2026 Mule-Dev-301 Free Practice Exams | Authoritative 100% Free Exam Mule-Dev-301 Simulator Free

The study system of our company will provide all customers with the best study materials. If you buy the Mule-Dev-301 latest questions of our company, you will have the right to enjoy all the Mule-Dev-301 certification training dumps from our company. More importantly, there are a lot of experts in our company; the first duty of these experts is to update the study system of our company day and night for all customers. By updating the study system of the Mule-Dev-301 training materials, we can guarantee that our company can provide the newest information about the exam for all people. We believe that getting the newest information about the exam will help all customers pass the Mule-Dev-301 Exam easily. If you purchase our study materials, you will have the opportunity to get the newest information about the Mule-Dev-301 exam. More importantly, the updating system of our company is free for all customers. It means that you can enjoy the updating system of our company for free.

Salesforce Certified MuleSoft Developer II Sample Questions (Q32-Q37):

NEW QUESTION # 32
A mule application exposes and API for creating payments. An Operations team wants to ensure that the Payment API is up and

running at all times in production.
Which approach should be used to test that the payment API is working in production?

- A. Configure the application to send health data to an external system
- B. Monitor the Payment API directly sending real customer payment data
- C. Create a health check endpoint that listens on a separate port and uses a separate HTTP Listener configuration from the API
- D. Create a health check endpoint that reuses the same port number and HTTP Listener configuration as the API itself

Answer: C

NEW QUESTION # 33
Which plugin or dependency is required to unit test modules created with XML SDK?

- A. Junit
- B. MUnit Maven plugin
- C. XMLUnit
- D. MUnit Extensions Maven plugin

Answer: D

Explanation:
To unit test modules created with XML SDK, the developer needs to use the MUnit Extensions Maven plugin. This plugin allows testing XML SDK modules using MUnit by adding a dependency to the module under test and using a custom processor tag to invoke it. Reference: https://docs.mulesoft.com/mule-sdk/1.1/xml-sdk#testing

NEW QUESTION # 34
Refer to the exhibits.
Bioinfo System API is implemented and published to Anypoint Exchange. A developer wants to invoke this API using its REST Connector.
What should be added to the POM?

- A. □
- B. □
- C. □
- D. □
- E. □

Answer: C

Explanation:
To invoke Bioinfo System API using its REST Connector, option E should be added to the pom.xml file. This option adds a dependency for Bioinfo System API REST Connector with its group ID, artifact ID, version, classifier, and type. The classifier specifies that it is a REST Connector (raml-client), and the type specifies that it is a Mule plugin (mule-plugin). Reference: https://docs.mulesoft.com/apikit/4.x/apikit-4-generate-from-rest-api-task#add-the-api-dependency-to-the-pom-file

NEW QUESTION # 35
Which pattern should be used to invoke multiple HTTP APIs in parallel and roll back failed requests in sequence?

- A. A database as a transactional outbox and an Until Successful router to retry any requests
- B. VM queues as a reliability pattern with error handlers to roll back any requests
- C. Scatter-Gather as central Saga orchestrator for all API request with compensating actions for failing routes
- D. A Parallel for Each scope with each HTTP request wrapped in a Try scope

Answer: C

Explanation:
To invoke multiple HTTP APIs in parallel and roll back failed requests in sequence, the developer should use a Scatter-Gather

router as a central Saga orchestrator for all API requests with compensating actions for failing routes. A Scatter-Gather router executes multiple routes concurrently and aggregates the results. A Saga orchestrator coordinates a series of actions across different services and handles failures by executing compensating actions. Therefore, using a Scatter-Gather router as a Saga orchestrator allows invoking multiple HTTP APIs in parallel and rolling back any failed requests in sequence. Reference: https://docs.mulesoft.com/mule-runtime/4.3/scatter-gather-concept https://docs.mulesoft.com/mule-runtime/4.3/saga

NEW QUESTION # 36

Refer to the exhibit.
What action must be performed to log all the errors raised by the VM Connector?

□

- A. Add <AsyncLOgger name='orgroute.extensions vm' level=ERROR'/> inside the Appenders tag
- B. Add <AsyncLOgger name='orgroute.extensions vm' level=ERROR'I> inside the Logger tag
- C. Configure <Logger level-'ERROR'/> inside the VM Connector configuration
- D. Nothing, as error-level events are automatically logged

Answer: A

Explanation:
To log all the errors raised by the VM Connector, the developer needs to add an async logger with the name 'org.mule.extension.vm' and the level 'ERROR' inside the appenders tag of the log4j2.xml file. This will enable logging all error-level events generated by the VM Connector to the console appender. Reference: https://docs.mulesoft.com/mule-runtime/4.3/logging-in-mule#configuring-custom-logging-settings

NEW QUESTION # 37

......

Our company is trying to satisfy every customer's demand. Of course, we also attach great importance on the quality of our Mule-Dev-301 real test. Every product will undergo a strict inspection process. In addition, there will have random check among different kinds of Mule-Dev-301 Study Materials. The quality of our Mule-Dev-301 exam quiz deserves your trust. Most of our customers are willing to introduce their friends to purchase our Mule-Dev-301 learning dumps.
