SAP Business Suite facilitate digital transformation for enterprises? There are 2 correct answers to this question.

- A. Limits external integrations
- B. Enables real-time data analysis
- C. Eliminates cloud adoption requirements
- D. Automates end-to-end business processes

**Answer: B,D**

**NEW QUESTION # 32**

Which SAP solution is designed to manage end-to-end business processes across multiple departments? Please choose the correct answer.

- A. SAP BusinessObjects
- B. SAP ERP
- C. SAP Fieldglass
- D. SAP Ariba

**Answer: B**

**NEW QUESTION # 33**
