Reliable JN0-232 Test Notes - JN0-232 Reliable Exam Vce

In order to facilitate the user's offline reading, the JN0-232 study braindumps can better use the time of debris to learn, especially to develop PDF mode for users. In this mode, users can know the JN0-232 prep guide inside the learning materials to download and print, easy to take notes on the paper, and weak link of their memory, at the same time, every user can be downloaded unlimited number of learning, greatly improve the efficiency of the users with our JN0-232 Exam Questions. Or you will forget the so-called good, although all kinds of digital device convenient now we read online, but many of us are used by written way to deepen their

memory patterns. Our JN0-232 prep guide can be very good to meet user demand in this respect, allow the user to read and write in a good environment continuously consolidate what they learned.

Juniper Security, Associate (JNCIA-SEC) Sample Questions (Q28-Q33):

NEW QUESTION # 28

What is the number of concurrent Secure Connect user licenses that an SRX Series device has by default?

- A. 0
- B. 1
- C. 2
- **D. 3**

Answer: D

Explanation:

The number of concurrent Secure Connect user licenses that an SRX Series device has by default is 2. Secure Connect is a feature of Juniper SRX Series devices that allows you to securely connect to remote networks via IPsec VPN tunnels. Each SRX Series device comes with two concurrent Secure Connect user licenses by default, meaning that it can support up to two simultaneous IPsec VPN connections.

NEW QUESTION # 29

Which two statements are correct about unified security policies? (Choose two.)

- A. Dynamic applications in unified security policies analyze traffic based on Layer 4 information.
- **B. Dynamic applications in unified security policies analyze traffic based on Layer 7 information.**
- C. Traffic that matches a traditional policy will not be evaluated by unified security policy.
- **D. Traffic that matches a unified policy will not be evaluated by traditional security policy.**

Answer: B,D

Explanation:

Traffic that matches a unified security policy is handled exclusively by the unified policy framework and is not further evaluated by traditional security policies.

Dynamic applications in unified security policies perform deep inspection using Layer 7 (application-layer) information to classify and control traffic based on application behavior.

NEW QUESTION # 30

An SRX Series Firewall operates in which two modes? (Choose two.)

- **A. packet mode**
- B. route mode
- **C. flow mode**
- D. wireless mode

Answer: A,C

Explanation:

SRX Series Firewalls can operate in flow mode and packet mode.

- Flow mode provides stateful inspection, applying security policies and UTM features.

- Packet mode performs stateless packet-based forwarding, bypassing session-based processing.

NEW QUESTION # 31

Referring to the exhibit, which type of NAT is the SRX Series Firewall performing?

□

- A. source NAT without PAT
- B. destination NAT with PAT

- C. destination NAT without PAT
- D. source NAT with PAT

Answer: D

Explanation:

The session shows the internal host 10.10.101.140 translated to the public address 203.0.113.199 with its source port changed from 53726 to 21421, indicating source NAT with Port Address Translation (PAT).

NEW QUESTION # 32

Which two statements are correct about security zones and functional zones? (Choose two.)

- A. Traffic entering an interface in a functional zone can exit any other transit interface.
- B. Traffic entering transit interfaces can exit an interface in a functional zone.
- C. Traffic entering transit interfaces cannot exit an interface in a functional zone.
- D. Traffic entering an interface in a functional zone cannot exit any other transit interface.

Answer: C,D

Explanation:

* Functional zones(e.g., junos-host, management, null) are not used for forwarding transit traffic. They are used to manage traffic destined to or from the SRX device itself.

* Option A:Correct. If traffic enters through a functional zone interface, it is meant for the SRX, not for transit, so it cannot exit another interface.

* Option D:Correct. Transit interfaces handle forwarding traffic, but they cannot send that traffic out through a functional zone interface.

* Option B and C:Incorrect, because functional zones are strictly control-plane, not transit forwarding zones.

Correct Statements:A and D

Reference:Juniper Networks -Security Zones vs. Functional Zones, Junos OS Security Fundamentals.

NEW QUESTION # 33

.....

With our study materials, you do not need to have a high IQ, you do not need to spend a lot of time to learn, you only need to follow the method JN0-232 real questions provide to you, and then you can easily pass the exam. Our study material is like a tutor helping you learn, but unlike a tutor who make you spend too much money and time on learning. As usual, you just need to spend little time can have a good commend of our study materials, then you can attend to your JN0-232 Exam and pass it at your first attempt.
