2026 Updated C-S4PM2-2507: SAP Certified Associate - Managing SAP S/4HANA Cloud Private Edition Projects Reliable Dump

Candidates who want to be satisfied with the SAP Certified Associate - Managing SAP S/4HANA Cloud Private Edition Projects (C-S4PM2-2507) preparation material before buying can try a free demo. Customers who choose this platform to prepare for the SAP C-S4PM2-2507 Exam require a high level of satisfaction. For this reason, Real4exams has a support team that works around the clock to help C-S4PM2-2507 applicants find answers to their concerns.

SAP Certified Associate - Managing SAP S/4HANA Cloud Private Edition Projects Sample Questions (Q38-Q43):

NEW QUESTION # 38

Which of the following elements should be included in the solution design to ensure alignment with business requirements? Note: There are 3 correct answers to this question.

- A. Business case including project goals, cost estimates, expected ROI!
- B. Test plan focusing on validating functionality
- C. System landscape blueprint detailing the technical architecture
- D. Integration design specifications for connecting SAP and non-SAP systems
- E. Data migration strategy and approach for transitioning to the new solution

Answer: C,D,E

Explanation:

Step 1 - Understanding the question

This question asks which elements should be included in a solution design to ensure alignment with business requirements during SAP S/4HANA Cloud, Private Edition implementation.

A complete solution design defines how the system will fulfill business needs, covering architecture, data, and integration perspectives.

Step 2 - Evaluate each option

Option A: System landscape blueprint detailing the technical architecture Correct.

A detailed system landscape ensures that the technical setup (systems, interfaces, environments) supports the business solution.

Option B: Test plan focusing on validating functionality

Incorrect.

While test plans are essential for validation, they are not part of the solution design itself. They are developed later during testing phases.

Option C: Business case including project goals, cost estimates, expected ROI Incorrect.

A business case supports project justification and approval but is not a direct part of the solution design.

Option D: Data migration strategy and approach for transitioning to the new solution Correct.

Data migration strategy ensures that all legacy data is transitioned accurately and supports the designed business processes in the new system.

Option E: Integration design specifications for connecting SAP and non-SAP systems Correct.

Integration design defines how data flows between SAP and external systems, which is critical to achieving end-to-end business process alignment.

NEW QUESTION # 39

In which phase do you verify the SAAP Best Practices content that meets the customer's business needs, and capture delta requirements? Note: There are 2 correct answers to this question.

- A. Explore
- B. Realize
- C. Prepare
- D. Discovery

Answer: A,C

NEW QUESTION # 40

Which of the following are prerequisites for using the "RISE with SAP system transition workbench"? Note:

There are 2 correct answers to this question.

- A. The SAP Host Agent has been correctly configured.
- B. A migration server has been provisioned.
- C. All custom ABAP code have been removed from the system.
- D. The user received permission to access the operating system of the target system.

Answer: A,B

Explanation:

Step 1 - Understanding the question

This question relates to the RISE with SAP System Transition Workbench, a tool designed to support system conversions and migration to SAP S/4HANA Cloud, Private Edition.

It helps automate and monitor the transition process, providing visibility and control during system migration.

Step 2 - Evaluate each option

Option A: A migration server has been provisioned.

This is correct.

Before using the System Transition Workbench, a migration server must be provisioned to serve as the technical environment where migration and transition activities are executed.

This server handles data transfer, configuration, and monitoring tasks during the transition.

Option B: The user received permission to access the operating system of the target system.

This is incorrect.

RISE with SAP environments are managed cloud environments, and users (including consultants) do not receive operating system-level access.

All activities are performed using SAP-provided tools and interfaces, not through direct OS access.

Option C: The SAP Host Agent has been correctly configured.

This is correct.

The SAP Host Agent is required for the System Transition Workbench to communicate with the systems involved in the migration. It must be properly configured to enable the workbench to read system information, manage services, and perform health checks.

Option D: All custom ABAP code has been removed from the system.

This is incorrect.

Custom ABAP code is not required to be removed before using the workbench. Instead, it should be analyzed and remediated using the Custom Code Migration app or ABAP Test Cockpit (ATC), but its existence does not block the use of the workbench.

NEW QUESTION # 41

In the SAP Activate run phase the new system is monitored, maintained, and optimized to ensure it runs smoothly and efficiently. Which change management activity can only be realized in the run phase of the cloud implementation?

- A. Development of the user adoption strategy
- B. Conduction of a pulse check
- C. Measurement of actual user adoption metrics
- D. Mapping of SAP roles to employees

Answer: C

NEW QUESTION # 42

Where do you create test cases in SAP Cloud ALM to document formal tests?

- A. Test Preparation app
- B. Test Execution app
- C. Test Plan app
- D. Manage Your Test Processes app

Answer: A

Explanation:

Step 1 - Understanding the question

This question asks where to create test cases in SAP Cloud ALM to document formal tests.

SAP Cloud ALM provides a testing framework to plan, prepare, execute, and monitor test activities.

Step 2 - Evaluate each option

Option A: Test Preparation app

Correct.

The Test Preparation app in SAP Cloud ALM is used to create and manage test cases.

It allows users to define test case details, steps, expected results, and link them to requirements or business processes.

Option B: Test Plan app

Incorrect.

The Test Plan app is used to organize and group existing test cases into a testing cycle, not to create them.

Option C: Manage Your Test Processes app

Incorrect.

There is no specific app called "Manage Your Test Processes" in SAP Cloud ALM's testing module.

Option D: Test Execution app

Incorrect.

The Test Execution app is used to execute test cases that have already been created and assigned, not to create new ones.

NEW QUESTION # 43

.....

The price for C-S4PM2-2507 exam dumps are reasonable, and no matter you are an employee or a student, you can afford it. In addition, you can try free demo before buying, so that you can have a deeper understanding for C-S4PM2-2507 exam dumps. In order to build up your confidence for C-S4PM2-2507 Exam Materials, we are pass guarantee and money back guarantee. If you fail to pass the exam, we will give you full refund. You can enjoy the right of free update for 365 days, the update version will be sent you automatically.
