Snowflake SnowPro Core Certification Exam Sample Questions (Q589-Q594):

NEW QUESTION # 589

Which interfaces can be used to create and/or manage Virtual Warehouses?

- A. All of the above
- B. SQL commands
- C. Data integration tools
- D. The Snowflake Web Interface (UI)

Answer: A

NEW QUESTION # 590

What is the expiration period for a file URL used to access unstructured data in cloud storage?

- A. The remainder of the session

- B. The same length of time as the expiration period for the query results cache
- C. The length of time specified in the expiration_time argument
- D. An unlimited amount of time

Answer: B

NEW QUESTION # 591

Which privilege is needed for a SnowFlake user to see the definition of a secure view?

- A. USAGE
- B. CREATE
- C. MODIFY
- D. OWNERSHIP

Answer: D

Explanation:

To see the definition of a secure view in Snowflake, the minimum privilege required is OWNERSHIP of the view. Ownership grants the ability to view the definition as well as to modify or drop the view. Secure views are designed to protect sensitive data, and thus the definition of these views is restricted to users with sufficient privileges to ensure data security.

NEW QUESTION # 592

Which of the following objects can be shared through secure data sharing?

- A. Masking policy
- B. Stored procedure
- C. External table
- D. Task

Answer: C

Explanation:

Secure data sharing in Snowflake allows users to share various objects between Snowflake accounts without physically copying the data, thus not consuming additional storage. Among the options provided, external tables can be shared through secure data sharing. External tables are used to query data directly from files in a stage without loading the data into Snowflake tables, making them suitable for sharing across different Snowflake accounts.

NEW QUESTION # 593

Which of the following activities consume virtual warehouse credits in the Snowflake environment? (Choose two.)

- A. Running EXPLAIN and SHOW commands
- B. Caching query results
- C. Cloning a database
- D. Running a custom query
- E. Running COPY commands

Answer: A,D

Explanation:

Running EXPLAIN and SHOW commands, as well as running a custom query, consume virtual warehouse credits in the Snowflake environment. These activities require computational resources, and therefore, credits are used to account for the usage of these resources. Reference: [COF-C02] SnowPro Core Certification Exam Study Guide

NEW QUESTION # 594

Candidates who want to be satisfied with the SnowPro Core Certification Exam (COF-C02) preparation material before buying can try a free demo.
