With the help of performance reports of HCSA-Presales-IP Network Certification V3.0 (H19-301_V3.0) Desktop practice exam software, you can gauge and improve your growth. You can also alter the duration and HCSA-Presales-IP Network Certification V3.0 (H19-301_V3.0) questions numbers in your practice tests. Questions of this HCSA-Presales-IP Network Certification V3.0 (H19-301_V3.0) mock test closely resemble the format of the actual test. As a result, it gives you a feeling of taking the actual test.

Huawei H19-301_V3.0 certification exam is a valuable credential for individuals looking to pursue a career in IP network presales. HCSA-Presales-IP Network Certification V3.0 certification exam is comprehensive and covers a wide range of topics, ensuring that candidates possess the necessary skills and knowledge to provide effective pre-sales support to customers. Anyone can take the exam, regardless of their level of experience or education, and passing the exam is a great way to enhance one's career prospects in the field of IP network presales.

Huawei H19-301_V3.0 Certification Exam is an essential certification for professionals who work in the field of IP network pre-sales. It is ideal for sales engineers, pre-sales engineers, and technical support engineers who want to enhance their skills and knowledge in Huawei enterprise network products and solutions. HCSA-Presales-IP Network Certification V3.0 certification helps individuals stand out in their field and increase their chances of career advancement.

Latest Huawei H19-301_V3.0 Dumps Book - Certification H19-301_V3.0 Exam Cost

Many people think that passing some difficult Huawei certification exams needs to be proficient in much of H19-301_V3.0 expertise and only these Huawei personnels who grasp the comprehensive knowledge would be able to enroll in the exam. In fact, there are many ways to help you make up for your lack of knowledge, and pass the H19-301_V3.0 Certification exams in the same. Perhaps you would spend less time and effort than the people who grasp fairly comprehensive expertise. The saying goes, all roads lead to Rome.

The H19-301_V3.0 exam covers a wide range of topics related to IP network technologies, including network architecture and design, network routing and switching, network security, and network management. H19-301_V3.0 exam is designed to test the candidate's knowledge of Huawei products and solutions, including routers, switches, firewalls, and other network devices. H19-301_V3.0 Exam also covers the latest industry trends and best practices related to IP network presales.

Huawei HCSA-Presales-IP Network Certification V3.0 Sample Questions (Q144-Q149):

NEW QUESTION # 144

Business process of cloud management full life cycle management?

- A. Cloud network optimization, cloud network planning, cloud deployment, and cloud inspection
- B. Cloud deployment, cloud network planning, cloud network optimization, and cloud inspection
- **C. Cloud network planning, cloud deployment, cloud network optimization, and cloud inspection**
- D. Cloud network planning, cloud network optimization, cloud inspection, and cloud deployment

Answer: C

NEW QUESTION # 145

Regarding park security assistance, which of the following statements is wrong?

- A. The security assistance and defense linkage mechanism is the biggest difference between our solution and security big data vendors such as 360.
- B. In the security assistance solution, the honeypot technology of switch technology uses agile switches to simulate a vulnerable network virtual machine to trap attackers.
- **C. The new encrypted traffic analysis function of agile switches requires packet decryption and directs traffic to CIS for analysis based on characteristics.**
- D. Security assistance solution requires communication with the customer's network and security departments to develop ideas. It is suitable for top-down promotion and is conducive to the expansion of our company.

Answer: C

NEW QUESTION # 146

Huawei's CloudFabric 3.0 solution supports network-wide intelligent O&M. What percentage of potential faults can this solution proactively predict?

- A. 100%
- B. 80%
- **C. 90%**
- D. 70%

Answer: C

Explanation:

Huawei's CloudFabric 3.0 is a data center network solution that leverages AI and machine learning to enable intelligent operations and maintenance (O&M). One of its key features is the ability to predict potential faults before they impact the network. According

to Huawei's official documentation, CloudFabric 3.0 can proactively predict 90% of potential faults, significantly reducing downtime and improving network reliability.

This predictive capability is achieved through advanced analytics, real-time monitoring, and AI-driven insights, which help identify anomalies and performance degradation trends early.

- * Huawei CloudFabric Solution Documentation, Fault Prediction Capabilities.

NEW QUESTION # 147

OSPF routers exchange link status information instead of directly exchanging routes.

- A. FALSE
- B. TRUE

Answer: B

Explanation:

OSPF (Open Shortest Path First) is a link-state routing protocol. Instead of directly exchanging routes, OSPF routers share link-state advertisements (LSAs) that describe the state of their links (e.g., connected networks and costs). Each router uses this information to build a complete topology map of the network and calculate the shortest path to each destination using the SPF (Shortest Path First) algorithm.

The statement accurately describes how OSPF operates, making it TRUE.

References:

- * Huawei OSPF Protocol Guide, HCSA-Presales-IP Network Documentation.

NEW QUESTION # 148

Depending on the geographical coverage, networks can be classified into local area networks (LANs), wide area networks (WANs), and metropolitan area networks (MANs) between LANs and WANs.

- A. FALSE
- B. TRUE

Answer: B

Explanation:

* Network Classification Based on Geographical Coverage:

* Networks are categorized based on their geographical scope into three primary types:

* Local Area Network (LAN): Covers a small geographic area, such as a single building or campus.

* Metropolitan Area Network (MAN): Covers a larger area than a LAN, typically spanning a city or metropolitan region. It serves as an intermediate between LANs and WANs.

* Wide Area Network (WAN): Covers a large geographic area, often spanning multiple cities, countries, or continents.

* Role of MANs: MANs act as a bridge between LANs and WANs, providing connectivity for organizations that need to connect multiple LANs within a city or region.

* Conclusion: The statement is correct because networks are indeed classified into LANs, MANs, and WANs based on their geographical coverage.
