

# Terraform-Associate-004 Valid Test Sample - Terraform-Associate-004 Exam Demo

DOWNLOAD the newest SurePassExams Terraform-Associate-004 PDF dumps from Cloud Storage for free:  
[https://drive.google.com/open?id=13JPTHnn48VLU9NO-rYY\\_eGy0dCT63gex](https://drive.google.com/open?id=13JPTHnn48VLU9NO-rYY_eGy0dCT63gex)

If you want to be familiar with the real exam before you take it, you should purchase our Software version of the Terraform-Associate-004 learning guide. With our software version of Terraform-Associate-004 exam material, you can practice in an environment just like the real examination. And please remember this version can only apply in the Windows system. You can install the Terraform-Associate-004 Study Material test engine to different computers as long as the computer is in Windows system.

The HashiCorp Certified: Terraform Associate (004) (HCTA0-004) (Terraform-Associate-004) Desktop-based practice Exam is ideal for applicants who don't have access to the internet all the time. You can use this HashiCorp Certified: Terraform Associate (004) (HCTA0-004) (Terraform-Associate-004) simulation software without an active internet connection. This Terraform-Associate-004 software runs only on Windows computers. Both practice tests of SurePassExams i.e. web-based and desktop are customizable, mimic HashiCorp Terraform-Associate-004 real exam scenarios, provide results instantly, and help to overcome mistakes.

## Terraform-Associate-004 Exam Demo, Terraform-Associate-004 Examcollection Vce

There are quite a few candidates of Terraform-Associate-004 certification exam have already started his career, and there are many examinees facing other challenges in life, so we provide candidates with the most efficient review method of Terraform-Associate-004 exam. In order to let you be rest assured to purchase our products, we offer a variety of versions of the samples of Terraform-Associate-004 Study Materials for your trial. We've helped countless examinees pass Terraform-Associate-004 exam, so we hope you can realize the benefits of our software that bring to you.

## HashiCorp Certified: Terraform Associate (004) (HCTA0-004) Sample Questions (Q181-Q186):

### NEW QUESTION # 181

You have used Terraform to create an ephemeral development environment in the cloud and are now ready to destroy all the Infrastructure described by your Terraform configuration. To be safe, you would like to first see all the infrastructure that Terraform will delete.

Which command should you use to show all of the resources that will be deleted? Choose two correct answers.

- A. Run `terraform plan -destroy`
- B. Run `terraform state rm`
- C. Run `terraform destroy` and it will first output all the resource that will be deleted before prompting for approval
- D. Run `terraform show -destroy`

**Answer: A,C**

Explanation:

To see all the resources that Terraform will delete, you can use either of these two commands:

terraform destroy will show the plan of destruction and ask for your confirmation before proceeding. You can cancel the command if you do not want to destroy the resources.

terraform plan -destroy will show the plan of destruction without asking for confirmation. You can use this command to review the changes before running terraform destroy. References = : Destroy Infrastructure : Plan Command: Options

### NEW QUESTION # 182

Which type of block fetches or computes information for use elsewhere in a Terraform configuration?

- A. resource
- **B. data**
- C. local
- D. provider

**Answer: B**

Explanation:

In Terraform, a data block is used to fetch or compute information from external sources for use elsewhere in the Terraform configuration. Unlike resource blocks that manage infrastructure, data blocks gather information without directly managing any resources. This can include querying for data from cloud providers, external APIs, or other Terraform states. Reference = This definition and usage of data blocks are covered in Terraform's official documentation, highlighting their role in fetching external information to inform Terraform configurations.

### NEW QUESTION # 183

Infrastructure as Code (IaC) can be stored in a version control system along with application code.

- **A. True**
- B. False

**Answer: A**

Explanation:

Infrastructure as Code (IaC) can indeed be stored in a version control system along with application code. This practice is a fundamental principle of modern infrastructure management, allowing teams to apply software development practices like versioning, peer review, and CI/CD to infrastructure management. Storing IaC configurations in version control facilitates collaboration, history tracking, and change management. Reference = While this concept is a foundational aspect of IaC and is widely accepted in the industry, direct references from the HashiCorp Terraform Associate (003) study materials were not found in the provided files. However, this practice is encouraged in Terraform's best practices and various HashiCorp learning resources.

### NEW QUESTION # 184

You can access state stored with the local backend by using terraform\_remote\_state data source.

- **A. False**
- B. True

**Answer: A**

Explanation:

You cannot access state stored with the local backend by using the terraform\_remote\_state data source. The terraform\_remote\_state data source is used to retrieve the root module output values from some other Terraform configuration using the latest state snapshot from the remote backend. It requires a backend that supports remote state storage, such as S3, Consul, AzureRM, or GCS. The local backend stores the state file locally on the filesystem, which terraform\_remote\_state cannot access.

Reference:

Terraform documentation on terraform\_remote\_state data source: Terraform Remote State Data Source Example usage of remote state: Example Usage (remote Backend)

### NEW QUESTION # 185

You can configure multiple cloud blocks in your Terraform configuration to connect your workspace to both HCP Terraform and your Terraform Enterprise instance.

- A. False
- B. True

**Answer: A**

Explanation:

Rationale for Correct answer: A Terraform configuration supports a single cloud block (similar to a single backend configuration). The cloud block defines where Terraform runs (HCP Terraform/ Terraform Enterprise) and how the workspace is associated. You cannot connect one configuration to two separate Cloud /Enterprise instances simultaneously using multiple cloud blocks.

Analysis of Incorrect Options (Distractors):

A (True): Incorrect-Terraform does not allow multiple cloud blocks; the configuration can target only one Cloud/Enterprise context at a time.

Key Concept: cloud block constraints and workspace association with HCP Terraform/Terraform Enterprise.

Reference: Terraform Objectives - Manage Terraform Workspaces and Cloud (HCP Terraform/TFE configuration and workflows).

### NEW QUESTION # 186

.....

If you want to pass your exam just one time, then we will be your best choice. Terraform-Associate-004 questions and answers are edited by professional experts, and they have the professional knowledge in this field, therefore Terraform-Associate-004 exam materials are high-quality. In addition, Terraform-Associate-004 training materials contain most of the knowledge point for the exam, and you can have a good command of the exam dumps as well as improve your professional ability in the process of learning. You can also obtain the download link and password within ten minutes for Terraform-Associate-004 Exam Dumps, so you can start your learning immediately.

**Terraform-Associate-004 Exam Demo:** <https://www.surepassexams.com/Terraform-Associate-004-exam-bootcamp.html>

We not only provide professional real Terraform-Associate-004 actual questions but also golden customer service, During the Terraform-Associate-004 exam study dumps preparation, if you have any doubts and questions, please contact us at any time, and we will be always here to solve your problem, The Terraform-Associate-004 certification exam enables you to learn these changes and ensures you remain current in your field, HashiCorp Terraform-Associate-004 Valid Test Sample This means that you can download the product right after purchasing and start your journey toward your big career.

The InnoDB Transaction Model, Day uses black text on a white screen, We not only provide professional real Terraform-Associate-004 Actual Questions but also golden customer service.

During the Terraform-Associate-004 exam study dumps preparation, if you have any doubts and questions, please contact us at any time, and we will be always here to solve your problem.

## **Terraform-Associate-004 Valid Test Sample Will Be Your Reliable Support to Pass HashiCorp Certified: Terraform Associate (004) (HCTA0-004)**

The Terraform-Associate-004 certification exam enables you to learn these changes and ensures you remain current in your field, This means that you can download the product right after purchasing and start your journey toward your big career.

And you will find that our practice questions will appear in your actual exam
