Study Guide 1Z0-1114-25 Pdf, 1Z0-1114-25 Exam Study Guide

Provided that you lose your exam with our 1Z0-1114-25 exam questions unfortunately, you can have full refund or switch other version for free. All the preoccupation based on your needs and all these explain our belief to help you have satisfactory and comfortable purchasing services on the 1Z0-1114-25 Study Guide. We assume all the responsibilities our 1Z0-1114-25 simulating practice may bring you foreseeable outcomes and you will not regret for believing in us assuredly.

Oracle 1Z0-1114-25 Exam Syllabus Topics:

Topic	Details

Topic 1	<ul style="list-style-type: none"> Configuring Oracle Fusion Cloud Extensions with Visual Builder Studio: This section evaluates the expertise of Fusion Application Developers and Cloud Extension Specialists in using Oracle Visual Builder Studio (VBS) as a development platform for creating and modifying Oracle SaaS applications. It covers extending existing SaaS pages, creating new Redwood pages or apps for SaaS data, and building mashup applications that integrate SaaS and external data sources.
Topic 2	<ul style="list-style-type: none"> Designing and Developing Redwood Applications: This section measures the skills of Redwood Application Developers and Product Designers in designing and developing applications using Redwood patterns, templates, and components. It focuses on utilizing Redwood page templates, exploring specifications through the Redwood Reference Application, and building applications that align with Oracle's Redwood design system.
Topic 3	<ul style="list-style-type: none"> Developing Fusion Apps with Visual Builder Studio: This section tests the knowledge of Fusion App Developers and Development Operations Engineers in leveraging Visual Builder Studio features. It includes configuring service connections, managing code with Git repositories, handling branches and merge requests, and managing builds, pipelines, and deployments to streamline application development workflows.
Topic 4	<ul style="list-style-type: none"> The Redwood Experience: This section of the exam measures the skills of UX Designers and Application Developers in understanding the need for a modern applications platform. It explains the building blocks of Oracle's Redwood design system, focusing on its role in delivering a consistent and intuitive user experience across applications.

Oracle Redwood Application 2025 Developer Associate Sample Questions (Q12-Q17):

NEW QUESTION # 12

Which two statements are true about Web Components?

- A. Web Component is not composed of JET components, HTML, JavaScript, and CSS
- B. A Web Component is a collection of Service Connections, Business Objects, and CSS
- C. A Web Component is a reusable piece of UI that can be embedded as a custom HTML element
- D. A Web Component can be composed of JET components, HTML, JavaScript, and CSS

Answer: C,D

Explanation:

Full Detailed in Depth Explanation:

Web Components in VB are reusable UI elements (A) built with JET, HTML, JS, and CSS (C). They aren't collections of services/objects (B), and D contradicts C.

NEW QUESTION # 13

What is the minimum and maximum number of steps that can be configured on a Guided Process?

- A. Minimum 1 and maximum 10
- B. Minimum 4 and maximum 10
- C. Minimum 1 and maximum 50
- D. Minimum 2 and maximum 25

Answer: C

Explanation:

Full Detailed in Depth Explanation:

The Guided Process template in Redwood (and VBS) allows users to configure a sequence of steps for task flows. The minimum is 1 step (a single task), and the maximum is 50 steps, providing flexibility for complex processes. Option B's maximum of 10 is too restrictive, Option C's minimum of 4 is incorrect, and Option D's maximum of 25 underestimates the capacity.

NEW QUESTION # 14

What does a build pipeline in Visual Builder Studio do?

- A. Can deploy an AppUI extension to multiple FA instances
- B. Can only package an AppUI extension, which requires manual deployment
- C. Can only deploy an AppUI extension to a stand-alone VB instance
- D. Can deploy an AppUI extension to only a single FA instance

Answer: A

Explanation:

Full Detailed in Depth Explanation:

A build pipeline in Visual Builder Studio (VBS) automates the process of packaging, building, and deploying applications or extensions, including AppUI extensions for Oracle Fusion Applications (FA). It is designed to streamline Continuous Integration/Continuous Deployment (CI/CD) workflows. Option D is correct because VBS build pipelines can deploy AppUI extensions to multiple Fusion Application instances (e.g., development, test, and production environments) as configured in the pipeline settings. This flexibility is a key feature of VBS, allowing developers to target multiple environments without manual intervention. Option A is incorrect because deployment is not limited to stand-alone VB instances; it can target FA instances as well. Option B is wrong as it restricts deployment to a single FA instance, which contradicts VBS's multi-environment capability. Option C is inaccurate because the pipeline does more than just packaging-it automates deployment too.

NEW QUESTION # 15

Which are the three out-of-the-box functionalities provided by Redwood for developing an application? (Choose three.)

- A. Accessibility
- B. Localization
- C. Caching services
- D. Telemetry and feedback
- E. Responsiveness

Answer: A,B,E

Explanation:

Full Detailed in Depth Explanation:

Redwood offers Localization (A), Responsiveness (C), and Accessibility (D) as core features. Caching (B) and Telemetry (E) are not standard out-of-the-box functionalities.

NEW QUESTION # 16

Which two statements are true about Web Components?

- A. Web Component is not composed of JET components, HTML, JavaScript, and CSS
- B. A Web Component is a collection of Service Connections, Business Objects, and CSS
- C. A Web Component is a reusable piece of UI that can be embedded as a custom HTML element
- D. A Web Component can be composed of JET components, HTML, JavaScript, and CSS

Answer: C,D

Explanation:

Full Detailed in Depth Explanation:

Web Components in VB are reusable UI elements (A) built with JET, HTML, JS, and CSS (C). They aren't collections of services/objects (B), and D contradicts C.
