Microsoft 365 Administrator Sample Questions (Q535-Q540):

NEW QUESTION # 535

You have a Microsoft 365 E5 tenant that connects to Microsoft Defender for Endpoint.
You have devices enrolled in Microsoft Intune as shown in the following table.
You plan to use risk levels in Microsoft Defender for Endpoint to identify whether a device is compliant.
Noncompliant devices must be blocked from accessing corporate resources.
You need to identify which devices can be onboarded to Microsoft Defender for Endpoint, and which Endpoint security policies must be configured.
What should you identify? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:
Explanation
Text, table Description automatically generated with medium confidence
Reference:
https://docs.microsoft.com/en-us/microsoft-365/security/defender-endpoint/configure-machines-onboarding?view

NEW QUESTION # 536
You need to meet the technical requirement for the EU PII data.
What should you create?

- A. a retention policy from the Security & Compliance admin center.
- B. a data loss prevention (DLP) policy from the Security & Compliance admin center
- C. a data loss prevention (DLP) policy from the Exchange admin center
- D. a retention policy from the Exchange admin center

Answer: A

Explanation:
References:
https://docs.microsoft.com/en-us/office365/securitycompliance/retention-policies EU PII wants both documents and email message to be preserved so S&C Admin Center for Retention. If this was for Email only, this probably could have been done in EAC.

NEW QUESTION # 537
You have a Microsoft 365 tenant that contains devices enrolled in Microsoft Intune. The devices are configured as shown in the following table.
You plan to perform the following device management tasks in Microsoft Endpoint Manager:
Deploy a VPN connection by using a VPN device configuration profile.
Configure security settings by using an Endpoint Protection device configuration profile.
You support the management tasks.
What should you identify? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:
Explanation
Graphical user interface, application Description automatically generated
Reference:
https://docs.microsoft.com/en-us/mem/intune/configuration/vpn-settings-configure
https://docs.microsoft.com/en-us/mem/intune/protect/endpoint-protection-macos

NEW QUESTION # 538
HOTSPOT
You have a Microsoft 365 E5 subscription that contains a user named User1.
Azure AD Password Protection is configured as shown in the following exhibit.

User1 attempts to update their password to the following passwords:
* F@lcon
* Project22
* T4il$pin45dg4
Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Box 1: Only T4il$pin45dg4
Box 2: can attempt to sign in immediately
Note: Manage Azure AD smart lockout values
Based on your organizational requirements, you can customize the Azure AD smart lockout values.
Customization of the smart lockout settings, with values specific to your organization, requires Azure AD Premium P1 or higher licenses for your users. Customization of the smart lockout settings is not available for Azure China 21Vianet tenants.
To check or modify the smart lockout values for your organization, complete the following steps:
* Sign in to the Entra portal.
* Search for and select Azure Active Directory, then select Security > Authentication methods > Password protection.
* Set the Lockout threshold, based on how many failed sign-ins are allowed on an account before its first lockout.
* The default is 10 for Azure Public tenants and 3 for Azure US Government tenants.
* Set the Lockout duration in seconds, to the length in seconds of each lockout.
* The default is 60 seconds (one minute).
If the first sign-in after a lockout period has expired also fails, the account locks out again. If an account locks repeatedly, the lockout duration increases.

NEW QUESTION # 539
Your company has on-premises servers and an Azure AD tenant.
Several months ago, the Azure AD Connect Hearth agent was installed on all the servers.
You review the health status of all the servers regularly.
Recently, you attempted to view the health status of a server named Server1 and discovered that the server is NOT listed on the Azure AD Connect Servers list.
You suspect that another administrator removed Server1 from the list.
You need to ensure that you can view the health status of Server1.
What are two possible ways to achieve the goal? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.

- A. From Windows PowerShell, run the Rejister-ArureADConnectHealthsyncAgent cmdlet.
- B. From Server1, change the Azure AD Connect Health Services Startup type to Automatic
- C. From Server1, reinstall the Azure AD Connect Health agent
- D. From Azure Cloud shell, run the Connect-Azure AD cmdlet.
- E. From Server1, change the Azure AD Connect Health Services Startup type to Automatic (Delayed Start)

Answer: A,C
