Deep-Security-Professional Simulation Questions & Deep-Security-Professional Free Test Questions

Obtaining an IT certification shows you are an ambitious individual who is always looking to improve your skill set. Most companies think highly of this character. Our Deep-Security-Professional exam original questions will help you clear exam certainly in a short time. You don't need to worry about how difficulty the exams are. Itcertking release the best high-quality Deep-Security-Professional Exam original questions to help you most candidates pass exams and achieve their goal surely.

Trend Micro Certified Professional for Deep Security Sample Questions (Q16-Q21):

NEW QUESTION # 16

The Intrusion Prevention Protection Module is enabled, its Behavior is set to Prevent and rules are assigned. When viewing the events, you notice that one of Intrusion Prevention rules is being triggered and an event is being logged but the traffic is not being blocked. What is a possible reason for this?

- A. The Intrusion Prevention rule is being triggered as a result of the packet sanity check failing and the packet is being allowed to pass.
- B. The Deep Security Agent is experiencing a system problem and is not processing packets since the "Network Engine System Failure" mode is set to "Fail Open".
- C. The network engine is running in Inline mode. In Inline mode, Deep Security provides no protection beyond a record of events.
- **D. The default Prevention Behavior in this particular rule may be set to Detect. This logs the triggering of the rule, but does not actually enforce the block.**

Answer: D

NEW QUESTION # 17

What is the role of Apex Central in the Connected Threat Defense infrastructure?

- A. Apex Central stores suspicious files that are awaiting submission to the Deep Discovery Analyzer.
- B. Apex Central distributes Deep Security policies to Agents on the protected Servers.
- C. Apex Central submits suspicious files to Deep Discovery Analyzer for further analysis.
- **D. Apex Central compiles the Suspicious Objects List based on the result of file analysis in Deep Discovery Analyzer.**

Answer: D

Explanation:

Apex Central receives threat intelligence from Deep Discovery Analyzer, compiles the Suspicious Objects List, and distributes it to integrated security products across the environment, enhancing coordinated defense.

NEW QUESTION # 18

New servers are added to the Computers list in Deep Security Manager Web config by running a Discover operation. What behavior can you expect for newly discovered computers?

- A. Any servers within the IP address range that are hosting Deep Security Agents will be added to the Computers list and will be automatically activated.
- B. Any servers within the IP address range will be added to the Computers list, regardless of whether they are hosting a Deep Security Agent or not.
- C. Any servers discovered in the selected Active Directory branch hosting a Deep Security Agent will be added to the Computers list.
- **D. Any servers within the IP address range hosting a Deep Security Agent will be added to the Computers list.**

Answer: D

Explanation:

When you perform a Discover operation using an IP address range, Deep Security Manager scans the specified range and adds any computers that are running a Deep Security Agent to the Computers list. It does not add machines that do not have an agent installed. Discovery does not perform automatic activation unless specifically configured through a different workflow. Active Directory discovery will also only add computers that are hosting an agent.

NEW QUESTION # 19

What is the purpose of the override.properties file?

- A. This file allows Deep Security Agents to override enforced behavior by providing new policy configuration details.

- B. This file allows properties to be tested on Deep Security Manager without affecting the original configuration.
- C. This file is used to transfer policy settings from one installation of Deep Security Manager to another
- D. This file contains the original out-of-the-box configuration properties for Deep Security Manager. This file is renamed to dsm.properties upon initialization of Deep Security Manager.

Answer: B

Explanation:

The properties specified in this configuration file override the properties specified in the dsm.properties file.

This file can be created manually by a support engineer to modify product behavior without affecting the original configuration.

Explanation: Study Guide - page (42)

NEW QUESTION # 20

Which of the following statements is FALSE regarding Firewall rules using the Bypass action?

- A. Firewall rules using the Bypass action do not generate log events.
- B. Firewall rules using the Bypass action can be optimized, allowing traffic to flow as efficiently as if a Deep Security Agent was not there.
- C. Firewall rules using the Bypass action allow incoming traffic to skip both Firewall and Intrusion Prevention analysis.
- D. Applying a Firewall rule using the Bypass action to traffic in one direction automatically applies the same action to traffic in the other direction.

Answer: D

Explanation:

The Bypass action is directional; it does not automatically apply to both directions. If you wish to bypass both directions, you must create separate rules for each. Options B, C, and D are true-bypass skips firewall and IPS analysis, does not log events, and optimizes traffic flow.
