AAPC-CPC유효한 인증공부자료, AAPC-CPC최신시험

자신을 부단히 업그레이드하려면 많은 노력이 필요합니다. IT업종 종사자라면 국제승인 IT인증자격증을 취득하는 것이 자신을 업그레이드하는 것과 같습니다. Medical Tests인증 AAPC-CPC시험을 패스하여 원하는 자격증을 취득하려면 Fast2test의 Medical Tests인증 AAPC-CPC덤프를 추천해드립니다. 하루빨리 덤프를 공부하여 자격증 부자가 되세요.

최신 Medical Certification AAPC-CPC 무료 샘플문제 (Q90-Q95):

질문 # 90

What is NOT a condition related to the thyroid gland?

- A. Toxic adenoma
- B. Hashimoto's disease
- C. Acosta disease
- D. Graves, disease

정답: C

설명:

Toxic adenoma E05.2- is a thyroid nodule that may secrete hormones into the body that results in an overactive thyroid. Graves' disease E05.0- is an autoimmune disorder that attacks the thyroid, resulting in overactivity. Hashimoto's disease E06.3 is also an autoimmune disorder:

however, it usually results in an underactive thyroid. Acosta disease T 70.29- is altitude sickness.

Even if a coder is unfamiliar with these terms, by locating the ICD-IO-CM code that correlates to the condition, a coder can infer which body system a diagnosis relates to.

질문 # 91

In which scenario would the modifier 53 be appended?

- A. An IUD removal is not completed because the patient reports severe pain when the speculum is inserted.
- B. A patient receives an x-ray of one femur when the doctor ordered bilateral views.
- C. The surgeon decides to terminate a routine colonoscopy when the patient becomes hypertensive before receiving anesthesia in the outpatient procedure room.
- D. A surgeon decides to stop a gallbladder removal procedure in the hospital operating room after the patient has extensive bleeding at the incision site.

정답: D

설명:

Modifier 53 is used to indicate that a procedure was terminated by the provider after anesthesia was given due to extenuating circumstances that affected the health of the patient.

Although option B is similar, the procedure that was discontinued was done so prior to anesthesia in the outpatient setting, in which case modifier 73 would be appended.

질문 # 92

A patient presents to physical therapy status post repair of a complete rotator cuff tear in the right shoulder due to a fall. After applying ice to the shoulder for 8 minutes, the physical therapist performs a soft-tissue massage to the infraspinatus muscle that lasts 23 minutes. Just prior to discharge, the therapist spends 20 minutes instructing the patient on isokinetic exercises to help improve range of motion. Which CPT and ICD-IO-CM code(s) should be used to accurately describe encounter?

- A. 97110, 97010, S46.011D, W19,XXXD
- B. 97110, 97140, 97010, Z48.89, S46.091A, W19XXXA
- C. 97010, 97140x2, 97530, M75.121
- D. 97010, 97140, 97530, S46.011A, W19XXXA

정답: A

설명:

Although CPT code 97530 does describe therapeutic activities, the focus is directed at improving functional performance, whereas the correct CPT code 97110 works to develop range of motion. The CPT code for a soft tissue massage (or manual therapy 97140) is based on 15-minute increments, however, anything over 8 minutes prior to or after can be counted as a unit. Based on this, the 23 minutes spent can be counted as two units. Sequencing is based on highest RVU.

Coding crosswalk for a rotator cuff tear is classified as a muscle strain, so answer B, which specifies

"other injury," can be eliminated. Because the patient is in the recovery period of the injury, the seventh character would not be considered active but subsequent.

질문 # 93

A physician provides a GIPO 39-weeks twin gestational patient with antepartum care, delivery, and postpartum care. Baby A was delivered vaginally without complications, and Baby B was delivered by Cesarean due to fetal tachycardia. Assign the correct ICD-10-CM and CPT codes.

- A. 59409, Z3A.39, Z37.0 and 59510-51, 076, Z3A39, Z37.0
- B. 59400, Z37.0 and 59510-51, 036.8332, Z37.0
- C. 59510, 076, Z3A39, Z37.0 and 59409-51, Z3A39, Z37.0
- D. 59410, Z37.2 and 59510-51, 076, Z37.2

정답: C

설명:

The Cesarean delivery (59510) would be sequenced first because this code has the highest RVU and would include the antepartum and postpartum care. The vaginal delivery by itself (59409), without antepartum and postpartum care, would be reported secondary because the charges for the antepartum and postpartum care of the mother have already been included in the Cesarean delivery code.

질문 # 94

During surgery to remove a malignant melanoma from the intestinal tract, one frozen section is sent for pathological consultation to confirm an adequate excision of the margins. A second specimen is also sent, which requires frozen sections on two tissue blocks. What CPT code(s) should the pathologist report?

- A. 88331, 88332, 88332
- B. 88329, 88331, 88332, 88332
- C. 88331, 88332
- D. 88331, 88331, 88332

정답: D

설명:

CPT code 88331 is used to report only a single specimen. In this scenario, there are two separate specimens being sent to the pathologist. The first specimen, with one frozen section, is reported with CPT code 88331. The second specimen has two tissue blocks with frozen sections, thus represented by coding 88331 for the first tissue block, followed by 88332 for the additional tissue block. CPT code 88329 is inclusive to 88331 and should not be reported separately.

질문 # 95

.....

IT인증자격증은 국제적으로 승인받는 자격증이기에 많이 취득해두시면 취업이나 승진이나 이직이나 모두 편해집니다. 다른 사람이 없는 자격증을 내가 가지고 있다는 것은 실력을 증명해주는 수단입니다. Medical Tests인증 AAPC-CPC시험은 널리 승인받는 자격증의 시험과목입니다. Medical Tests인증 AAPC-CPC덤프로 Medical Tests인증 AAPC-CPC시험공부를 하시면 시험패스 난이도가 낮아지고 자격증 취득율이 높아 올라갑니다. 자격증을 많이 취득하여 취업이나 승진의 문을 두드려 보시면 빈틈없이 달린 문도 활짝 열릴것입니다.
