How are investment dealers unique participants in the institutional market?

- A. They manage a firm's financial assets in support of a company's business activities.
- B. They produce research reports.
- **C. They act on both the buy side and sell side.**
- D. They manage pools of assets on behalf of beneficiaries.

Answer: C

Explanation:

Investment dealers play a unique role in the institutional market due to their dual capability of operating on both the buy side and the sell side:

* The Buy Side Investment dealers assist institutional investors like pension funds, mutual funds, and hedge funds in acquiring securities to meet their investment objectives. These clients aim to optimize returns on their invested assets, and the dealers provide them with access to securities markets, investment advice, and execution services.

* The Sell Side On the sell side, investment dealers facilitate the issuance of new securities. They underwrite and distribute these

securities, providing liquidity to the market. They also produce research reports and provide trade execution services to institutional and retail clients. This dual operation is critical for maintaining market efficiency and ensuring the smooth functioning of capital markets.

This dual-role capacity makes investment dealers pivotal in bridging gaps between the needs of securities issuers and institutional investors. They enhance market liquidity, efficiency, and transparency through their intermediary functions.

- C. To maintain constant contact with the investment dealer counterparties.
- D. To buy securities in the market on demand to maintain liquidity in a security.

Answer: A

Explanation:

The buy-side portfolio manager is responsible for managing investments on behalf of institutional or retail clients. A critical responsibility is to provide the buy-side trader with pertinent market information and analysis of risks to ensure that trades are executed effectively and aligned with the investment strategy.

* Explanation of Options:

- * A. Maintain Liquidity: Incorrect. This is more relevant to market makers or sell-side dealers who provide liquidity in the market.
- * B. Contact with Dealers: Incorrect. While buy-side managers interact with dealers, their primary role is to strategize, not to maintain constant contact.
- * C. Informing Traders: Correct. Buy-side managers analyze risks and market conditions and pass this information to traders for execution.
