## Salesforce Plat-Arch-206 PDF Questions - Increase Your Exam Passing Chances

Many companies arrange applicants to take certification exams since 1995 internationally such like Microsoft, Fortinet, Veritas, EMC, and HP. Salesforce Plat-Arch-206 exam sample online was produced in 2001 and popular in 2008. So far many companies built long-term cooperation with exam dumps providers. Many failure experiences tell them that purchasing a valid Salesforce Plat-

Arch-206 Exam Sample Online is the best effective and money-cost methods to achieve their goal.

## Salesforce Certified Heroku Architect Sample Questions (Q114-Q119):

### NEW QUESTION # 114

Universal Containers provides installation, repair, and consulting services. When Technicians complete the work, they need to provide different reports for the installation, repair, and consulting services.

Which two configurations should a Consultant recommend to meet this requirement? (Choose two )

- A. Assets
- B. Work Types
- C. Product Templates
- D. Service Report Templates

**Answer: B,D**

### NEW QUESTION # 115

Universal Containers (UC) has a front-end web application and a back-end service application running on Heroku. The applications are running in the Common Runtime. Now, UC wants to prevent any public access to the back-end application. Which two Heroku features should an Architect propose?

- A. Apache Kafka on Heroku
- B. Heroku Internal Routing
- C. Private Space VPN Connections
- D. Private Spaces DNS Service Discovery

**Answer: C,D**

Explanation:

- <https://devcenter.heroku.com/articles/dataclips>

### NEW QUESTION # 116

What are 3 examples of backing services, as described in the Twelve Factor app methodology?

- A. An email delivery service
- B. A database
- C. A background process with a long running task
- D. A logging tool

**Answer: A,B,D**

Explanation:

- <https://devcenter.heroku.com/articles/internal-routing>

### NEW QUESTION # 117

An existing app is experiencing performance degradation because of multiple executions of multiple, expensive SQL read queries. This SQL code cannot be optimized any further and the frequency of the execution of the queries cannot be reduced. Which two options should an Architect recommend in this scenario?

- A. Add a read-only HerokuPostgres follower
- B. Create a database caching layer
- C. Restart the Heroku Postgres server to reclaim cache
- D. Hardcode the results of the query into app logic

**Answer: A,B**

Explanation:

- <https://devcenter.heroku.com/articles/using-sso-services-with-heroku#end-user-account-creation-and-removal>

## NEW QUESTION # 118

At Universal Containers (UC), a developer named Yuichiro wrote a PHP application that, in production, uses a MySQL database.

Yuichiro is onboarding Mary, a new UC developer, who is setting up her development environment. Yuichiro asks Mary to:

- 1) install the related PHP libraries manually so the application will run;
- 2) use MongoDB, instead of MySQL, in the development environment.

According to the Twelve-Factor methodology, which changes should an Architect recommend?

- A. Explicitly declare code dependencies in the application's source and use the same type of database in both development and production.
- B. Explicitly declare code dependencies in the application's environment variables and use the same type of database in both development and production.
- C. Recursively determine code dependencies on application startup and maintain separate Git branches for the MongoDB- and MySQL- compatible versions of the application.
- D. **Persist code dependencies in the application's production database. Use the same type of database locally to ensure that the dependencies are accessible.**

**Answer: D**

## NEW QUESTION # 119

.....

Our Salesforce Certified Heroku Architect (Plat-Arch-206) practice exam highlights mistakes at the end of each attempt, allowing you to overcome them before it's too late.
