Cisco Implementing Cisco Advanced Call Control and Mobility Services Sample Questions (Q94-Q99):

NEW QUESTION # 94

Refer to the exhibit. While troubleshooting call failures on the Cisco Unified Border Element, an administrator notices that messages are being sent to the service provider, but there is no response. The administrator later learns that this SIP provider does not support PRACK.

Which header should be removed from the SIP message to resolve this issue?

- A. Content-Type: application/sdp

- B. Contact: <sip:9876S4321@192.168.100.200:5060>
- C. Require: 100rel
- D. Content-Disposition: session:handling=required

Answer: C

NEW QUESTION # 95

Refer to the exhibit.

For long-distance calls, users must prefix their dialed number with "91." The translation pattern was created to strip the 91 as the PSTN expects a 10- digit number. The PSTN also requires the calling number to be set to 9195551234. However, the service provider has said calls with a different calling number are being received. How is this issue resolved?

- A. Enable Use Calling Party's External Phone Number Mask on the translation pattern.
- B. Change the partition of the translation pattern from none to pstn_pt.
- C. Disable Use Calling Party's External Phone Number Mask on the route pattern.
- D. Enable Force Authorization Code on the route pattern.

Answer: C

NEW QUESTION # 96

A company has users that are logged in to hunt groups. However, there is a requirement for hunt group configurations to provide an option to turn on audible ringtones when calls to a line group arrive at a phone that is logged out and on a break. This ringtone alerts a logged-out user that there is an incoming call to a hunt list to which the line is a member, but the call does not ring at the phone of that line group member because of the logged-out status. Which action meets this requirement?

- A. Configure the service parameter hunt group logoff notification and specify the name of the ringtone file.
- B. Configure the HLog softkey on the phone so that while a user is logged off, it plays an audible tone when a call is missed.
- C. Set the service parameter Enterprise Feature Access number for hunt group logout and set up an access number
- D. Set the service parameter Party Entrance Tone to True."

Answer: A

NEW QUESTION # 97

Which type of search message appears in the Cisco TelePresence Video Communication Server search history page when it receives a H.323 call from a RAS-enabled endpoint that originates from an external zone?

- A. LRQ
- B. ARQ
- C. INVITE
- D. OPTIONS
- E. SETUP

Answer: A

NEW QUESTION # 98

Which two descriptions of the Standard Local Route Group deployment are true? (Choose two.)

- A. can be assigned directly to the route pattern
- B. can be associated only under the route list
- C. chooses the route group that is configured under the device pool of the calling-party device
- D. chooses the route group that is configured under the device pool of the called-party device
- E. can be associated under the route group

Answer: B,C
