Falls Sie in der Prüfung durchgefallen sind nach der Nutzung der Palo Alto Networks PCCP Dumps, können Sie volle Rückerstattung bekommen, womit Sie die Prüfungsunterlagen früher gekauft haben. Das ist die Garantie von It-Pruefung für alle Kunden. Diese Vorteile der ausgezeichneten Prüfungsunterlagen zur Palo Alto Networks PCCP Zertifizierung sind nicht die Worten, sondern von allen Kunden geprüft. Die Prüfungsunterlagen von It-Pruefung werden seit langem immer geprüft. Die Palo Alto Networks PCCP Prüfungsunterlagen von It-Pruefung sind die Ergebnisse der gesammelten Erfahrungen von IT-Eliten. Deshalb sind diese Dumps echt und die Unterlagen sind seit langem immer sehr populär.

Sorgen Sie noch um die Prüfungsunterlagen der Palo Alto Networks PCCP? Jetzt brauchen Sie keine Sorgen! Weil uns zu finden bedeutet, dass Sie schon die Schlüssel zur Prüfungszertifizierung der Palo Alto Networks PCCP gefunden haben. Wir It-Pruefung beschäftigen uns seit Jahren mit der Entwicklung der Software der IT-Zertifizierungsprüfung. Jetzt genießen wir einen guten Ruf weltweit. Wir bieten Ihnen die effektivsten Hilfe bei der Vorbereitung der Palo Alto Networks PCCP.

Reliable PCCP training materials bring you the best PCCP guide exam: Palo Alto Networks Certified Cybersecurity Practitioner

Ohne Zeitaufwand und Anstrengung die Palo Alto Networks PCCP Prüfung zu bestehen ist unmöglich, daher bemühen wir uns darum, Ihre Belastung der Vorbereitung auf Palo Alto Networks PCCP zu erleichtern. Standardisierte Simulierungsprüfung und die leicht zu verstehende Erläuterungen können Ihnen helfen, allmählich die Methode für Palo Alto Networks PCCP Prüfung zu beherrschen. Um mehr Stress von Ihnen zu beseitigen versprechen wir, falls Sie die Prüfung nicht bestehen, geben wir Ihnen volle Rückerstattung der Palo Alto Networks PCCP Prüfungsunterlagen nach der Überprüfung Ihres Zeugnisses. It-Pruefung ist vertrauenswürdig!

Palo Alto Networks PCCP Prüfungsplan:

Thema	Einzelheiten

Thema 1	• Security Operations: This final section measures skills of a Security Operations Analyst and covers key characteristics and practices of threat hunting and incident response processes. It explains functions and benefits of security information and event management (SIEM) platforms, security orchestration, automation, and response (SOAR) tools, and attack surface management (ASM) platforms. It also highlights the functionalities of Cortex solutions, including XSOAR, Xpanse, and XSIAM, and describes services offered by Palo Alto Networks' Unit 42.
Thema 2	• Endpoint Security: This domain is aimed at an Endpoint Security Analyst and covers identifying indicators of compromise (IOCs) and understanding the limits of signature-based anti-malware. It includes concepts like User and Entity Behavior Analytics (UEBA), endpoint detection and response (EDR), and extended detection and response (XDR). It also describes behavioral threat prevention and endpoint security technologies such as host-based firewalls, intrusion prevention systems, device control, application control, disk encryption, patch management, and features of Cortex XDR.
Thema 3	• Cloud Security: This section targets a Cloud Security Specialist and addresses major cloud architectures and topologies. It discusses security challenges like application security, cloud posture, and runtime security. Candidates will learn about technologies securing cloud environments such as Cloud Security Posture Management (CSPM) and Cloud Workload Protection Platforms (CWPP), as well as the functions of a Cloud Native Application Protection Platform (CNAPP) and features of Cortex Cloud.
Thema 4	• Cybersecurity: This section of the exam measures skills of a Cybersecurity Practitioner and covers fundamental concepts of cybersecurity, including the components of the authentication, authorization, and accounting (AAA) framework, attacker techniques as defined by the MITRE ATT&CK framework, and key principles of Zero Trust such as continuous monitoring and least privilege access. It also addresses understanding advanced persistent threats (APT) and common security technologies like identity and access management (IAM), multi-factor authentication (MFA), mobile device and application management, and email security.

Palo Alto Networks Certified Cybersecurity Practitioner PCCP Prüfungsfragen mit Lösungen (Q116-Q121):

116. Frage

What are two functions of User and Entity Behavior Analytics (UEBA) data in Prisma Cloud CSPM? (Choose two.)

- A. Unifying cloud provider services
- **B. Assessing severity levels**
- **C. Detecting and correlating anomalies**
- D. Identifying misconfigurations

Antwort: B,C

Begründung:

Assessing severity levels - UEBA data helps prioritize incidents by evaluating the risk and severity based on user and entity behavior.
Detecting and correlating anomalies - UEBA continuously analyzes activity to identify abnormal behavior and correlate anomalies that may indicate insider threats or compromised accounts.

117. Frage

Which option is a Prisma Access security service?

- A. Software-defined wide-area networks (SD-WANs)
- B. Virtual Private Networks (VPNs)
- C. Compute Security
- **D. Firewall as a Service (FWaaS)**

Antwort: D

Begründung:

Prisma Access provides firewall as a service (FWaaS) that protects branch offices from threats while also providing the security services expected from a next-generation firewall. The full spectrum of FWaaS includes threat prevention, URL filtering, sandboxing, and more.

118. Frage

What is a function of SSL/TLS decryption?

- A. It applies to unknown threat detection only.
- B. It protects users from social engineering.
- C. It identifies IoT devices on the internet.
- **D. It reveals malware within web-based traffic.**

Antwort: D

Begründung:

SSL/TLS decryption allows security tools to inspect encrypted traffic, enabling them to detect hidden malware, command-and-control communication, or data exfiltration that would otherwise bypass inspection if left encrypted.

119. Frage

Which endpoint product from Palo Alto Networks can help with SOC visibility?

- A. STIX
- B. WildFire
- C. AutoFocus
- **D. Cortex XDR**

Antwort: D

Begründung:

Cortex XDR is an endpoint product from Palo Alto Networks that can help with SOC visibility by allowing you to rapidly detect and respond to threats across your networks, endpoints, and clouds. It assists SOC analysts by allowing them to view all the alerts from all Palo Alto Networks products in one place, and to perform root cause analysis and automated response actions. Cortex XDR also integrates with other Palo Alto Networks products, such as WildFire, AutoFocus, and Cortex Data Lake, to provide comprehensive threat intelligence and data enrichment¹². References:

120. Frage

Which TCP/IP sub-protocol operates at the Layer7 of the OSI model?

- A. UDP
- B. NFS
- C. MAC
- **D. SNMP**

Antwort: D

Begründung:

Application (Layer 7 or L7): This layer identifies and establishes availability of communication partners, determines resource availability, and synchronizes communication.

Presentation (Layer 6 or L6): This layer provides coding and conversion functions (such as data representation, character conversion, data compression, and data encryption) to ensure that data sent from the Application layer of one system is compatible with the Application layer of the receiving system.

Session (Layer 5 or L5): This layer manages communication sessions (service requests and service responses) between networked systems, including connection establishment, data transfer, and connection release.

Transport (Layer 4 or L4): This layer provides transparent, reliable data transport and end-to-end transmission control.
