NEW QUESTION # 86

A professional services company is implementing Dynamics 365 Finance. The company has the following business entities:

Company	Comments
CompanyA	This is a company that reports on behalf of all organizational units.
OperationsB	This is a transactional company that operates with their own tax ID.
OperationsC	This is a regional business unit within OperationsB.
OperationsD	This is a transactional company that operates with their own tax ID.

You need to configure the system to support this organizational structure.

How should you configure the organization? To answer, drag the appropriate configurations to the correct entities. Each configuration may be used once. more than once. or not at all You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Configurations

- Legal entity
- Financial dimension
- Legal entity for elimination
- Legal entity for consolidation

Answer Area

Entity	Configuration
CompanyA	Configuration
OperationsC	Configuration

Answer:

Explanation:

Configurations

- Legal entity
- Financial dimension
- Legal entity for elimination
- Legal entity for consolidation

Answer Area

Entity	Configuration
CompanyA	Legal entity
OperationsC	Legal entity for elimination

Explanation:

Box 1: Legal entity

Box 2: Legal entity for elimination

Elimination transactions are required when a parent legal entity does business with one or more subsidiary legal entities and uses consolidated financial reporting. Consolidated financial statements must include only transactions that occur between the consolidated organization and other entities outside that organizations.

Therefore, transactions between legal entities that are part of the same organization must be removed, or eliminated, from the general ledger, so they don't appear on financial reports. There are multiple ways to report about eliminations:

An elimination rule can be created and processed in a consolidation or elimination company.

Financial reporting can be used to show the eliminations accounts and dimensions on a specific row or column.

A separate legal entity can be used to post manual transaction entries to track eliminations.

NEW QUESTION # 88
A company uses a legacy finance application that runs on a single SQL Server instance. The company plans to implement Dynamics 365 Finance. The following table describes the current implementation and design decisions for the new implementation:

Feature	Current application	Dynamics 365 Implementation
Business logic	Business logic is implemented as stored procedures in SQL Server.	Business logic will be implemented as Power Automate flows.
Data	Data is stored in SQL Server tables.	Data will be imported by using Dynamics 365 APIs.
Reports	Reports are stored in SQL Server Reporting Services.	Reports will be recreated by using Power BI.
User Interface	HTML markup for the user interface is stored as text values in SQL Server.	HTML markup for the user interface will be migrated directly by using FetchXML queries.
Users	Users are configured as SQL Server user account.	Users will be configured as Office 365 user accounts.

You need to identify the gap in the migration plan. Which requirement should you identify as a gap?

- A. User Interface
- B. Business logic
- C. Users
- D. Reports
- E. Data

Answer: C

Explanation:

NEW QUESTION # 89
You need to correctly structure the master data.
What should you recommend? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Issue	Option
Vendors with multiple ship to addresses.	▼
	Business address
	Invoice-to account
	Vendor group
	Vendor posting profile
International and domestic customer receivables.	▼
	Customer group
	Customer segment
	Default dimensions
	Financial dimensions

Answer:

Explanation:

Requirement	Solution
Process flows	▼
	Business process modeler
	Power Apps app
	Microsoft Power Automate
	Microsoft PowerPoint
Guided navigation	▼
	Common Data Model
	Microsoft Word
	Power Apps app
	Task Recorder

Explanation
Graphical user interface, text, application, chat or text message Description automatically generated

Issue	Microsoft	Option

Vendors with multiple ship to addresses.

> Business address
> Invoice-to account
> Vendor group
> Vendor posting profile

International and domestic customer receivables.

> Customer group
> Customer segment
> Default dimensions
> Financial dimensions
