Latest Cisco 300-410 Exam Vce - Test 300-410 Questions Answers

Our 300-410 study materials include 3 versions and they are the PDF version, PC version, APP online version. You can understand each version's merits and using method in detail before you decide to buy our 300-410 learning guide. And the content of the three different versions is the same, but the displays are totally different according to the study interest and hobbies. And it is quite enjoyable to learn with our 300-410 Exam Questions.

To pass the Cisco 300-410 Exam, candidates need to demonstrate a comprehensive understanding of routing technologies and services, as well as their deployment and management in a complex enterprise network. This includes designing and configuring routing protocols, implementing advanced network services, and troubleshooting complex network problems. Candidates are also expected to have a solid understanding of network security principles and best practices, as well as the ability to apply these principles in a real-world network environment.

Cisco Implementing Cisco Enterprise Advanced Routing and Services Sample Questions (Q724-Q729):

NEW QUESTION # 724

Refer to the exhibit. A customer reports that networks in the 10.0.1.0/24 space do not appear in the RIP database. What action resolves the issue?

- A. Permit 10.0.1.0/24 address in the ACL.
- B. Configure 10.0.1.0/24 network under RIP.
- C. Remove ACL on R1 blocking 10.0.1.0/24 network.
- **D. Remove summarization of 10.0.0.0/8.**

Answer: D

NEW QUESTION # 725

Refer to the exhibit.

Redistribution is enabled between the routing protocols, and now PC2, PC3, and PC4 cannot reach PC1. What are the two solutions to fix the problem? (Choose two.)

- A. Filter RIP AND OSPF routes back into OSPF from EIGRP when redistributing into OSPF in R2
- B. Filter all routes except EIGRP routes when redistributing into OSPF in R3.
- C. Filter OSPF routes into RIP FROM EIGRP when redistributing into RIP in R2.
- **D. Filter all routes except RIP routes when redistributing into EIGRP in R2.**
- **E. Filter RIP routes back into RIP when redistributing into RIP in R2**

Answer: D,E

Explanation:

Even PC2 cannot reach PC1 so there is something wrong with RIP redistribution in R2. Because RIP has higher Administrative Distance (AD) value than OSPF and EIGRP so it will be looped when doing mutual redistribution.

NEW QUESTION # 726

Drag and drop the addresses from the left onto the correct IPv6 filter purposes on the right.

Answer:

Explanation:

NEW QUESTION # 727

Refer to the exhibit.

A junior engineer updated a branch router configuration. Immediately after the change, the engineer receives calls from the help desk that branch personnel cannot reach any network destinations. Which configuration restores service and continues to block 10.1.1.100/32?

- A. ip prefix-list 102 seq 5 permit 0.0.0.0/32 le 32
