

Valid Dumps Relativity RCA Book - RCA Online Training

RCA – RELATIVITY 101 STUDY QUESTIONS AND WELL-EXPLAINED ANSWERS

What is Relativity - ANSWER Relativity is a feature rich, web-based eDiscovery platform that helps to identify, collect, search, analyze, and review large volumes of electronic information for the purposes of litigation, investigations, or compliance. Relativity is a web-based application accessible from multiple browsers.

What is RelativityOne? - ANSWER RelativityOne is the SaaS version of Relativity built in the Microsoft cloud. RelativityOne provides access to the same set of flexible and extensible tools you'll find in on-premises deployments of Relativity, but from the cloud.

EDRM - ANSWER Relativity is an end-to-end ediscovery solution, covering the phases in the Electronic Discovery Reference Model

Relativity passwords - ANSWER 8 characters or more
| lowercase letter
| uppercase letter
| number
| non-alphanumeric character

Relativity Home - ANSWER Relativity Home can be considered the base camp of a Relativity instance. Here, system administrators manage all system administrator objects and workspaces within the Relativity instance. Users who aren't system administrators can navigate to any area their group is permitted to access. You can always return to the Home page by clicking the Relativity icon () at the top left of your screen.

While buying RCA training materials online, you may pay more attention to money safety. If you choose RCA learning materials of us, we can ensure you that your money and account safety can be guaranteed. Since we have professional technicians check the website every day, therefore the safety can be guaranteed. In addition, RCA Training Materials of us are high quality, they contain both questions and answers, and it's convenient for you to check answers after practicing. We have online chat service staff, if you have any questions about RCA learning materials, you can have a conversation with us.

Recently, RCA exam certification, attaching more attention from more and more people in IT industry, has become an important standard to balance someone's IT capability. Many IT candidates are confused and wonder how to prepare for RCA exam, but now you are lucky if you read this article because you have found the best method to prepare for the exam from this article. You will ensure to get RCA Exam Certification after using our RCA exam software developed by our powerful ExamsLabs IT team. If you still hesitate, try to download our free demo of RCA exam software.

Enhance Your Expertise and Attain Relativity RCA Certification with Ease

The Relativity Certified Administrator (RCA) web-based practice test is compatible with these browsers: Chrome, Safari, Internet Explorer, MS Edge, Firefox, and Opera. This Relativity Certified Administrator (RCA) practice exam does not require any software installation as it is web-based. It has similar specifications to the Relativity RCA desktop-based practice exam software, but it

requires an internet connection.

Relativity Certified Administrator Sample Questions (Q52-Q57):

NEW QUESTION # 52

What is the default production sort order?

- A. Artifact ID
- B. Control number
- C. Custodian
- D. Family group

Answer: A

Explanation:

The correct answer is A. Artifact ID. Relativity's official Production Sets documentation states that in the Sorting section of a production, if no custom sort criteria are selected, the default sort order is Artifact ID, which Relativity describes as the load order of the documents. This is the platform's documented default for productions.

This is an important administrative detail because production sort order affects how documents are sequenced when a production is generated. Relativity also notes that when you apply a custom sort order, family groups are not kept together automatically, so administrators need to design sort strategies carefully if they want a specific production sequence. But absent any special configuration, Relativity defaults to Artifact ID.

The other options are not the documented default. Family group may be relevant in review workflows, but not as the production default sort order. Control number is also not the starting sort value because control numbers may be assigned independently of the production sort configuration. Custodian is a common field for review and QC, but again not the production default. Therefore, the correct answer is A. Artifact ID.

NEW QUESTION # 53

A reviewer updated the coding decision on a document from null to Responsive on the single choice Responsive Designation field. You later discover this coding decision was incorrect. You attempt to use Audit to revert the coding decision, but find you are unable to revert. Why might this be?

- A. You cannot use Audit to revert coding decisions on single choice fields.
- B. You can only mass revert, you cannot revert the coding decision on a single document.
- C. You cannot use Audit to revert coding decisions on documents once they are produced.
- D. You cannot use Audit to revert coding decisions on required fields back to a null state.

Answer: D

Explanation:

The correct answer is C. You cannot use Audit to revert coding decisions on required fields back to a null state. Relativity's official Audit documentation states that certain field types, including single choice, can be reverted. However, it also explicitly states that you cannot revert a required field if doing so would return that field to a blank null value. That is exactly what this scenario describes: the field was changed from null to Responsive, and reverting would restore it to null. If the field is required, Relativity blocks that revert because required fields cannot be blank.

This means option A is incorrect because single-choice fields can be reverted in Audit. Option B is also incorrect because Relativity supports both individual and mass revert workflows depending on the situation.

Option D is not the documented reason for the failure. The controlling issue is the required-field constraint.

From an RCA perspective, this is a subtle but important administrative behavior: the Audit system can revert field changes, but only where the resulting value remains valid under Relativity's field rules. If the revert would violate a field's required setting, the system will not allow it. Therefore, the most accurate reason is that Audit cannot revert the value because the revert would place a required field back into a null state.

NEW QUESTION # 54

What format should you use to search for a specific emoji by name in the Short Message Viewer?

- A. [Name]
- B. :Name:
- C. "Name"

- D. < Name >

Answer: B

Explanation:

The correct answer is B. :Name: . Relativity's RSMF-supported emoji documentation states that emojis in RSMF files display as text strings surrounded by colons , giving the example :smile: . That directly establishes the emoji short-name format used by Relativity for named emoji representations.

The Short Message Viewer documentation also confirms that users can search for emojis in conversations.

Since Relativity's own emoji naming convention is colon-delimited short names, the correct format for searching by name is :Name:.

The other options use bracket, angle-bracket, or quoted forms that Relativity does not identify as the short-name syntax for emoji.

Therefore, the correct answer is :Name: .

NEW QUESTION # 55

What is a possible expected application installation error and solution?

- A. Name conflicts: Rename or map Fields.
- B. Installation Errors: Modify the application.
- C. Locking conflicts: Applications cannot be unlocked.
- D. Restricted file type: Run a re-install.

Answer: A

Explanation:

The correct answer is B. Name conflicts: Rename or map Fields. Relativity's Troubleshooting application installation errors documentation explains that for Name conflicts , the available resolution options include Rename and Map Field . The page specifically instructs admins to use the Resolve Errors drop-down and choose either Rename or Map Field to address the conflicting artifact during application installation.

The other choices are inconsistent with the documentation. For locking conflicts , Relativity says you can resolve them by selecting the Unlock checkbox, so option A is incorrect. For restricted file types , the documented resolution is to remove the external resource from the application and re-install , not simply

"run a re-install," so option D is incomplete and inaccurate. Option C is also too vague and not one of the documented named error-resolution pairings. Therefore, the correct expected application installation error and solution is Name conflicts: Rename or map Fields

NEW QUESTION # 56

When should you run OCR on a production?

- A. Before a production is run.
- B. After a production is exported.
- C. Before a production is exported.
- D. After a document is redacted.

Answer: B

NEW QUESTION # 57

.....

By earning the Relativity RCA certification, you may stop worrying about the bad things that might happen and instead concentrate on the advantages of making this decision and developing new skills that will increase your chances of landing your ideal job. You should start the preparations for the Relativity RCA Certification Exam to improve your knowledge.
