CSI CSC2真実試験、CSC2関連試験

このような驚くべきデータを疑うかもしれませんが、この業界では想像もできません。しかし、当社のCSC2試験問題は合格しました。CSC2学習教材のパフォーマンスにどれだけの努力を注ぎ、どれだけ重視するかを想像できます。99%の合格率を使用して、CSC2練習教材が試験に合格して夢を実現するのに役立つことを証明しています。CSC2試験問題で確実に合格するすべての顧客を保証するため、ほとんどの受験者はCSC2ガイド資料に情熱を示しています。

CSI Canadian Securities Course Exam2 認定 CSC2 試験問題 (Q76-Q81):

質問 # 76

The following information is available for REW Co:

What is the price of REW Co. if calculated using the dividend discount model?

- A. \$13.75.
- B. \$15.71.
- C. \$12.50.
- **D. \$14.29.**

正解: D

質問 # 77

What is the most accurate feature of a Canada Education Savings Grant (CESG)?

- **A. CESG payments are made directly to the RESP firm.**
- B. The maximum CESG per beneficiary is \$2,500 annually.

- C. The maximum lifetime CESG per beneficiary is \$8,500.
- D. CESG may be earned until the beneficiary is 21 years of age.

正解: A

質問 # 78

According to the Bank of Canada, approximately how many months does it take for the effect of changes in monetary policy to be felt through the whole economy?

- A. 0
- B. 1
- C. 2
- D. 3

正解: A

解説:

The Bank of Canada estimates that the effects of changes in monetary policy take approximately 18 months to fully work through the entire economy. This lag exists because monetary policy impacts various sectors, such as consumer spending, business investment, and trade, at different speeds.

* B. 6 months: This is too short a timeframe for the full effects of monetary policy to materialize.

* C. 3 months: Immediate impacts may be seen in financial markets, but the broader economic effects require longer.

* D. 36 months: This is far longer than the typical lag for monetary policy effects.

Reference: CSC Volume 1, Chapter 5, "Monetary Policy - Time Lag in Effects" discusses the estimated 18- month lag for monetary policy impacts.

質問 # 79

What is the main benefit of investing in preferred shares?

- A. Priority to claim assets ahead of debt holders.
- B. Guaranteed dividend payment.
- C. Higher potential for capital appreciation than common shares.
- D. Priority to receive fixed dividends ahead of common shareholders.

正解: D

解説:

Preferred shares provide investors with priority to receive fixed dividends ahead of common shareholders.

This fixed income feature makes preferred shares similar to debt instruments but with characteristics of equity. While preferred shareholders have no guaranteed dividend payment (subject to the company's discretion and profitability), they are entitled to receive dividends before any distribution to common shareholders.

Preferred shares do not have a higher potential for capital appreciation compared to common shares, as they are typically designed for income rather than growth. Additionally, preferred shareholders have a lower claim on assets compared to debt holders.

質問 # 80

Institutional clients tend to be more sophisticated than retail clients. What benefit does this translate into for CIBC dealer members?

- A. They are free of fiduciary obligations to their clients.
- B. They are subject to few, if any, investment restrictions.
- C. They are permitted to make trades on a discretionary basis for their clients.
- D. They can organize their firms based specifically on client needs.

正解: D
