# Free PDF CWNP CWDP-305 Certified Wireless Design Professional First-grade Exam Fee

P.S. Free & New CWDP-305 dumps are available on Google Drive shared by ExamsReviews: https://drive.google.com/open?id=1nnR7GGjwUDwtyq56oQ8TfdTQ-yDq6rdw

latest Certified Wireless Design Professional CWDP-305 exam sample questions and exam material help you pass Certified Wireless Design Professional exam easily. CWNP provides latest Certified Wireless Design Professional CWDP-305 test. You can download free practice exams to learing and practice. Certified Wireless Design Professional CWDP-305 Exam is true and effective. The Certified Wireless Design Professional price is benefit. reliable CWDP-305 test camp materials make you success in your career.

Trying before buying CWDP-305 exam braindumps can help you have a deeper understanding of what you are going to buy. We offer you free demo for you to have a try, and you can know what the complete version is like through the free demo. Moreover, CWDP-305 exam braindumps are high quality and accuracy, and you can use them at ease. We have online and offline service for you, and they possess the professional knowledge for CWDP-305 Exam Materials, and if you have any questions, you can contact with us, and we will give you reply as soon as we can.

High Pass-Rate CWDP-305 Exam Fee - Pass CWDP-305 in One Time - Perfect Trustworthy CWDP-305 Pdf

Selecting the right method will save your time and money. If you are preparing for CWDP-305 exam with worries, maybe the professional exam software provided by IT experts from ExamsReviews will be your best choice. Our ExamsReviews aims at helping you successfully Pass CWDP-305 Exam. If you are unlucky to fail CWDP-305 exam, we will give you a full refund of the cost you purchased our dump to make up part of your loss. Please trust us, and wish you good luck to pass CWDP-305 exam.

CWNP CWDP-305 Exam Syllabus Topics:

Topic	Details

Topic 1	• Define Specifications for the WLAN: This section of the exam measures the skills of a Wireless Network Planner and focuses on gathering business and technical requirements needed for designing wireless LANs. It includes understanding user needs, regulatory and safety constraints, and environmental factors. Candidates are expected to identify critical elements such as coverage, capacity, security, and device compatibility, and to analyse existing infrastructure and documentation to ensure a successful design strategy.
Topic 2	• Validate and Optimize the WLAN: This section of the exam measures the skills of a WLAN Optimization Specialist and assesses the ability to test, validate, and fine-tune wireless networks post-deployment. Key tasks include RF validation surveys, performance testing, troubleshooting connectivity and security issues, and applying appropriate physical or RF adjustments. It also involves client testing and final project handover, including documentation, knowledge transfer, and meetings to ensure long-term WLAN success.
Topic 3	• Deploy the WLAN: This section of the exam measures the skills of a WLAN Implementation Specialist and involves overseeing the deployment phase of wireless networks. It focuses on understanding deployment procedures for various WLAN architectures, configuring supporting infrastructure, and verifying proper installation. The section also addresses physical installation checks, documentation handover, and quality assurance practices during ongoing installations.
Topic 4	• Design the WLAN: This section of the exam measures the skills of a WLAN Design Engineer and covers the process of selecting configurations, architecture types, and wireless components to meet business and technical requirements. It includes using design software, selecting access points and antennas, and applying methodologies such as predictive or measured design. Candidates must demonstrate the ability to produce effective documentation and configure features like QoS, roaming security, and network services for different types of client devices and applications.

CWNP Certified Wireless Design Professional Sample Questions (Q97-Q102):

NEW QUESTION # 97
When performing a spectrum analysis walkthrough of a facility for which you will be creating a WLAN design, you detect an interferer. What should you do?

- A. Make a mental note of it so that you can include it in your design
- B. Make note of it using the reporting features of your spectrum analyzer or by documenting it elsewhere
- C. Walk away from the project because it is best to only deploy in clean environments with no other RF signals
- D. Locate and remove the interferer immediately so that your WLAN works well

Answer: B

Explanation:
Detecting interference during a spectrum analysis walkthrough is a critical part of WLAN design. The appropriate action is to record the details using the spectrum analyzer's logging features or document it for later assessment.
From CWDP-305:
"When interferers are discovered during a walkthrough, they should be recorded and investigated. This documentation helps in adjusting AP placement, channel assignment, or applying mitigation strategies during the design process."
- Reference: CWDP-305 Official Study and Reference Guide, Chapter on Protocoland Spectrum Analysis

NEW QUESTION # 98
In what circumstance would you not enable DFS channels on a WLAN infrastructure?

- A. In any office complex
- B. In any home office
- C. In any stadium
- D. In an airport

Answer: D

NEW QUESTION # 99

After designing a WLAN infrastructure using predictive design software, what is the best way to validate the predictive design in the physical space before deployment, assuming time and budget allow for it?

- A. Perform an AP-on-a-Stick survey using AP locations based upon the predictive design to confirm each AP's placement
- B. Use a client device positioned where the APs will be installed and measure the signal from the client device
- C. Deploy all of the APs as they're shown in the predictive design and perform a passive site survey
- D. Deploy all of the APs as they're shown in the predictive design and perform an active site survey

Answer: A

NEW QUESTION # 100

During a post-validation survey, you find an area lacking any detectable Wi-Fi signal at all It is located behind an elevator shaft What is a common solution to this problem?

- A. Replace all the clients in that area with clients having better receive sensitivity
- B. Turn up the power on the three APs closes! to that area
- C. Move one or more APs so that indoor propagation results in coverage in that area or install another AP on that side of the elevator shaft
- D. Install antennas with at least 3 more dB of gain on the two APs closest to that area

Answer: C

NEW QUESTION # 101

Which DHCP option, when required, must be configured to help access points (APs) locate their wireless LAN controller (WLC) during deployment?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: B

Explanation:
DHCP Option 43 is a vendor-specific option used by lightweight access points to locate their Wireless LAN Controller (WLC) when no static discovery method (like DNS or manual config) is provided. During the DHCP request process, the AP receives Option 43 information that includes the WLC's IP address. This is a standard method in controller-based WLAN deployments and is explicitly called out in the CWDP-305 Study Guide.

-

NEW QUESTION # 102

......

Our company sells three kinds of CWDP-305 guide torrent online whose contents are definitely same as each other. The PDF format of CWDP-305 exam torrent is easy to download, prints, and browse learning, which can be printed on paper and can make notes anytime. SOFT/PC test engine of CWDP-305 Exam applies to Windows system computers. It can simulate the real operation test environment. App/online test engine of the CWDP-305 guide torrent can be used on all kinds of eletronic devices.
