

# High-Quality Valid FCSS\_SASE\_AD-25 Exam Forum & Fast Download Reliable FCSS\_SASE\_AD-25 Exam Book: FCSS - FortiSASE 25 Administrator

P.S. Free & New FCSS\_SASE\_AD-25 dumps are available on Google Drive shared by DumpsValid: <https://drive.google.com/open?id=1KqQN0GBGcCFBrZKNB7ttOsgH9kw7aP33>

That's why it's indispensable to use FCSS - FortiSASE 25 Administrator (FCSS\_SASE\_AD-25) real exam dumps. DumpsValid understands the significance of Updated Fortinet FCSS\_SASE\_AD-25 Questions, and we're committed to helping candidates clear tests in one go. To help Fortinet FCSS\_SASE\_AD-25 test applicants prepare successfully in one go, DumpsValid's FCSS\_SASE\_AD-25 dumps are available in three formats: FCSS - FortiSASE 25 Administrator (FCSS\_SASE\_AD-25) web-based practice test, desktop FCSS\_SASE\_AD-25 practice Exam software, and FCSS\_SASE\_AD-25 dumps PDF.

## Fortinet FCSS\_SASE\_AD-25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li><b>SASE Architecture and Components:</b> This section of the exam measures the skills of Network Engineers and introduces the fundamentals of SASE within enterprise environments. Candidates are expected to understand the SASE architecture, identify FortiSASE components, and build deployment cases for real-world scenarios. The content emphasizes how SASE can be integrated into a hybrid network, showcasing secure design principles and the use of FortiSASE capabilities to support business and security objectives.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li><b>SASE Deployment:</b> This section of the exam measures the knowledge of Implementation Consultants and focuses on the practical aspects of deploying FortiSASE. Candidates will explore user onboarding methods, configuration of administration settings, and the application of security posture checks with compliance rules. The exam also includes key functions such as SIA, SSA, and SPA, alongside the design of security profiles that perform effective content inspection. By combining these tasks, learners demonstrate readiness to roll out secure and scalable deployments.</li> </ul>

Topic 3	<ul style="list-style-type: none"> <li>Advanced FortiSASE Solutions: This section of the exam measures the expertise of Solution Architects and validates the ability to work with advanced FortiSASE features. It covers deployment of SD-WAN using FortiSASE, implementation of Zero Trust Network Access (ZTNA), and the overall role of FortiSASE in optimizing enterprise connectivity. The section highlights how these advanced solutions improve flexibility, enforce zero-trust principles, and extend security controls across distributed networks and cloud systems.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>Analytics and Monitoring: This section of the exam measures the skills of Security Analysts and emphasizes the monitoring and reporting aspects of FortiSASE. Candidates are expected to configure dashboards, logging settings, and analyze reports for user traffic and security issues. Additionally, they must use FortiSASE logs to identify potential threats and provide insights into incidents or abnormal behavior. The focus is on leveraging analytics for operational visibility and strengthening the organization's security posture.</li> </ul>

## Latest Upload Valid FCSS\_SASE\_AD-25 Exam Forum - Fortinet Reliable FCSS\_SASE\_AD-25 Exam Book: FCSS - FortiSASE 25 Administrator

The DumpsValid are one of the high-in-demand and top-rated platforms that has been offering real, valid, and updated FCSS - FortiSASE 25 Administrator (FCSS\_SASE\_AD-25) practice test questions for many years. Over this long time period countless candidates have got success in their dream FCSS - FortiSASE 25 Administrator (FCSS\_SASE\_AD-25) certification exam. They all got help from FCSS - FortiSASE 25 Administrator (FCSS\_SASE\_AD-25) exam questions and easily crack the final Fortinet FCSS\_SASE\_AD-25 exam.

### Fortinet FCSS - FortiSASE 25 Administrator Sample Questions (Q29-Q34):

#### NEW QUESTION # 29

When viewing the daily summary report generated by FortiSASE, the administrator notices that the report contains very little data. What is a possible explanation for this almost empty report?

- A. Log allowed traffic is set to Security Events for all policies.
- B. There are no security profile groups applied to all policies.
- C. Digital experience monitoring is not configured.
- D. The web filter security profile is not set to Monitor.

**Answer: A**

Explanation:

If the daily summary report generated by FortiSASE contains very little data, one possible explanation is that the "Log allowed traffic" setting is configured to log only "Security Events" for all policies. This configuration limits the amount of data logged, as it only includes security events and excludes normal allowed traffic.

