Will you feel nervous for the exam? If you do, we can relieve your nerves if you choose us. SC-401 Soft test engine can stimulate the real exam environment, so that you can know procedures of the real exam environment, and it will build up your confidence. In addition, SC-401 exam materials are verified by the experienced experts, and therefore the quality can be guaranteed. We offer you free demo to have a try before buying, so that you can have a better understanding of what you are going to buy. If you buy SC-401 Exam Materials from us, we also pass guarantee and money back guarantee if you fail to pass the exam.

Microsoft SC-401 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Implement Data Loss Prevention and Retention: This section evaluates Data Protection Officers on designing and managing data loss prevention (DLP) policies and retention strategies. It includes setting policies for data security, configuring Endpoint DLP, and managing retention labels and policies. Candidates must understand adaptive scopes, policy precedence, and data recovery within Microsoft 365.
Topic 2	<ul style="list-style-type: none"> Implement Information Protection: This section measures the skills of Information Security Analysts in classifying and protecting data. It covers identifying and managing sensitive information, creating and applying sensitivity labels, and implementing protection for Windows, file shares, and Exchange. Candidates must also configure document fingerprinting, trainable classifiers, and encryption strategies using Microsoft Purview.
Topic 3	<ul style="list-style-type: none"> Manage Risks, Alerts, and Activities: This section assesses Security Operations Analysts on insider risk management, monitoring alerts, and investigating security activities. It covers configuring risk policies, handling forensic evidence, and responding to alerts using Microsoft Purview and Defender tools. Candidates must also analyze audit logs and manage security workflows.
Topic 4	<ul style="list-style-type: none"> Protect Data Used by AI Services: This section evaluates AI Governance Specialists on securing data in AI-driven environments. It includes implementing controls for Microsoft Purview, configuring Data Security Posture Management (DSPM) for AI, and monitoring AI-related security risks to ensure compliance and protection.

Actual4Exams provides Administering Information Security in Microsoft 365 SC-401 desktop-based practice software for you to test your knowledge and abilities. The Administering Information Security in Microsoft 365 SC-401 desktop-based practice

software has an easy-to-use interface. You will become accustomed to and familiar with the free demo for Administering Information Security in Microsoft 365 SC-401 Exam Questions. Exam self-evaluation techniques in our Administering Information Security in Microsoft 365 SC-401 desktop-based software include randomized questions and timed tests. These tools assist you in assessing your ability and identifying areas for improvement to pass the Administering Information Security in Microsoft 365 certification exam.

Microsoft Administering Information Security in Microsoft 365 Sample Questions (Q70-Q75):

NEW QUESTION # 70

You have a Microsoft 365 E5 subscription that contains a Microsoft SharePoint Online site named Site1. Site1 contains the files shown in the following table.

In the Microsoft Purview portal, you create a content search named Content1 and configure the search conditions as shown in the following exhibit.

Which files will be returned by Content1?

- A. File1.docx and File3.docx only
- B. File1.docx, File2.docx, and File3.docx
- C. File2.docx only
- D. File3.docx only
- E. File1.docx and File2.docx only

Answer: A

Explanation:

Microsoft Purview, Keyword queries and search conditions for eDiscovery Values aren't case-sensitive. Both User1 (File1.docx) and USER1 (File3.docx) will match the Search condition -Author:USER1.

Reference:

<https://learn.microsoft.com/en-us/purview/ediscovery-keyword-queries-and-search-conditions>

NEW QUESTION # 71

You have a Microsoft 365 E5 subscription. The subscription contains 500 Windows devices that are onboarded to Microsoft Purview.

You need to prevent users from sharing sensitive information with third-party generative AI websites.

Which Microsoft Purview solution should you use?

- A. Information Protection
- B. Insider Risk Management
- C. Data Loss Prevention
- D. Information Barriers

Answer: C

Explanation:

Considerations for DSPM for AI to manage data security and compliance protections for AI interactions To prevent users from sharing sensitive information with third-party generative AI websites when Windows devices are onboarded to Microsoft Purview, you can configure Data Loss Prevention (DLP) policies. These policies allow you to restrict access to specific service domains and block file uploads or sensitive data sharing with those domains.

NEW QUESTION # 72

You have a Microsoft SharePoint Online site named Site1 that has the users shown in the following table.

You create the retention labels shown in the following table.

You publish the retention labels to Site1.

On March 1,2023, you assign the retention labels to the files shown in the following table.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

□ Explanation:

□ User1 can delete File1 on March 10, 2023.

No - File1 has Retention1 applied, which retains it for 4 years with a "Retain only" action. This means it cannot be deleted during the retention period, which ends on March 1, 2027.

User2 can delete File1 on March 10, 2027.

No - User2 is a Member and does not have the Owner role, which is required to delete files under retention policies during the retention period. Additionally, the "Retain only" action prevents deletion until the retention period ends on March 1, 2027.

User2 can edit File2 on March 15, 2025.

No - File2 has Retention2 applied, which retains it for 2 years with a "Retain and delete" action. This means the file is protected from edits or deletions during the retention period, which ends on March 1, 2025. Since March 15, 2025, is after the retention period, the file would be eligible for deletion, but the question specifies editing, which is restricted during the retention period.

NEW QUESTION # 73

SIMULATION

Username and password

Use the following login credentials as needed:

To enter your username, place your cursor in the Sign in box and select the username below.

To enter your password, place your cursor in the Enter password box and select the password below.

Microsoft 365 Username:

admin@WWLx121586.onmicrosoft.com

Microsoft 365 Password: XXXXXXXXXXX

If the Microsoft Edge browser or Microsoft 365 portal does not load successfully, select the Microsoft Edge browser icon from the task bar, type the URL "https://admin.microsoft.com", and press Enter.