Log Allowed Traffic Setting:

The "Log allowed traffic" setting determines which types of traffic are logged.

When set to "Security Events," only traffic that triggers a security event (such as a threat detection or policy violation) is logged.

Impact on Report Data:

If the log setting excludes regular allowed traffic, the amount of data captured and reported is significantly reduced.

This results in reports with minimal data, as only security-related events are included.

FortiOS 7.2 Administration Guide: Provides details on configuring logging settings for traffic policies.

FortiSASE 23.2 Documentation: Explains the impact of logging configurations on report generation and data visibility.

#### NEW QUESTION # 30

What are two advantages of using zero-trust tags? (Choose two.)

- A. Zero-trust tags can be assigned to endpoint profiles based on user groups.
- B. Zero-trust tags can determine the security posture of an endpoint.

- C. Zero-trust tags can help monitor endpoint system resource usage.
- D. Zero-trust tags can be used to allow or deny access to network resources.

**Answer: B,D**

Explanation:

Zero-trust tags assess endpoint compliance based on defined posture rules and are used in access policies to control whether a device is permitted or denied access to specific network resources.

### NEW QUESTION # 31

What are two benefits of deploying secure private access with SD-WAN? (Choose two.)

- A. inline security inspection by FortiSASE
- B. ZTNA posture check performed by the hub FortiGate
- C. a direct access proxy tunnel from FortiClient to the on-premises FortiGate
- D. support of both TCP and UDP applications

**Answer: B,D**

Explanation:

Deploying secure private access with SD-WAN enables the hub FortiGate to perform ZTNA posture checks, and supports both TCP and UDP applications over the tunnel, allowing for flexible and secure access to internal resources.

### NEW QUESTION # 32

Which FortiSASE feature ensures least-privileged user access to all applications?

- A. thin branch SASE extension
- B. zero trust network access (ZTNA)
- C. SD-WAN
- D. secure web gateway (SWG)

**Answer: B**

Explanation:

Zero Trust Network Access (ZTNA) is the FortiSASE feature that ensures least-privileged user access to all applications. ZTNA operates on the principle of "never trust, always verify," providing secure access based on the identity of users and devices, regardless of their location.

Zero Trust Network Access (ZTNA):

ZTNA ensures that only authenticated and authorized users and devices can access applications.

It applies the principle of least privilege by granting access only to the resources required by the user, minimizing the potential for unauthorized access.

Implementation:

ZTNA continuously verifies user and device trustworthiness and enforces granular access control policies.

This approach enhances security by reducing the attack surface and limiting lateral movement within the network.

FortiOS 7.2 Administration Guide: Provides detailed information on ZTNA and its role in ensuring least-privileged access.

FortiSASE 23.2 Documentation: Explains the implementation and benefits of ZTNA within the FortiSASE environment.

### NEW QUESTION # 33

When viewing the daily summary report generated by FortiSASE, the administrator notices that the report contains very little data. What is a possible explanation for this almost empty report?

- A. Log allowed traffic is set to Security Events for all policies.
- B. There are no security profile groups applied to all policies.
- C. The web filter security profile is not set to Monitor.
- D. Digital experience monitoring is not configured.

**Answer: A**

#### Explanation:

The issue of an almost empty daily summary report in FortiSASE can often be traced back to how logging is configured within the system. Specifically, if "Log Allowed Traffic" is set to "Security Events" for all policies, it means that only security-related events (such as threats or anomalies) are being logged, while normal, allowed traffic is not being recorded. Since most traffic in a typical network environment is allowed, this configuration would result in very little data being captured and subsequently reported in the daily summary.

Here's a breakdown of why the other options are less likely to be the cause:

- B . There are no security profile groups applied to all policies: While applying security profiles is important for comprehensive protection, their absence does not directly affect the volume of data in reports unless specific logging settings are also misconfigured.
- C . The web filter security profile is not set to Monitor: This option pertains specifically to web filtering activities. Even if web filtering is not set to monitor mode, other types of traffic and logs should still populate the report.
- D . Digital experience monitoring is not configured: Digital Experience Monitoring (DEM) focuses on user experience metrics rather than general traffic logging. Its absence would not lead to an almost empty report.

To resolve this issue, administrators should review the logging settings across all policies and ensure that "Log Allowed Traffic" is appropriately configured to capture the necessary data for reporting purposes.