The following information is for technical support purposes only:

Lab Instance: XXXXXXXXXXX

Task 7

You need to publish the Product Retired retention label only to Exchange mailboxes and SharePoint classic and communication sites.

Answer:

Explanation:

To publish a retention label to specific locations, create the label first, then create a static retention label policy in the Microsoft Purview portal, select "Let me choose specific locations," and choose your Exchange mailboxes and SharePoint sites as the policy's scope. For Exchange, you can select "All Exchange mailboxes" or choose specific mailboxes. For SharePoint, you must add classic and communication sites one by one in the policy's settings.

Publish the label with a static policy

Step 1: In the Microsoft Purview portal, go to Data lifecycle management > Policies > Label policies.

Step 2: Click Publish labels and then Choose labels to publish to select the Product Retired label.

Step 3: In the Policy scope section, choose Static and click Next.

Step 4: In the Choose where to publish labels screen, select Let me choose specific locations.

Step 5: For Exchange:

Select Exchange mailboxes. You can choose to apply it to All Exchange mailboxes or select specific ones from the list.

Step 6: For SharePoint:

Select SharePoint sites. You'll need to manually add the specific site collection addresses for both your classic and communication sites. A checkmark will appear next to the sites you add, and you can search for them in the next screen.

Step 7: Click Next, provide a name and description for the policy, and click Submit to create the policy.

NEW QUESTION # 74

You need to meet the retention requirement for the users' Microsoft 365 data.

What is the minimum number of retention policies required to achieve the goal?

- A. 0
- B. 1

- C. 2
- D. 3
- E. 4

Answer: C

Explanation:

The requirement states that all Microsoft 365 data for users must be retained for at least one year. In Microsoft 365, retention policies must be configured for each type of data storage.

Step 1: Identifying Where Data is Stored

From the case study, users store data in the following locations:

SharePoint Online sites

OneDrive accounts

Exchange email

Exchange public folders

Teams chats

Teams channel messages

Since these locations fall under two broad categories:

Microsoft Exchange data (Emails, Public folders)

SharePoint, OneDrive, and Teams data

Step 2: Required Retention Policies

1#. A single retention policy can cover:

SharePoint Online

OneDrive

Microsoft Teams

2. A second retention policy is required for:

Exchange (Emails & Public Folders)

Thus, the minimum number of retention policies required to meet the requirement is 2.

Microsoft 365 retention policies can be applied broadly across multiple services with just two policies:

One for Exchange & Public Folders

One for SharePoint, OneDrive, and Teams

There's no need for separate policies for each individual workload unless different retention durations are required, which is not stated in the requirement.

Topic 1, Contoso, Ltd Case Study 1

Instructions

This is a case study. Case studies are not timed separately from other exam sections. You can use as much exam time as you would like to complete each case study. However, there might be additional case studies or other exam sections. Manage your time to ensure that you can complete all the exam sections in the time provided. Pay attention to the Exam Progress at the top of the screen so you have sufficient time to complete any exam sections that follow this case study.

To answer the case study questions, you will need to reference information that is provided in the case. Case studies and associated questions might contain exhibits or other resources that provide more information about the scenario described in the case.

Information provided in an individual question does not apply to the other questions in the case study.

A Review Screen will appear at the end of this case study. From the Review Screen, you can review and change your answers before you move to the next exam section. After you leave this case study, you will NOT be able to return to it.

To start the case study

To display the first question in this case study, select the "Next" button. To the left of the question, a menu provides links to information such as business requirements, the existing environment, and problem statements. Please read through all this information before answering any questions. When you are ready to answer a question, select the "Question" button to return to the question.

Overview

Contoso, Ltd. is a consulting company that has a main office in Montreal and three branch offices in Seattle, Boston, and Johannesburg.

Existing Environment

Microsoft 365 Environment

Contoso has a Microsoft 365 E5 tenant. The tenant contains the administrative user accounts shown in the following table.

□ Users store data in the following locations:

SharePoint sites

OneDrive accounts

Exchange email

Exchange public folders

Teams chats

Teams channel messages

When users in the research department create documents, they must add a 10-digit project code to each document. Project codes that start with the digits 999 are confidential.

SharePoint Online Environment

Contoso has four Microsoft SharePoint Online sites named Site1, Site2, Site3, and Site4.

Site2 contains the files shown in the following table.

Two users named User1 and User2 are assigned roles for Site2 as shown in the following table.

Site3 stores documents related to the company's projects. The documents are organized in a folder hierarchy based on the project.

Site4 has the following two retention policies applied:

Name: Site4RetentionPolicy1

Locations to apply the policy: Site4

Delete items older than: 2 years

Delete content based on: When items were created

Name: Site4RetentionPolicy2

Locations to apply the policy: Site4

Retain items for a specific period: 4 years

Start the retention period based on: When items were created

At the end of the retention period: Do nothing

Problem Statements

Management at Contoso is concerned about data leaks. On several occasions, confidential research department documents were leaked.

Requirements

Planned Changes

Contoso plans to create the following data loss prevention (DLP) policy:

Name: DLPpolicy1

Locations to apply the policy: Site2

Conditions:

Content contains any of these sensitive info types: SWIFT Code

Instance count: 2 to any

Actions: Restrict access to the content

Technical Requirements

Contoso must meet the following technical requirements:

All administrative users must be able to review DLP reports.

Whenever possible, the principle of least privilege must be used.

For all users, all Microsoft 365 data must be retained for at least one year.

Confidential documents must be detected and protected by using Microsoft 365.

Site1 documents that include credit card numbers must be labeled automatically.

All administrative users must be able to create Microsoft 365 sensitivity labels.

After a project is complete, the documents in Site3 that relate to the project must be retained for 10 years.

NEW QUESTION # 75
